

Hugo Orlando Scavino

Senior Full Stack (Java/Angular) Developer – AWS Certified

SUMMARY

As a senior full-stack developer focusing on Java and Angular, I have a proven track record of deploying critical enterprise applications. My experience also includes developing complex retail POS systems, modernizing complex finance and banking systems, replacing content management systems, and migrating WebSphere Spring-based applications to a modern Spring Boot stack ready for the AWS cloud and Docker.

My proficiency in Agile (Scrum) principles and CI/CD stacks (Atlassian, Jenkins, GitLab) immediately impacts the team. I am adept at working with offshore teams, delivering corporate-wide processes, building prototypes, pushing highly technical enterprise initiatives, and solving complex problems using industry and company best practices.

EXPERIENCE

Capstone Consulting — *Senior Software Developer – Remote*

Sep 2023 – Aug 2024

- Senior developer providing mentoring, training for the Angular UI and Spring. Boot Backend. Components consisted of Spring Security, JPA and MVC.
- Key member of the team assisting the QA and Business Analysts.
- Solution was a replacement for a POS for a major used auto parts consortium.

Penske — *Staff Architect Software – Tampa, FL*

Apr 2021 – Jun 2023

- Senior developer providing guidance, training, and initial migrations from legacy WebSphere infrastructure to a modern build (Maven), deployment (Bamboo), and version control (Bitbucket) stack connecting to RDMS platforms (MySQL, PostgreSQL, DB2, and Oracle).
- Employed Docker and Kubernetes in preparation of Penske migrating to a cloud-based SaaS.
- Individually responsible for business-critical applications. Applications based on core Spring, Struts, JSF/JSP, and MyBatis hosted on WebSphere and Tomcat.
- Applied Agile methodology with Scrum as implemented by Jira workflows.

DTCC — *Senior Technology Consultant – Tampa, FL*

Mar 2015 – Apr 2021 (40 Hours/Week)

- Software Full Stack Developer (Angular/TypeScript/Spring Boot/JPA) working with a small, high-impact team modernizing key and essential securities and financial applications primarily on Java, WebSphere, and DB2 (ANSI SQL) stack.
- Advocate for Agile, CI/CD (Maven, Jenkins, GitFlow, Jira, and Bitbucket), and test-driven development. Moved enterprise applications from legacy COBOL and WebSphere on the mainframe to cloud-ready stateless Angular (v10) applications with DB2 back-ends using hibernate and JPA for persistence API.

Times Publishing Co — *Development Manager – St. Petersburg, FL*

Jul 2011 - May 2015 (40 Hours/Week)

- Manager leading the tampabay.com modernizing public website – six employees in a larger digital team of twelve deploying content to AWS using Agile.

HSBC — *Java Architect/Developer – Tampa, FL & Sheffield, UK*

Jun 2004 - Jul 2011 (40 Hours/Week)

- Lead Java Developer part of first-ever integrated deployment of IBM HATS and WebSphere Portal Server.
- Managed UK software architecture team (nine-member team) supporting UK business with best practices and guidelines.
- Managed US offshore production support team
