WORK EXPERIENCE

JPMorgan Chase & Co

Full Stack .Net Developer

IL, USA

Aug 2024 - Current

- Led a team of 4 members to develop the Client Loyalty and Engagement Module with C#/.NET Core, SQL Server, and Entity Framework Core, applying SOLID principles and the Saga pattern, increasing client retention by 11%.
- Designed and deployed microservices with Docker and Azure Kubernetes Service (AKS), increasing application scalability by 60% during peak traffic.
- Engineered advanced UI components utilizing React and Redux, decreasing page load time by 20% while enhancing user interaction, leading to increased retention of active users.
- Collaborated with stakeholders and the product team to refine and improve cashback and loyalty functionality, ensuring business objectives aligned with technical execution.
- Utilized Azure Blob Storage to securely manage sensitive client documents, reducing file retrieval time by 18% and improving data compliance by 25%.
- Optimized Web APIs using Azure Cache for Redis and caching strategies, cutting API response time by 35% and handling 300 requests per second with minimal latency.
- Achieved 85% unit test coverage through Test-Driven Development (TDD) with MSTest and Moq, reducing production bugs by 40%.

Full Stack .Net Developer Intern

Nov 2023 - May 2024

- Enhanced the Cashback System using .NET Core Web API, implementing a transaction validation service and fraud detection algorithms, leading to a 22% reduction in invalid cashback claims.
- Streamlined database management with SQL Server and Entity Framework Core, reducing complex query runtime to under 50 milliseconds through LINQ query optimization.
- Integrated automated tests into the CI/CD pipeline, reducing deployment errors by 30%.

Illinois Institute of Technology

Graduate Teaching Assistant (Software Project Management)

IL, USA

Jan 2023 - Aug 2023

- Led Software Project Management (SPM) tutorials using Microsoft Project Professional for 300+ students, resolving queries and clarifying grading procedures.
- Analyzed over 200 individual student projects using a structured rubric; crafted concise feedback reports which addressed common weaknesses and guided students toward achieving higher standards in subsequent assessments.
- Enhanced grading efficiency by 20% as Lead TA by managing grading responsibilities, coordinating workload distribution with other TAs, and implementing formulas in grading sheets.

IBM Corporation

.Net Developer

MH, India

Jan 2020 - Jul 2022

- Built application using ASP.NET MVC and Razor views, managing a 100k+ record SQL Server database to enable seamless movie browsing, searching, and purchasing.
- Implemented JWT authentication and role-based access control (RBAC), reducing unauthorized access incidents by 35% while maintaining seamless user experience.
- Integrated Stripe for secure payment workflows, improving transaction efficiency by 40% and reducing payment-related errors by 20%.
- Leveraged Entity Framework Core to reduce query execution time by 25%, enhancing overall application responsiveness.
- Established an Azure DevOps CI/CD pipeline, cutting deployment times by 30% and minimizing manual errors in the release process.
- Integrated Serilog and custom middleware for advanced error handling, reducing incident resolution time by 50% and ensuring consistent system performance.
- Conducted manual testing of new features and functionality, ensuring high-quality releases and reducing defects by 20%.

- Implemented automated testing protocols that reduced manual testing efforts by 60%, increasing overall code coverage to 85% and significantly decreasing production bugs by approximately 30%.
- Collaborated with cross-functional teams to troubleshoot and resolve software defects, achieving a resolution rate of 95% within a two-week sprint cycle, thereby accelerating project timelines by an average of three weeks.
- Developed and optimized over 15 web applications utilizing .NET framework, improving load times by 40% and enhancing user experience for over 5,000 active users monthly.

PROJECTS & OUTSIDE EXPERIENCE

KiteFlux - Python Trading Algorithm | Python, Pandas, Linux, PostgreSQL

Jan 2024 - Current

- Created a Python algorithm in a Linux environment for Intraday Trading, achieving a 30% monthly profit increase by automating stop-loss and target orders based on stock market spot prices.
- Analyzed 4TB of company's data to enhance trading strategies using PostgreSQL, focusing on data-driven decision-making for algorithmic improvements.
- Developing a Bollinger Band trading Python algorithm to execute options contracts autonomously, aiming to eliminate human intervention by 100% and increasing trading efficiency.

EDUCATION

Illinois Institute of Technology

Master's, Computer Science

Chicago, IL

Graduation Date: May 2024

University of Mumbai

Bachelor of Engineering, Computer Engineering

MH, India

Graduation Date: May 2022

SKILLS & INTERESTS

Languages	C#, SQL, T-SQL, XML, JavaScript, TypeScript, Python, Java, Node.js
Front End Technologies	HTML5, CSS3, Tailwind CSS, JavaScript (ES6+), React.js, Angular, Bootstrap, AJAX, jQuery, Vue.js
.NET Technologies & Frameworks	ASP.NET, ASP.NET Core Web API, ASP.NET MVC, WCF, .NET Framework, Entity Framework, Dapper, ADO.NET, .NET Core, NHibernate, LINQ, Telerik devcraft
Operating Systems Design Patterns	Windows Server, Linux, MVC, MVVM, Singleton, Factory, Repository, Service-Oriented Architecture
Databases	SQL Server, MongoDB, PostgreSQL, Oracle
Tools	Visual Studio, Eclipse IDE, Docker, Kubernetes, Power BI, Jenkins, Azure DevOps, Google Analytics, Git, Github, GitLab, API Gateway, MSTest, Moq, Playwright, Postman
Back End Technologies	.NET, .NET Core, Node.js, Flask, RESTful API, SOAP API, RabbitMQ, Kafka, Confluence
Cloud Services	Azure, AWS
Project Management	Conducting SCRUM, requirements gathering, IT capacity & cost planning, conducting interviews, Agile software development practices, TOGAF Enterprise Architecture, IT Vendor Evaluation & Assessment
