

GOWTHAM REDDY ZANNAVARAPU
SR NETWORK ENGINEER
(781)541-0887
gowthamreddy958@gmail.com
www.linkedin.com/in/gowtham-r-b42326128

SUMMARY

- Almost 7 Years of Professional experience in Network engineering, proficient experience in Routing, Switching, Network Security-Next Generation Firewalls, F5 Load Balancers, Wireless, and VOIP.
- Experience working in large-scale environments on L1/L2/L3 troubleshooting, Network Designing and implementation of Datacenter Architecture, Spine Leaf Architecture.
- Strong hands-on experience working on Cisco Catalyst 2900, 3500, 3750, 4500, 6500, 6800, 7600 9300, 9400, 9500; Nexus 2000, 5000, 6000, 7000, 9000 series switches.
- Experience on Juniper EX2200, EX2500, EX3200, EX4200, EX4500, EX8200 series switches.
- Experience on Meraki MS 120, 125, 210, 225 250, 310, 350, 355, 390 410, 425, 450 series switches.
- Hands on Cisco 7200, 4500, 4400, 4300, 4000, 3800, 2900, 2800, 2600, 2500, 1800 series routers.
- Experience working on SDWAN technologies Cisco Viptela 1000, 2000, 3000 series routers.
- Hands on experience on Cisco ASA 5505 5510 5520 5585 series firewalls.
- Strong hands-on experience in Palo Alto 5K, 3K, 2K series Firewalls, Checkpoint 26000, 23000, 16000 15000, 3000, 1500, 8000 series firewalls. Juniper SRX 300, 550, 1500, 4100, 4200, 4600, 5400, 5600.
- Experience working with Meraki MX84, MX 100, MX 250 series firewall.
- Experience on Cisco Wireless controllers 2500, 4400, 5508 Wireless Access Points 2800, 3500, 3800.
- Experience in working on Meraki MR 32, 33, 36, 42, 45, 46, 52, 53, 56, 84 series wireless access points.
- Support Quality Inspections and Operational Test (OT) events related to the 3G WLAN Aruba Networks Controllers, and Access Points. Aruba 6000 controller, Aruba AP65, 70, 124, 85, 125 system.
- Experience in troubleshooting L2 issues VLAN Trunks, VTP, Ether channel, STP, RSTP and MST.
- Experience in enabling STP enhancements to speed up the network convergence that include Port-fast, Uplink-fast, and backbone-fast and gained knowledge in EVPN, VXLAN, VTEPS and Cisco ACI.
- Experience in VSS, VRF, VPC, VDC and gateway redundancy protocols HSRP, VRRP, and GLBP.
- Experience in enterprise routing using protocols STATIC, RIP, EIGRP, OSPF and BGP.
- Experience with manipulating various BGP attributes such as Local Preference, MED, Extended Communities, Route-Reflector clusters, Route-maps, and route policy implementation.
- Involved in troubleshooting network traffic and its diagnosis using tools like ping, trace route, Gigamon, Wireshark, TCP dump and Linux operating system servers.
- Experience working with Aruba and Cisco Wireless LAN controllers, Configuring and Provisioning AP's, Virtual AP's, RTLS, Wireless SSID's, remote and campus AP's, upgrading WLC.
- Experience with design and deployment of MPLS Layer 3 VPN, MPLS Traffic Engineering.
- Configure, and troubleshoot QoS, SIP, H.323, RTP, SCCP, Session Border Controllers, Voice Gateways, Voice circuits IP /TDM, Cisco Telepresence Infrastructure, QoS, NAT, PAT, and multicast.
- Worked on large scale implementation for SSH (Secure Shell), PKI/SSH, VPN, IPSEC, TCP/IP Monitoring.
- Good knowledge of the technologies Site to Site VPN, DMVPN, SSL VPN, WLAN and Multicast.
- Experience with Enterprise Data Center, Cisco ACI, Virtualization.
- Experience with PA 200, 500, 3020 and VM series firewalls for both Internet and internal traffic filtering. Experience with Panorama M100 series.

