

HUGH J. BORST

(872) 273-0434 – Boyne City, Michigan

hughborst@gmail.com • www.linkedin.com/in/hugh-borst

SUMMARY

An innovative and detail-oriented information technology leader with demonstrated expertise in software development, enterprise architecture, cloud migration, project management, process design and improvement, UI integration strategies, and technology road map development. Excels at developing, mentoring, and leading successful teams. Manages the entire software development life cycle. Experienced in high-performance data capture and processing. Strong background in selecting, proving, and implementing optimal technology solutions and stacks. Consistently delivers scalable solutions to improve efficiency, reduce costs, and position companies for long-term growth.

TECHNICAL SKILLS

Java, Algorithm Design, High Performance Messaging (Kafka, Tibco EMS, MQ), In-Memory Datastores (Apache Ignite, Tibco ActiveSpaces), Architectural Patterns, Software Development Patterns, Architecture Frameworks (TOGAF), Kubernetes, AWS & Azure Cloud, Big Data (Hadoop & Spark), Integrability, Availability, Data Modeling & Design, Shell Scripting, Mobile App Development, Quality Attribute Analysis

EXPERIENCE

INDEPENDENT CONSULTING/SOFTWARE PRODUCT DEVELOPMENT Thailand/US/Global
Consultant/Digital Nomad..... 2023-2024

- Upgraded, redesigned & rewrote PHP Surgeon Scheduling Application (HL7) to include latest PHP version, improved security and current AES 256 encryption.
- Design and implementation (incomplete) of proprietary software integration technology product, using Java, Spring, Spring Boot, and Tomcat.

UNDERWRITERS LABORATORIES – *Product testing and safety* Northbrook, Illinois
Technical Architect..... 2021-2022

- System digitized more than 126 years of Test, Inspect, and Certify data for both products and associated certifications.
- Led technical architecture for matrixed team of off-shore developers and data analysts/scientist.
- Originally using Hadoop, Spark, Impala/Hive, Neo4J, HBase, MySQL, Python, AngularJS, and Spring Java, but migrated to Angular 9, Java, and Spark on Azure Synapse.
- Redesigned document ingestion logic to improve capture rates from ~60% to 86% on first pass.
- Led architecture for B2B customer-facing Certificate Management application.

COMPSYCH CORPORATION – *Mental Healthcare & EAP*

Chicago, Illinois

Technical Architect.....2016-2020

- Managed all system and application architecture, and change/release mgmt, enterprise-wide.
- Provided leadership, mentoring, and support on design and architecture for three development teams, totaling 18 developers.
- Developed five-year architectural plan for entire enterprise, focused on anticipating and accommodating rapid, persistent growth.
- Designed and led project to select and prove new user interface application development technology stack for enterprise.
- Proved Angular 2 as the most appropriate technology (out of three that were evaluated) to replace Java Server Faces.
- Designed and implemented integration technology to permit piece-by-piece migration of functionality from old UI to new, allowing both technologies to coexist within same application container and to share same user session.
- Designed and implemented comprehensive event auditing system of all user interactions on internal applications using Java AOP, Kafka, Hadoop, and Hive.
- Designed Kubernetes-based private cloud implementation to improve operational consistency, resilience, and scalability.

UNITED AIRLINES, INC. – *Airline & Transportation*

Chicago, Illinois

Senior Architect.....2008-2016**Complex Event Processing Team:**

- Developed baggage event listener service in Java to support efforts to improve bag scan rates at five key handling points.
- Implemented Passenger Name Record Enterprise Eventing system for all reservations, using Tibco Business Events to alert interested consumers in particular types of reservation changes.
- Designed and developed seat re-accommodation very-high-speed response, continuously available data service to provide detailed information for each passenger on a given flight, plus seat map and attribute data, at a maximum response time of 300ms, using Tibco ActiveSpaces in-memory data grid and Tibco Business Events.
 - o Eliminated several million dollars of economy-plus seat upgrade refunds annually.
 - o Dramatically improved customer satisfaction when aircraft changes cause seat re-assignment.
- Led change & release management for all CEP projects

Pilot/Crew Team:

- Architected, designed, and led development of all new distributed and mobile applications for pilot and flight attendant support and use.
- Designed and built iPhone application to deliver pilot flight calendar, trip, lodging and transportation, gate, aircraft maintenance, and in-flight weather information.
- Led development, integration, and device management efforts of project to deliver 11,000 iPads to pilots for flight manual and in-flight navigational charting delivery, saving \$3M annually.
- Designed and built pilot vacation bidding and awarding system to manage vacation obligations for 6,500 pilots and 400 pilot instructors.
- Led technical support efforts for Sabre AirVision catering and food service management application.
- Won IT “Jalapeño Award” for design and implementation of web-service-based data interface solution to United's Easy Purchase device maintenance and support vendor, resulting in \$9M annual savings in “revenue shrinkage.”

ADDITIONAL EXPERIENCE

FRY, INC., Westmont, Illinois, **Systems Architect**, 2005-2008. *E-Commerce*. Designed, led implementation, and managed deployment of PCI-compliant retail e-commerce web sites. Designed and implemented custom ETL tool that supported data loading into OCP without programming, based only on configuration (GoF Builder and Strategy patterns). Designed, built, and launched production web sites for www.softball.com, www.baseballexpress.com, and www.pcrichard.com. Built interfaces for Scene 7, Ecometry Online, Coremetrics reporting, Web Side Story reporting, and Endeca search. Managed team of three developers.

THE HIGHER GEAR GROUP, Hoffman Estates, Illinois, **Project Manager**, 2003-2005. *Automotive Sales Software*. Managed team of nine developers and three quality assurance analysts. Managed legacy/production Delphi code base as well as a simultaneous redevelopment effort migrating to J2EE/web client code base.

MUNICIPAL TECHNOLOGIES, LLC, Chicago, Illinois, **Chief Technology Officer, Principal Architect**, 2001-2002. *Municipal Service Software*. Designed system architecture for suite of municipal services applications using Java.

EDUCATION

UNIVERSITY OF MICHIGAN - FLINT, Flint, Michigan — **B.S., Computer Science/Psychology**

PROGRAMMING LANGUAGES

Java, C, C++, C#, SQL, JavaScript, TypeScript, Bash scripting, Python, PHP, Ruby on Rails, Pascal/Delphi, Objective C, Perl

FRAMEWORKS & TOOLS

Spring, Spring Boot, Spring MVC, JPA, Thymeleaf, Angular, React, Node, Maven, Hadoop, Kafka, Hive, HBase, Spark, Java AOP, Oracle RDBMS, MySQL/MariaDB, PostgreSQL, MS SQL Server, Azure Synapse, CouchDB, Apache Ignite Cache, Tomcat, JBoss, WebLogic, WebSphere, IBM MQ Series, Tibco EMS, Tibco ActiveSpaces, Tibco BW & BE, Java Server Faces w/ Orchestra, ITSM/ITIL (ServiceNow & Atlassian), Splunk, Jenkins CI/CD
Linux, Windows & macOS
