

Harshath Budida | Data Engineer

Location: TX | Phone: (940) 331-4991 | Email: harshathbudida@gmail.com | LinkedIn

SUMMARY

Data Engineer around 4 years of experience in ETL pipelines, big data processing, and cloud platforms (AWS, GCP, Snowflake). Skilled in Apache Spark, Kafka, NiFi, Airflow, Python, and SQL to build scalable data solutions. Strong background in real-time streaming, data warehousing, and compliance (HIPAA/GDPR). Passionate about automation, optimization, and data-driven decision-making.

SKILLS

Programming Languages & Scripting:

Big Data & Data Engineering Tools:

Cloud & Data Warehousing Platforms:

Machine Learning & Analytics Tools: DevOps, CI/CD & Orchestration:

Data Management & Compliance:

Development & Project Management:

Python (Pandas, NumPy, PySpark, SQLAlchemy), Java, R, Scala, UNIX, SQL (PostgreSQL, MySQL, T-SQL, PL/SQL, HQL), MS Excel

Hadoop, Apache Spark (PySpark, Spark Streaming, Spark SQL), Hive, Pig, Hue, MapReduce, Apache Kafka, Apache NiFi, Apache Airflow, Talend, Informatica, Sqoop

AWS (S3, Redshift, Glue, Lambda, EC2, EMR), Google Cloud (BigQuery, Cloud Dataflow, Pub/Sub), Azure, Snowflake

Scikit-learn, TensorFlow, MLflow, H2O.ai, Tableau, Power BI, Looker, Superset Docker, Kubernetes (EKS, GKE), Terraform, Jenkins, Git, GitHub, Bitbucket, CI/CD Pipelines, ASG-Zena Workspace

ETL Pipelines, Data Lakes, DBT (Data Build Tool), HIPAA/GDPR Compliance, Data Governance, Data Lineage

VS Code, PyCharm, Jupyter Notebook, Postman, JIRA, Confluence, Trello, Agile, Scrum, REST API Development

EXPERIENCE

CVS Pharmacy, USA Data Engineer

July 2023 - Current

- Designed and developed ETL pipelines using Apache NiFi, Talend, and Airflow to ingest, transform, and load structured and unstructured healthcare data into AWS Redshift and Snowflake.
- Implemented real-time data streaming solutions using Apache Kafka and Spark Streaming to enhance data availability for prescription processing and insurance claims.
- Optimized data warehousing strategies by applying indexing, partitioning, and query tuning, reducing query execution time by 40%.
- Developed PySpark-based data validation scripts to ensure data integrity, anomaly detection, and compliance with HIPAA regulations.
- Created interactive dashboards in Power BI and Tableau to provide actionable insights on patient adherence, prescription refill rates, and operational performance.

Tata Consultancy Services, India Data Engineer

Sep 2020 – Dec 2022

- Developed and maintained scalable ETL pipelines using Apache NiFi and Talend, integrating structured and unstructured data from multiple sources (billing systems, CRM, and network logs) into Snowflake and Google BigQuery.
- Designed and optimized data lake architectures in AWS (S3, Glue, Redshift), improving data accessibility and enabling advanced analytics and machine learning workflows.
- Implemented real-time data streaming solutions with Apache Kafka and Spark Streaming, analyzing customer engagement and service quality metrics, leading to a 25% improvement in customer retention.
- Automated data ingestion and transformation workflows using Apache Airflow, reducing data processing time by 40% while ensuring high availability.
- Developed Python-based data validation scripts to perform data integrity checks, GDPR compliance enforcement, and anomaly detection, reducing inconsistencies across distributed systems.
- Created interactive dashboards in Tableau and Power BI to visualize customer behavior trends, personalized offer performance, and churn probability, assisting in data-driven decision-making.

EDUCATION

Master of Science in Data Engineering University of North Texas, TX

Dec 2024

Bachelor of Technology in Computer Science and Engineering Jawaharlal Nehru Technological University, India

Sep 2020