- Experience with next generation firewall technologies such as, URL Filtering, SSL Forward Proxy, APP ID, Threat ID, on Palo Alto and checkpoint firewalls.
- Experience with NAT/PAT, static and dynamic NAT, access lists, security zones, policies on Cisco ASA and Juniper SRX firewalls.
- Experience in IOS/JUNOS/PanOS upgrade for Cisco & Juniper routers & switches and PA Firewalls.
- Involved in troubleshooting of DNS, DHCP and other IP conflict problems.
- Expertise in WAN Optimization.
- Strong knowledge of TACACS+, RADIUS implementation in Access Control Network.
- Experience in implementing policies using Cryptography, ACL, ASA Firewall, IPsec, VPN, and AAA.
- Experience with Cloud Networks and migration projects in AWS, Azure and automation using Ansible.
- Experience in F5 Load Balancer which includes Virtual servers, Pools, Health monitors, SSL Profiles, Persistence profiles, Load balancing methods, HA pair, iRules and Cisco Load balancer (CSM, ACE, GSS).
- Gained knowledge on VoIP and video communications, SIP Trunking, video streaming services.
- Knowledge of Python and Ansible scripting for automation in configuration templates, back-ups etc.
- Experience with virtualized ISE deployment across two network enclaves.
- Configured syslog for Splunk implementation monitoring tools such as Nagios, Splunk, Solar winds.
- Experience in VMware ESX/ESXi, VMware vCenter, VMware vCSA and Windows 2008 R2 Hyper-V.
- Used Unix/Linux Shell scripting skills as well as Ansible automation and analyzing logs using Perl.
- Efficient at use of Microsoft VISIO/Office as technical documentation and presentation tools.

EDUCATION

Master's in computer information systems at NEW ENGLAND COLLEGE in New Hampshire, USA.

Bachelor's in computer science at LBRCE in Vijayawada, India.

TECHNICAL SKILLS

- **Networking Technologies:** LAN/WAN, TCP/IP, Frame Relay, VPN, VLAN, VTP, NAT, PAT, STP
- **Networking Hardware:** Cisco, Juniper Palo Alto/Fortinet/Checkpoint/Viptela, Meraki
- **Routing Protocols:** OSPF, ISIS, EIGRP, RIP, MPLS, BGP, Multicasting, Static
- **Security Technologies:** PAP, CHAP, Cisco PIX, Blue Coat, Palo Alto, ASA, Fortinet, Checkpoint
- **Network Monitoring:** SolarWinds, Wireshark, Infoblox
- **Operating Systems:** Windows, LINUX, Cisco IOS, IOS XR, IOS-XE, NX-OS
- **Routers:** CISCO ASR/ISR 4300,4500,2800,3800,7200, Juniper M & T Series
- **Switches:** CISCO 2960,3750,3850,9200,9300, CAT 6800 Nexus 7k,5k,2k
- **Firewalls:** Juniper SRX, Cisco ASA, Meraki, Checkpoint, Palo Alto McAfee Web
- **Wireless:** Cisco, Meraki, Avaya, and Aruba
- **Programming Languages:** C, C++, Perl, Power Shell, Python and Ansible
- **Load Balancers:** F5 Networks (BIG-IP), NetScaler (Citrix)
- **Capacity & performance:** Cascade Riverbed (Flow Monitor)
- **Simulation Tools:** GNS3, VMware, OPNET IT GURU, OPNET Modeler, Cadence
- **AAA Architecture:** TACACS+, RADIUS, Cisco ACS, ISE

