

EXPERIENCE

Federation of State Medical Boards

Eules, TX

Software Engineer

July 2024 - Present

- Developed within 5 different dynamic web applications using Microsoft MVC framework and Visual Studio, improving code organization, efficient routing, and quickly adapting and adhering to variously structured environments.
- Utilized C# and Typescript for applications with a Microsoft ASP.NET platform and Angular framework, constantly keeping project infrastructure up-to-date.
- Worked with T-SQL, LINQ, Swagger and Postman for API implementation, allowing for seamless communication and retrieval in FSMB's data-heavy applications
- Communicated with consulting partners and various development teams from different companies on a daily basis and through Agile methodology, rapidly working through unexpected issues or providing insight.

Optum

Software Engineer

January 2022 - April 2024

- Developed within the UnitedHealthcare Motion Rewards Program, fulfilling various feature requests from new component developments to bug fixes to database reports to front-end alterations.
- Scripted and distributed data reports, such as member earnings and deposits reports, as well as remediated inconsistent or open data issues using SQL and Powershell scripting.
- Utilized Microsoft Azure, Node.js, Microsoft NET, Github, Jenkins, and AWS in order to compile and perform regular application deployments.
- Implemented front-end features utilizing HTML, Angular framework and Storybook, maintaining 90% unit test code coverage.
- Practiced Agile methodology through LeSS framework by participating in daily stand-up, Sprint Demo, Sprint Planning, and collaborating regularly with teammates.

Vivify Health/Optum

Plano, TX

Technology Development Intern

June 2020 - August 2020, June 2021 - August 2021

- Developed a tool within web application involving file upload, data validation, and displaying data on a table.
- Implemented features involving cybersecurity within web application.
- Experienced full-stack coding with Node in Vivify Health's care team web portal.
- Practiced Agile Development with daily Scrum meetings, bi-weekly Sprints, and backlog refinement.

PROJECTS

UnitedHealthcare Motion: As a software engineer within the Motion team at United Healthcare, developed within an application that tracks health data of members and offers rewards when certain goals are reached. Involved development using RESTful APIs for data consumption, Microsoft SQL Server for database management, and React for front-end alterations. Achieved using C#, SQL, HTML, and Powershell scripting.

Sparq Analytics: As a data scientist within the Sparq Analytics Team at United Healthcare, performed daily data analysis such as email engagement in order to improve user experience. Involved Azure Synapse, PowerBI, and SQL.

Mass Caregiver Upload Tool: As an intern at Vivify Health/Optum, created a tool which reads in and performs validation on Excel or CSV files and allows user to mass upload caregivers into the database. Achieved using C#, SQL, JavaScript, and HTML.

Care Team Password Reset Tool: As an intern at Vivify Health/Optum, created a tool which allows members of Vivify Health's web portal to reset their password. Involved database management and sending automated emails. Achieved using C#, SQL, JavaScript, and HTML.

Stock Analysis Application: As part of a senior graduation project, developed a cross-platform mobile application which performs a sentiment analysis on stocks. Achieved using React-Native, JavaScript, Python, Firebase, and multiple API's, including Yahoo Finance API.

EDUCATION

The University of Texas at Arlington

Bachelor of Science in Computer Science Engineering

Arlington, TX

Aug. 2018 - Dec. 2021

TECHNICAL SKILLS

Languages: C, C++, C#, Python, Java, SQL, HTML, CSS, JavaScript, TypeScript, MATLAB, Powershell scripting

Technologies: AWS, Microsoft Azure Devops, RESTful APIs, Microsoft NET, VMware, iOS, Android, and Web development, Git, Angular, React, React-Native

Courses: Machine Learning, Computer Vision, Algorithms and Data Structures, Object-Oriented Programming, Operating Systems, Database Systems and File Structures
