WORK EXPERIENCE

Software Engineer

Punjab Information Technology Board (PITB)

07/2024 - Present

LAHORE

PITB is a government organization responsible for promoting and managing IT initiatives and services in Punjab. It provides technology solutions for various public and private sector projects to enhance governance, streamline operations, and improve service delivery across the province.

Projects

- **E-Registration System:** As a Software Engineer, I developed and maintained the E-Registration platform for Sindh, enabling secure digital transfer of land and property ownership. The platform used biometric fingerprint devices and camera-based verification for accurate authentication. I built RESTful APIs with .NET Core Web API for system integration and implemented key modules for property registration and ownership transfer. I also provided real-time insights through RDLC reporting solutions. The project utilized ASP.NET, .NET Core Web API, SQL Server, JavaScript, Bootstrap, and Node.js for reliable performance.

Software Engineer

RapidSilicon

06/2022 - 06/2024

LAHORE

RapidSilicon specializes in semiconductor and AI-driven solutions, focusing on tools and platforms for hardware design. I contributed to projects like HR management systems, licensing platforms, and developer tools, delivering scalable solutions with modern technologies.

Projects

- **Logistics ERP System** I developed and maintained a logistics ERP system using .NET MVC, Windows Forms, and MS SQL Server. The project focused on enhancing UI/UX for user interfaces, managing complex database operations, and implementing RDLC reporting to provide detailed analytics and insights for logistics operations.
- **RapidGPT** I contributed to multiple modules of the RapidGPT and Primis.ai projects. I built a licensing site for RapidGPT using .NET MVC, integrating Stripe for secure payment processing and automating API key generation for product licensing. For Primis.ai, I developed a Visual Studio Code extension with syntax highlighting and linting features, ensuring cross-platform compatibility. Additionally, I worked on the Primis.ai website using React and Docusaurus, focusing on responsive design, frontend features, and project architecture. These modules collectively enhanced the functionality and user experience across various platforms.

EDUCATION

Bachelor of Science in Computer Science

Institute Of Management Sciences, Lahore

08/2019 - 08/2023

CGPA 3.80

SKILLS

HTML/ CSS

JAVASCRIPT

BOOTSTRAP

.Net Core

C / C++

.NET(MVC)

C#

Jquery

SQL / MySql

Angular

React Js

TYPESCRIPT