PROFESSIONAL EXPERIENCE

SR. NETWORK ENGINEER

NWN CORPORATION FARMINGTON, CT

AUG 2023 – PRESENT

Responsibilities

- Hands on experience in planning, designing, staging, configuring, installing, and testing of network.
- Deploy Cisco router, switches Meraki firewalls and Meraki wireless access points.
- Worked with network planning team on IP address allocation for the routers, switches, workstations, phones, WAPs, Camera and various other devices.
- Experience in replacing cisco 3750 switches to 9200/9300 series switches.
- Configure Cisco Meraki security appliances MX84 & MX100 dashboard implementation, connectivity management, lab installations and support.
- Experience with Meraki MX84 and MS220 48P installation and configurations in multiple sites.
- Hands-on experience in configuring Viptela devices and creating device and feature templates on vManage required for SD-WAN implementation.
- Hands on experience on Viptela SD-WAN and integrated with Zscaler cloud security platform.
- Redistribution of OSPF and EIGRP into BGP with the correct tagging parameters.
- Experience with configuring BGP, OSPF in ISR 900, 1000, 4000 series routers. Worked on several BGP attributes like MED, AS-PATH, Local Preference for route optimization.
- Create Layer 2 VLAN's and SVI, re -IP subnet, Upgrade IOS of the 9200 and 9300 switches.
- Experience in maintaining VLAN, VTP, RSTP, VLAN's Trunking, TCP/IP, SNMP, FTP, TFTP ether channel (LACP and PAGP) and troubleshooting inter-VLAN routing.
- Migration of ASA firewalls to Palo Alto next generation firewalls using migration tool in PA. Migrated all IPSEC tunnels, ACL's, NAT rules and policies.
- Worked on Checkpoint Firewall to create new rules and allow connectivity for various Applications.
- Implemented Firewall rules and Nat rules by generating precise methods of procedure MOPs.
- Configure policies on ASM using manual and auto policy enforcement with F5 ASM, LTM, APM.
- Worked on load balancers F5 to troubleshoot and monitor DNS issues and traffic related to DNS.
- Customize VMware, networking components, and storage for high availability and performance.
- Participate with 3rd party audits to validate compliance with customer (HIPPA, PCI) standards.
- Deployed, Scaling, and troubleshooting many datacenters across all of AWS network fabrics. AWS data backup (snapshot, AMI creation) techniques, along with data-at-rest security within AWS.
- Managing Amazon Web Services infrastructure with automation and configuration management tools.
- Proficient in SSL and IPSEC VPN Technologies using Cisco ASA, Checkpoint, Juniper, F5 APM.
- Experience in Checkpoint, Cisco ASA, Fortinet and Palo Alto installation, upgrade, monitoring and patch management.
- Experienced technology enthusiast with expertise in automation, installation configuration and deployment on Network topologies such as SDN networks.
- Developed and successfully integrated Python scripts to automate SSH login and data collection for network devices not supporting Telnet.
- Experience with setting up AWS direct connect to amazon S3, Amazon EC2, Amazon VPC.
- Worked on traffic flows from on premises to AWS to internet via virtual palo alto firewalls for services that include PAAS, SAAS and IAAS.
- Configured various Linux and windows services to use proxy server for outbound traffic from AWS vnets and logging enabled to AWS cloud watch logs.

SR.NETWORK ENGINEER

WE SECURE APP HYDERABAD, INDIA

OCT 2020 – MAY 2022

Responsibilities:

