

Harish Dontham

Java Developer

harish@jobtechit.com | +1 (980) 494-5302 | [LinkedIn](#)

SUMMARY

Around 4 years of experience in full-stack software development and a solid understanding of Agile, Waterfall, and SDLC methodologies. Proficient in J2EE technologies like Servlets, JSP, JSTL, JavaBeans and Core Java with Java 8/11. Skilled in building Microservices with Spring Boot, Spring MVC, and implementing Spring Security. Experienced in front-end development using React.js, HTML, CSS, JavaScript, AJAX, and Bootstrap. Adept at working with SQL and NoSQL databases utilizing PostgreSQL, MySQL, MongoDB and managing servers like IBM WebSphere and Apache Tomcat. Familiar with testing tools like JUnit, Karma, Jasmine and Git, Maven, Jenkins, Jira, and Confluence for CI/CD.

SKILLS

Languages:	Core Java, Java 8/11, SQL
J2EE Technologies:	Servlets, JSP, JSTL, JavaBeans, JDBC, ORM, JSF, Java Mail
Frameworks:	Spring MVC, Spring Boot, Spring Security, Microservices, Hibernate
Web Technologies:	HTML, CSS, JavaScript, React.js, TypeScript, Bootstrap, Ajax
Databases:	MySQL, PostgreSQL, MongoDB
Application Server:	Apache Tomcat, IBM Web Sphere, Jboss
Tools:	Git, GitHub, GitLab, UML, Maven, Gradle, Jira, Jenkins, Kafka, Junit, JMeter, SVN, Karma, Jasmine, SoapUI
Cloud and Containerization:	Azure, AWS, Kubernetes, Docker
IDEs:	IntelliJ IDEA, VS Code, Eclipse
Environments:	SDLC, Agile, Scrum, Linux

EXPERIENCE

CGI Incorp, USA

Full Stack Developer | Mar 2024 – Present

- Contributed to the design, development, and testing of 15+ core modules, achieving a 15% reduction in transaction processing time by integrating the application with accounting systems, payment gateways, and other enterprise solutions.
- Developed and maintained 3 server-side modules using Java Servlets and EJBs, improving application response time by 12% through optimized backend processing and efficient resource management.
- Implemented Spring Framework components, including Spring Core for Dependency Injection, Spring MVC for RESTful API development, and Spring Boot for microservices architecture, enhancing scalability, maintainability, and deployment efficiency.
- Designed and developed React.js-based UI components, leveraging advanced HTML5 and CSS3 techniques to improve responsiveness, resulting in higher user engagement and seamless user experiences.
- Created 3 Spring-based RESTful web services, facilitating seamless integration with external applications and improving data exchange efficiency and system interoperability.
- Conducted unit testing, code reviews, and version control using SVN, maintaining high code quality, thorough documentation, and reducing bug occurrences in production environments.

Tata Consultancy Services, India

Software Engineer | July 2021 – Dec 2022

- Created RESTful APIs using Java, Spring Boot, and Hibernate, increasing client system scalability by 25% and reducing API response times by 20% through optimized caching and database indexing strategies.
- Designed and implemented scalable backend applications using Spring Boot, utilizing dependency injection and configuration management to streamline development, enhance maintainability, and reduce development time by 15%.
- Developed and deployed user interfaces for scalable web applications using Angular, leveraging two-way data binding and RxJS to improve asynchronous data handling, resulting in a 25% faster load time.
- Migrated 4+ database schemas using Hibernate, ensuring data integrity and smooth shifts during system changes and upgrades.
- Implemented RabbitMQ for application-level logging, enhancing troubleshooting efficiency and reducing issue resolution time by 15% through better log management and error tracking.
- Optimized PostgreSQL queries and developed stored procedures to reduce customer order retrieval times by 15%, resulting in faster inventory updates and improved system efficiency.
- Built and maintained scalable RESTful APIs, integrating them with 3rd party services & ensuring secure data transmission by OAuth2 & JWT for authentication.

Intex Technologies, India

Junior Java Developer | Jan 2020 – Jun 2021

- Assisted in coordinating development and support phases throughout Software Development Life Cycle (SDLC), ensuring smooth transitions between project stages and timely delivery.
- Optimized API response times by implementing Spring MVC & Hibernate, improving performance & enhancing user experience.
- Designed, and tested Spring Domain Models by Core Java, contributing to development of reliable & scalable backend services.
- Deployed virtual machines on Azure, configured virtual networks, and designed ARM templates, reducing 20% deployment time.
- Streamlined Java application deployments with Maven, improving build efficiency and reducing deployment time.
- Established CI/CD pipelines by Jenkins & GitHub, reducing deployment errors, improving automation for microservices deployment.
- Collaborated with business analysts, developers, and infrastructure specialists to deliver high-availability solutions for critical apps.

EDUCATION

Masters in Computer Science

University of Missouri Kansas, UMKC, USA

| May 2024
