-

Experience

Customer Support Engineer / Customer Success Manager SpinSci Technologies Inc.

12/2022 to 09/2024
Dallas, TX

- Delivered expert support to clients, efficiently resolving complex issues across EHR, CRM, CCaaS, UCaaS, and CPaaS technologies, driving high levels of customer satisfaction, and operational excellence.
- Collaborated with the Customer Success team to swiftly address client concerns, ensuring effective resolutions, and fostering strong, lasting client relationships.
- Managed tickets and tracked resolutions using tools like Jira and ServiceNow, streamlining change request processing and resolution workflows.
- Utilized VPN clients like BeyondTrust Bomgar, Citrix, and SecureLink to securely access customer environments, enabling efficient and timely issue resolution.
- Utilized Mirth Connect, Cisco UCCE, and SQL Server Management Studio to diagnose and implement technical solutions tailored to client needs.
- Developed detailed Method of Procedure (MOP) and Root Cause Analysis (RCA) documentation to pinpoint critical issues and deliver sustainable long-term solutions.

Implementation Engineer SpinSci Technologies

02/2022 to 12/2022
Dallas, TX

- Led clients through all stages of technical projects, ensuring on-time delivery of solutions that met or exceeded expectations.
- Created detailed technical documentation, enhancing project transparency, and facilitating effective communication among stakeholders.
- Optimized client network configurations to improve performance and fortify security, ensuring reliable and secure operations.

- Deployed and integrated enterprise software solutions, ensuring seamless functionality and compatibility within client environments.
- Designed customized architecture and flow diagrams to define, streamline, and optimize client network structures for maximum efficiency.

Mechanical Engineer

11/2021 to 02/2022

Communications Test Design Inc. (CTDI)

Jeffersonville, IN

- Automated operational processes that boosted shipping and receiving efficiency by 20% and improvements in workflow efficiency and error reduction.
- Engineered, constructed, and maintained a large-scale conveyor system integrated with a trash compactor, ensuring continuous, and seamless operational efficiency.
- Developed and implemented conveyor system programs using TwinCAT 3, optimizing performance, increasing reliability, and maximizing operational efficiency.
- Utilized PLCs to manage and control conveyor systems, ensuring precise, reliable, and consistent operational functionality.

Co-op Application Developer

08/2019 to 02/2020

UPS (United Parcel Service)

Louisville, KY

- Architected and deployed a disaster recovery application to maintain data continuity during primary database outages, reducing downtime, and preventing data loss.
- Contributed to the development of design documents and Business Continuity Plan (BCP) diagrams, reinforcing disaster recovery strategies, and bolstering system resilience.
- Executed extensive security assessments with Burp Suite to detect and address vulnerabilities, enhancing the robustness and security of near-real-time applications.
- Leveraged Visual Studio to efficiently manage database operations, ensuring seamless functionality, data integrity, and consistent system performance.
- Assisted in developing design documents and BCP diagrams for disaster recovery applications, ensuring clear communication and alignment among project stakeholders.

Online Marketing Specialist

04/2009 to 12/2009

Excellence in Dentistry

New Albany, IN

- Designed and launched a subscriber website with a blog to attract users, boosting newsletter sign-ups and driving online traffic, which increased user engagement and company revenue.
- Leveraged Google's SEO tools to rank the website on the first page of search results, resulting in over 700 new user sign-ups, and significant growth in business value.

Education

Bachelor's: Computer Science with Minor in Business

08/2021

Indiana University Southeast

New Albany, IN

Involved in organizations like the Computer Security Group (CSG) and Kappa Sigma (KΣ), where I gained valuable experience and built a supportive network.