- Worked on Cisco ASA 5500 series firewall migration to FortiGate firewalls 5001E series firewall.
- Worked on migrating security policies, ACL, NAT, PAT to FortiGate manually.
- Configured Site to Site IPSEC VPN tunnels on FortiGate.
- Phase 01 – Installation of FortiGate Firewalls, Phase 02 – Configuration of all policies and testing,
- Phase 03 – Uplinks to FortiGate, Cutover – Route advertisements to point through FortiGate.
- Create SSID, Configure and troubleshoot Meraki MR 42 wireless access point.
- Visited sites to perform wireless survey to configure Meraki Wireless Access Points MR42 and MR45.
- Setup network using the Cradle Point Router and un-managed switch.
- Create Internal and External DNS records like A record, MX record.
- Configure VLAN's and set up both L2 and L3 VLAN's for communication within the department.
- Worked on network design involving BGP, EIGRP, OSPF, IP metric tweaking and load balancing.
- Experience in deploying EIGRP/BGP redistribution and changing the metrics primary and back up.
- Configure BGP on Edge routers Cisco ASR 9K. Configuration of OSPF for WAN routing, I-BGP and E-BGP routing, redistributions, port Channel configuration on Firewalls to Switches.
- Implemented Access lists & policy mapping on Juniper router installed in each branch across the state.
- Worked with networking teams to install an Avaya VoIP phone system and test phone system connectivity and functionality.
- Experience with Aruba Central platform and configure Aruba instant access points and switches.
- Worked on Palo Alto URL filtering, security Policies, NAT policies, SSL Decryption, Panorama, Firewall software upgrades.
- Worked on APP ID, URL Filtering, Threat ID and WildFire on Palo Alto Firewalls.
- Involved in troubleshooting of DNS, DHCP and other IP conflict problems.
- Responsible for the IPAM (IP Address management) system for a very large WAN/LAN network.
- Configure and utilize a variety of network management tools (Solarwind, Netflow, Infoblox)
- Extensively worked on virtual F5 LTM module on VMware for application testing.
- Extensive Knowledge in configuring and troubleshooting as well as creating Virtual Servers, Nodes, Pools and I Rule son BIG-IP F5 load balancer WLTm for load balancing.
- Experience with F5 GTM and in-depth knowledge of DNS, Global level load balancing, Wide IP 's, Zones, Prober pools, Delegation from Windows DNS server to listener IP.
- Experience in migrating on-premises applications to Azure and configured VNets and subnets as per the project requirement also performed PowerShell scripting to do Patching, Imaging, and Deployments in Azure.
- Worked as part of delivery team where my daily tasks included code upgrades, prefix-list addition, and access-list addition using python script and on Linux platform based on tickets generated by customers.
- Implemented a CI/CD pipeline using Azure DevOps (VSTS, TFS) in both cloud and on-premises with GIT, MS Build, Docker, Maven along with Jenkins plugins.
- Experience with Zscaler cloud proxies ZIA and ZPA. Worked on setting up tunnels to Zscaler zens, zero trust network access.
- Worked as part of delivery team where my daily tasks included code upgrades, prefix-list addition, and access-list addition using python script and on Linux platform based on tickets generated by customers.
- Perform network auditing to be HIPAA compliant.

NETWORK ENGINEER

GE HEALTHCARE BANGALORE, INDIA

JAN 2019 – SEPT 2020

Responsibilities:

