Work Experience

Securian Financial Group

Saint Paul, MN

ServiceNow Platform Admin and Integrations Engineer

8/2023 – 1/2025

Eliminated manual hardware procurement processes, automated onboarding and hardware provisioning work in ServiceNow via flow designer and IntegrationHub and automated tasks.

Automated platform plugin and application updates, architected and co-developed update set code reviews, approvals, and instance-to-instance APIs to automate promotion.

Led projects to stand up Application Portfolio Management with Service Mapping and Event Management in alignment with CSDM 4.0. Implemented Discovery, Agent Client Collector, Service Graph Connectors, Software Asset Management Professional and integrations for SAM-Pro, Vulnerability Response, and custom APIs for various applications.

Responsible for platform health, MID server performance, and security hardening. Participated in PCI, PII, and NYSDFS regulatory audits.

Set up Column Level Encryption and Cloud Encryption to safely and securely store sensitive customer data on the ServiceNow platform to satisfy regulatory and contractual obligations. Implemented custom APIs to import GitHub repository data, alerts and incidents, and user information from Workday and Sailpoint.

Metropolitan Airports Commission

Minneapolis, MN

IT Asset Manager

6/2021 – 8/2023

Spearheaded implementation of asset management according to ITILv4. Ownership of all procurement, shipping, and receiving of hardware assets. Researched, created, published, and enforced hardware standards for all IT assets and consumables. Designed and developed service catalog suite to standardize end user requests and enforce hardware standards. Created and distributed management and contributor level dashboards aligned to ITSM standards.

Transitioned CMDB from manual to systematically populated source of truth; implemented integrations with SCCM, Intune, Active Directory, AzureAD, Sailpoint, Rapid7, CrowdStrike,

vendor asset repositories. Mobile device management for iOS and business devices. Cross-trained as backup SCCM/Intune engineer, technical writer.

Electronic Performance Systems

Minnetonka, MN

Remote Support Technician

11/2020 – 6/2021

Prepd, configured, and remotely supported 600 deployments over 5 unique restaurant point of sale systems running on Windows, iOS, and Ubuntu. Created and closed on average 50-60 service tickets a day through ConnectWise Manage and Automate. Maintained PCI security compliance internally and for each customer network. Modified and upgraded system configurations and networking as needed using PowerShell and self-developed scripts. Managed inventory of hardware components and software licensing using interface between ConnectWise Manage and CRM. 24/7 on-call support for emergency issues. Repaired and rebuilt damaged iPads, printers, and terminals.
