Education

University of Illinois Urbana-Champaign

Graduation Date: December 2024

- o Degree: B.S in Computer Engineering | GPA: 3.8/4.0
- o Relevant Skills: Artificial Intelligence, Programming, Data Structures & Algorithms, CPU/GPU/OS Design

Technical Skills

- o Java, JavaScript (jQuery, React), TypeScript, Python, C#, C, VB, SQL (SSMS), Bash, SystemVerilog
- o .NET Core, Azure, Visual Studio, ServiceNow, Excel, RISC-V, CUDA, Synopsys Tools
- o Git, Agile Scrum, REST APIs, MVC, CI/CD

Professional Experience

Sargent & Lundy

Software Development Intern

May 2024 - December 2024

- o Wrote full-stack code in **C#.NET**, **SQL (SSMS)**, and **JavaScript** for various company applications
- o Updated our notification application for automatic backup using **Azure Functions**
- o Built a new resume uploader site running **React** allowing easier internal resume management
- o Deployed and monitored new features for consultant applications using **Azure**

W. W. Grainger

Software Engineer Intern

June 2023 - August 2023

- o Deployed and maintained various Service Catalog forms within **ServiceNow**
- o Developed compatibility support between Service Catalog forms and Virtual Agent
- o Updated existing **ServiceNow** assets with new features requested by stakeholders

Walsh Group

Software Development Intern

April 2022 - January 2023

- o Wrote full-stack code in **VB.NET**, **C#.NET**, **SQL (SSMS)**, and **TypeScript**
- o Communicated with end-users to identify and isolate bugs for debugging
- o Created automated web tools to support the IT helpdesk team using **MVC** software design
- o Managed projects, tickets, and **CI/CD** deployment using **Azure DevOps**

IT - Infrastructure Intern

June 2021 - April 2022

- o Helped migrate the card access system from Continental Access 4000 (CA4K) to OpenPath
 - o Updated the existing card access (CA4K) database to prepare for migration
 - o Wrote new documentation for HR and IT members regarding how to input and modify badges
- o Resolved various IT support tickets through **ManageEngine ServiceDesk**

Projects

Out-of-Order RISC-V Processor

October 2024 - December 2024

- o Developed a processor for the RV32IM instruction set in **SystemVerilog** with two other students for ECE 411
- o Rigorously tested among benchmark applications such as compression and encryption with **Synopsys Tools**
- o I was primarily involved with constructing the issue stage and managing memory requests to and from the CPU

Illinix 391 Operating System

March 2024 - May 2024

- o Developed the kernel for an **x86 operating system** in **C** with three other students for ECE 391
- o Features a **Linux-style CLI** with multiple concurrent terminals and running applications
- o I was primarily involved with constructing the paging, memory structures, and scheduling for the OS

Artificial Intelligence Machine Projects

August 2023 - December 2023

- o Developed multiple machine projects in **Python** for an **artificial intelligence** course which include:
 - o Part of speech sentence tagger using Viterbi algorithm
 - o Neural networks using **PyTorch**
 - o AI snake player using reinforcement learning