- Worked on projects for network survey, configuration of routers, switches, WAPs and designing LAN and WAN.
- Experience working in complex environments which includes Layer 2 Switching, L3 routing, Network security with perimeter firewalls, Load balancing and Access policies management in F5, Wireless LAN Controllers, Wireless Access Point, and VOIP.
- Perform network assessment and proposed SD-WAN solution.
- Configure ASR 9001, 9010 and Catalyst 6509 routers with HSRP to advertised networks in BGP and OSPF.
- Involved in configuring and implementing Cisco 7600, 7200, 3800 series routers and Cisco 2950, 3500, 5000, 6500 series switches and Nexus 5K, 7k and 9K.
- Worked on deploying SD-WAN solution using VIPTELA Router.
- Experience in Meraki Switches MS220 48P, Meraki Access Point (AP) MR-33 dashboard onsite troubleshooting, lab testing and certifications before production rollout.
- Assisting offshore teams located in India in upgrades, VLANs configurations, in troubleshooting layer 3 issues and routing protocol issues mostly BGP.
- Configured BGP for CE to PE route advertisement inside the lab environment.
- Configure OSPF, EIGRP and BGP at Distribution and Core layers.
- Worked on configuration commissioning and upgradation of the MPLS circuits for various branch.
- Worked on BGP, OSPF routing protocols in MPLS Cloud.
- Experience in configuring and troubleshooting WAN technologies like MPLS, T1, T3, DS3, ISDN.
- Implemented and Configure (Profiles, iRules) of F5 Big-IP LTM-6400 load balancers.
- Utilize Tufin firewall reporting tool to remediate idle firewall policies that were leading to vulnerabilities.
- Design & implement DMZ for Web servers, Mail servers & FTP Servers using Cisco ASA5500 Firewalls.
- Configuring High Availability using Cluster XL on Checkpoint as well as VRRP and monitor the Sync status for tasteful replication of traffic between active and standby member.
- Provide tier 3 support for Check Point and Cisco ASA Firewalls to support customers, backup and restore of checkpoint and Cisco ASA Firewall policies.
- Worked on Palo Alto URL filtering, security Policies, NAT polices, SSL Decryption, Panorama, Firewall software upgrades.
- Expertise in Architecting and Implementing Azure Service Offering, such as Azure cloud services, Azure storage, IIS, Azure Active Directory (AD), Azure Resource Manager (ARM), Azure Storage, Azure, Blob Storage, Azure VMs, SQL Database, Azure Functions, Azure Service Fabric, Azure Monitor, and Azure Service Bus.
- Hands on experience on Backup and restore Azure services and in Design and configure Azure Virtual Networks (VNETs), subnets, Azure network settings, DHCP address blocks, DNS settings, security policies and routing.
- Experience deploying BIG-IP F5 LTM Load Balancers for load balancing and traffic management of business application.
- Create port metric for installation of Palo Alto, routers, switches, firepower, and fire eye.
- Experience in preparing High level design (HLD) and Low-level design (LLD) using Microsoft Visio.
- Designed wide area network using Cisco routers and switches to be HIPAA compliant.
- Develop and maintain Network Documentation (Visio diagrams, Excel spreadsheets, Word documents)

NETWORK ENGINEER

NIIT Technologies (Coforge) MUMBAI, INDIA

JULY 2017 – DEC 2018

Responsibilities:

- Validate existing infrastructure and recommend new network designs.
- Administered network operating infrastructure (broadband, VoIP, MPLS) and managed services (virtual servers, firewall, data storage, and cloud-based voice).
- Implemented with Cisco switches 3750, 4500, 6500 in multi VLAN environment with the use of inter-VLAN routing, HSRP, ISL trunk, ether channel.
- Configure and troubleshoot RIP, OSPF, eBGP, iBGP and implement rate limit filter on Juniper MX480, MX240 routers to limit bandwidth utilization.
- Provided Layer-3 redundancy by implementing HSRP and GLBP for High availability.
- Experience with Juniper devices EX-2200, EX-4200, EX-4500, MX-480, M Series, SRX240, 550, 650, 1400.
- Serve as part of a team of network engineers responsible for base wide network upgrade from Cisco Layer 3 Catalyst switches to Juniper Layer 3 EX4200 & EX3200 switches.
- Had exposure to wild-fire advanced malware detection using IPS feature of Palo Alto.
- Upgrade the Firmware and software on WLC 5508 and wireless access point.
- Extensive knowledge in all Wi-Fi Standards including 802.11a, b, g, n, ac.
- Worked on installing Cisco and Aruba Wireless Controllers. Worked on Cisco CWAP, LAWP, Aruba 225, 325, AP groups, SSID's, Authentication rules, 802.1X for Wireless etc.
- Experience in RF transmissions & Antenna behavior, and familiar with 802.11 e protocols and HA.
- Hands on Experience with Cisco Wireless Controllers 5500, 2500 and WAP's 3700's, 3500's and 1142
- Experience on DHCP Server to maintain pool of IP address and leased an IP address to DHCP enable client.
- Implemented Cisco Application Centric Infrastructure (ACI) as a solution for data centers using a Spine and Leaf architecture.
- Maintained HIPPA & PCI compliant network.
