

Harshavardhan Reddy Medagam

Data Analyst

harshavardhan@techjobmails.com | +1 (551) 449-2190 | [LinkedIn](#)

SUMMARY

- Results-driven **Data Analyst** with **3+ years of experience**, specializing in **healthcare analytics**, and adept at turning complex datasets into actionable insights to improve clinical and operational efficiency.
- Proficient in programming languages like **Python, R, SQL**, and **Scala**, with expertise in **machine learning, predictive analytics**, and **data modeling** using tools such as **Scikit-learn, TensorFlow**, and **Keras**.
- Skilled in creating interactive dashboards and compelling visualizations using **Tableau, Power BI**, and **Excel** to communicate insights effectively to both technical and non-technical stakeholders.
- Strong expertise in cloud-based platforms like **AWS, Azure**, and **Google Cloud** for data pipelines, scalable storage, and analytics solutions.
- Deep understanding of **healthcare compliance frameworks** such as **HIPAA** and the **HITECH Act**, ensuring secure data handling and adherence to regulatory standards.

TECHNICAL SKILLS

Data Analysis & Machine Learning: Data Wrangling, Data Cleaning, Predictive Analytics, Time Series Analysis, Statistical Analysis, Data Segmentation, Cluster Analysis, Anomaly Detection

Programming Languages: Python, R, SQL, Scala

Data Visualization Tools: Tableau, Power BI, Matplotlib, Seaborn, ggplot2

Database Management: MySQL, SQL Server, PostgreSQL, MongoDB, Oracle

Cloud Platforms & Big Data Tools: AWS (Redshift, S3, QuickSight), Microsoft Azure, Google Cloud (BigQuery, Looker Studio), Apache Spark, Hadoop

ETL & Workflow Automation: Apache Airflow, Alteryx, SSIS, Pandas, NumPy

BI & Reporting Tools: Power Pivot, Microsoft Excel, Looker

Compliance & Security: Data Privacy Regulations (HIPAA, HITECH Act), Data Encryption

DevOps & Tools: Docker, Git, Jenkins, Jupyter Notebooks, VS Code

Methodologies: SDLC, Agile, Scrum

EDUCATION

Masters in Healthcare Informatics

Sacred Heart University – Fairfield, CT

Sep 2022 – Dec 2023

WORK EXPERIENCE

United Healthcare Group | Data Analyst

Sep 2023 – Present

United Healthcare Group focuses on delivering advanced healthcare solutions, combining technology and data analytics to improve patient outcomes.

- **Optimized data pipelines** using Python and Apache Airflow, automating ETL tasks and reducing data processing times by **25%**.
- **Improved report refresh rates by 30%** by designing efficient workflows in Tableau and Power BI, ensuring faster insights for leadership.
- Designed predictive models using **Scikit-learn** and **TensorFlow**, enabling forecasts for clinical resource allocation and cost optimization.
- Conducted **time series analysis** to detect patterns in hospital admissions, improving scheduling accuracy by **20%**.
- Integrated **real-time data streams** from EHR and HIS systems into dashboards, enabling continuous monitoring of clinical performance.
- Developed **custom Python scripts** to detect anomalies and ensure data quality, leading to a **15% reduction in reporting errors**.
- Analyzed patient churn rates using clustering algorithms, enabling targeted interventions and improving patient retention metrics by **10%**.
- Used **SQL and PostgreSQL** for advanced query optimization, reducing execution time by **40%** and improving database performance.
- Developed and deployed **Azure-based data solutions**, ensuring scalability and security for analytics workloads.
- Presented actionable insights to executive teams through interactive dashboards and visualizations, driving data-backed decisions for process improvements and resource allocation.

Experion Technologies | Data Analyst

May 2020 – Jul 2022

Experion Technologies specializes in delivering analytics and technology solutions to enhance operational efficiency and customer outcomes.

- Created **automated ETL workflows** using Python and SQL, enabling real-time data integration and reducing manual intervention by **50%**.
- Conducted **exploratory data analysis (EDA)** on healthcare datasets, identifying actionable insights that improved patient care and operational efficiency.
- Built interactive dashboards in **Power BI** to track key performance indicators (KPIs), reducing decision-making delays by **30%**.
- Enhanced **database query performance by 40%** through optimized indexing and restructuring in PostgreSQL.
- Designed statistical models using **R** for patient risk analysis, prioritizing critical cases and improving healthcare outcomes.
- Integrated predictive analytics to track operational metrics such as admission rates, enabling better resource allocation across facilities.
- Developed **data cleaning pipelines** with Python, ensuring consistency and reliability of datasets for analysis, improving quality by **25%**.
- Utilized **Tableau** to create executive-level dashboards, visualizing trends and forecasts for strategic planning.
- Applied **cluster analysis** to segment patient populations and identify high-risk groups, driving targeted healthcare initiatives.
- Participated in **Agile workflows**, collaborating with cross-functional teams to ensure timely delivery of analytics solutions and maintain stakeholder alignment.
