Education

Northeastern University

Sept 2023 – May 2025

Masters of Science in Computer Science – CGPA 3.94/4

Boston, Massachusetts

Coursework – Mobile Application Development, Data Structures and Algorithms, Web Development, Cloud Computing.

Technical Skills

Programming Languages: Python(Flask, Django, Selenium, Pandas, Matplotlib, NumPy), Kotlin, Java.

Android Framework: SDK, Jetpack, Hilt-Dagger, Retrofit, Flows, Coroutines, Room DB, Glide, Mockito, Material Design, NDK.

Cloud: Amazon Web Service (EC2, S3, Lambda, RDS, IAM, VPC).

Version Control Tools and Database: Git, Firebase, Visual Studio Code, Android Studio, MySQL, MongoDB, Google Firestore.

Experience

Tymeline

United States (Remote)

Mobile Application Developer Intern

Sept 2024 – Dec 2024

- Refactored and modernized the company's Cross Platform **React Native** App to improve functionality and maintainability.
- Collaborated with the project manager to resolve 30+ technical issues, utilizing strong **debugging** skills and Android development experience to overcome challenges and drive project alignment with organizational goals.
- Contributed to enhancing Tymeline's codebase using **ReactJS** and **NodeJS**, implementing **Single Page Application** with **Bootstrap** for responsive design, **React Router** for seamless navigation, and **Redux** for global state management.

Capgemini Technology Services India Limited

Bengaluru, India

Associate Consultant

Mar 2023 – July 2023

- Collaborated with the iOS team to develop an **IoT-based Android app** that allows real-time interaction and status updates with machinery, using **Jetpack Compose** and integrating Android SDK features to enhance app performance.
- Used **Protocol Buffers** for **Bluetooth Low Energy** (BLE) communication, which reduced the data size by up to 3 times and made serialization-deserialization 10 times faster compared to **JSON** with up to 30 times less memory utilization.
- Improved the API communication with the **Retrofit** library, which cut the data retrieval time by 25% using **RESTful APIs**.

Software Developer

Aug 2021 – Mar 2023

- Worked in an Agile environment, Developing an Application for the 'GigaLife' at **Capgemini**, utilizing the **MVVM** and **clean architecture**. Implemented **Dagger-Hilt** for **Dependency Injection**, enhancing modularity and testability of the application.
- Followed the Software Development Lifecycle (SDLC), implementing Automated **Unit Test** in project using **JUnit Testing** and **Mockito**, reducing bugs by 40% and improving the code
- Used **Coroutines**, HTML data parsing, **Firebase Remote Config**, and **Native Development Kit** (NDK) using C to boost app performance. Created intuitive UI with **Material Design** and assisted on the CI/CD of the application.
- Improved the application performance by revamping the inbox functionality, debugging the application, optimizing UI rendering, leading to a 15% improvement in layout loading speed. Added notification functionality with **WorkManager**.

Projects

Digi Tech Healthcare

- Developed a Healthcare Management System utilizing **Kotlin** and **XML** along with **MVP Architecture**.
- Utilized **NavGraphs** to Navigate between different Fragments, **ViewBinding** to have seamless connection between the code and the XML file, and **Firebase Firestore** and **Firebase Storage** for Storing and Managing structured data.
- Utilized **Glide Library** to efficiently load, caching, and display images from various sources in Android applications, improving performance by 200ms.

Tangito

- Developed a food delivery Android application which used **RoomDB** to access the local **SQLite** storage and Utilized GraphQL API to streamline the communication between the backend and the mobile application.
- Implemented secure User Authentication utilizing **Firebase Authentication**, ensuring data integrity and user privacy.
