

Harshith Gaddam

Data Engineer

Houston, Texas | +1 (346) 661-7988 | harshithgaddam01@gmail.com

SUMMARY

Data Engineer with around 4 years of experience specializing in ETL development, data extraction, modification, validation, and reporting. Proficient in **Python, SQL, Scala, and Shell Scripting** for comprehensive **data engineering tasks**. Expertise in **NumPy, Pandas, SciPy, Scikit-Learn, TensorFlow, and Matplotlib** for advanced **data processing, machine learning, and visualization**. Proven ability in **Big Data technologies** like **Hadoop, Apache Spark, Hive, Sqoop, Oozie, and HDLC** for robust **data processing pipelines**. Skilled in **managing databases (MySQL, PostgreSQL, Oracle, and MongoDB)** and using **visualization tools (Tableau, Power BI, MS Excel)** for effective insights communication. Experienced in **Agile (SCRUM)** and **Waterfall methodologies**, adapting to varying project requirements. Adept at leveraging **cloud technologies**, particularly **AWS (EC2, EBS, S3, EMR, AWS Glue, and DMS)** and **Azure** to **design, implement, optimize scalable and reliable data solutions**.

SKILLS

- **Programming Language:** Python, SQL, R, Scala
- **Operating System:** Windows, Linux
- **Database:** MS SQL Server, PostgreSQL, MongoDB, MySQL
- **Big Data Eco system:** Hadoop, MapReduce, Hive, Apache Spark, Pig, Hive, HDFS
- **Reporting Tools:** Tableau, Power BI, SSR
- **Packages:** NumPy, Pandas, Matplotlib, SciPy, Scikit-learn, Seaborn, TensorFlow
- **Frameworks:** Kafka, Airflow, Snowflake, Django, Docker
- **Cloud Technologies:** AWS, GCP, Azure
- **ETL Tools:** SSIS, SSAS
- **Methodologies:** SDLC, Agile, Waterfall
- **Other Tools:** Anaconda, Sitecore, CMS, Jira, Confluence, Jenkins, Git, MS Office, Jenkins

EXPERIENCE

Data Engineer | Northern Trust | USA

Nov 2024 – Present

- Develop **Python scripts** for efficient **data processing, utilizing Pandas and NumPy, enhancing analytical capabilities**.
- Manage **MySQL databases**, ensuring seamless **data retrieval and storage, contributing to a 20% increase in database efficiency**.
- Apply **Agile methodologies** in collaborative environments, facilitating streamlined **project development and delivery**.
- Leverage **Amazon Web Services (AWS)**, employing **AWS Glue, EC2, and PySpark** for computing, and **S3** as a storage mechanism, leading to a **20% improvement in data processing speed**.
- Automate **ETL logic development** offshore, ensuring accurate understanding and enabling the creation of optimal **ETL mappings**.
- Design and implement interactive **Power BI dashboards** with **dynamic visualizations, user-driven parameters** for data exploration.
- Implement **CI/CD pipelines** using **Jenkins, developed Ansible** templates for automatic **code deployment**, and **configured SonarQube** to enhance code quality, resulting in a **30% reduction in deployment time**.

Data Engineer | Hexaware Technologies | India

Sep 2020 – July 2023

- Spearheaded end-to-end processes for **Data Extraction, Integration, Modification, Validation, Analysis, Management, and Reporting, resulting in a streamlined and efficient data workflow**.
- Employed advanced features of **Scikit-Learn** and **TensorFlow** to optimize **machine learning models, enhancing predictive accuracy and reducing inference time by 20%**.
- Developed **Python applications, scripts, and automation tools, enhancing workflow efficiency** and productivity by automating repetitive tasks, **reducing manual effort by 25%**.
- Experienced in working with **Docker** for **containerizing applications** and using **Kubernetes** for **orchestrating containerized deployments, ensuring scalable, efficient, and reliable** application management in production environments.
- Executed **SQL queries** and optimized **database performance, resulting in a 25% reduction** in query execution time.
- **Collaborated with cross-functional teams**, ensuring successful implementation of **Waterfall methodology** in project workflows.
- Employed **Git** for **version control, enhancing collaboration and code management** during software development.
- Executed **data visualization** using **Tableau**, providing actionable insights and **improving decision-making processes**.
- Implemented **Hadoop** and **PySpark** for efficient **big data processing, reducing processing time by 20%**.
- Employed **SCRUM methodology**, leading daily stand-ups, and **sprint planning, resulting in on-time project delivery**.

EDUCATION

Master of Management Information Systems

Lamar University, Beaumont, TX

Bachelor of Information Technology

Jawaharlal Nehru Technological University, Hyderabad, India

CERTIFICATIONS

AWS: Cloud Practitioner Essentials

Microsoft: Power BI Data Analyst Associate
