

OMKAR DURGASI

USA | +1 (774) 506-0734 | omkardurgasi.work@gmail.com | [LinkedIn](#)

Professional Summary

- Experienced Full Stack Developer with over 3+ years of expertise in utilizing the Java full stack (Spring, Spring Boot, Hibernate) and associated frameworks.
- Proficient in Linux system administration and adept at leveraging CLI tools for streamlined server management.
- Specialized in crafting sophisticated web applications using Java, JavaScript, HTML5/CSS, ReactJS and various cutting-edge web development tools.
- Skilled in database design, optimization, and management, with proficiency in relational databases such as MySQL and PostgreSQL.
- Has strong problem-solving abilities and a commitment to delivering clean, efficient code.
- Hands-on experience in deploying applications in AWS Cloud Environment.
- Experienced in integrating third-party APIs and payment gateways and ensuring compliance with relevant security standards.
- Expertise in designing and implementing secure RESTful APIs for seamless microservices communication.

Skills

- Programming Languages:** Java, SQL, HTML, CSS, JavaScript, Python
- Frameworks & Libraries:** Spring, Java EE, JSP, JSF, Node.js, Reactjs, Angularjs
- Database Technologies:** MySQL, Java Persistence API (JPA), Hibernate
- Security:** HTTPS and data encryption, risk reduction, GDPR, PCI-DSS compliance
- Testing & Optimization:** Performance testing, Jest, JUnit, JMeter, Selenium
- Version Control:** Git, GitHub, Bitbucket
- Cloud Platforms:** AWS, Azure
- Methodologies:** Agile, Scrum, Continuous Integration/Continuous Deployment (CI/CD)
- Containerization:** Docker, Kubernetes
- Other Tools:** PowerBI, Confluence, JIRA, Postman, Jenkins
- Architecture:** Microservices Architecture, MVC

Projects

Web Development: Inventory Management System

- Created an inventory management solution with Spring MVC and Angularjs, automating stock tracking and reducing errors.
- Utilized JPA and Hibernate for data persistence, cutting database access times by 30%.
- Conducted load testing with JMeter, ensuring reliable performance under heavy load.

Online Quiz Application

- Developed a quiz platform where users can take quizzes, view scores, and compare results using ReactJS for a dynamic and responsive quiz-taking experience.
- Trained and worked on Spring Boot to manage quizzes, questions, and score tracking.
- Used MySQL for storing quiz questions, scores, and user profiles. Written SQL queries for saving and retrieving quiz results.

Professional Experience

Full Stack Java Developer at Doublene, Austin, TX

January 2024 – Present

- Responsible for designing and developing the website using HTML5, SCSS, MaterialUI and ReactJS, ensuring a visually appealing and user-friendly web interface.
- Developed and maintained backend services using Java, Spring Boot, and Hibernate, ensuring efficient and secure server-side functionality.
- Utilized TypeScript to create type-checked AJAX calls to access the backend services and APIs to enable dynamic content retrieval and enhance website responsiveness.
- Enhanced security protocols, utilizing HTTPS, OAuth2, and data encryption to reduce security breach risks by 70%, while adhering to GDPR and PCI-DSS standards.
- Integrated payment gateways into microservices using Spring Boot and MySQL, managing database schemas, optimizing queries, and ensuring data integrity.
- Collaborated with UX designers to optimize the website's user experience, including usability testing, accessibility improvements, and implementing user feedback to enhance overall satisfaction.
- Demonstrated expertise in Test-Driven Development (TDD) methodology, consistently writing comprehensive unit tests using JUnit for Java and Jest for JavaScript, ensuring the reliability and stability of the applications, contributing to a 20% reduction in post-release bugs and enhancing overall Underwriting accuracy.
- Responsible for troubleshooting and debugging issues using IntelliJ IDEA in the production environment and deploying applications to AWS-EC2 using Jenkins for automated deployment processes, reducing deployment time by 20%.
- Followed Agile practices, including sprint planning, daily stand-ups, and retrospectives, ensuring on-time delivery of key features and smooth collaboration across teams.
- Used Git for version control and automated deployment processes via Jenkins, maintaining continuous integration and ensuring seamless updates to production environments.

Java Software Engineer at USG Corporation, Chicago, IL**February 2023 – December 2023**

- Designed and developed scalable and efficient web applications that support various aspects of processes and business operations using Java, Spring boot and Hibernate.
- Developed responsive and intuitive user-friendly interfaces using HTML, CSS, and ReactJS, ensuring seamless interaction and cross-browser compatibility across different devices and platforms.
- Employed MySQL, PostgreSQL databases with Hibernate to design and manage databases, ensuring optimal performance, data integrity, and scalability for web applications.
- Ensured that the web applications adhere to GDPR industry security standards and compliance regulations implementing encryption, access controls, and auditing mechanisms to protect sensitive manufacturing data.
- Integrated payment gateways within web applications to facilitate secure online transactions for purchasing raw materials, equipment and finished products and for seamless transactions in online sales.
- Implemented MVC architecture using Spring framework for Analytics and Reporting, leading to a 20% improvement in data visualization and decision-making capabilities.
- Implemented security token-based authentication and authorization mechanisms using technologies like JSON Web Tokens (JWT) or OAuth2 tokens.
- Conducted backend unit testing using JUnit and used Jasmine for frontend testing to ensure code quality and reliability.
- Identified and resolved issues with IntelliJ IDEA for debugging and troubleshooting the codebase.
- To track the progress in project management and to prioritize tasks, I have utilized JIRA. Communicated and collaborated with the stakeholders using Slack.
- Implemented CI/CD pipelines using Jenkins to automate testing, build, and deploying the processes into the EC2 in the AWS Cloud, enabling rapid and reliable delivery of code changes and enhancements.

Web Developer at Techcy, India**May 2020 – July 2021**

- Learned to leverage Java and Spring Boot Framework for building web applications, implementing key features with HTML, SCSS, and ReactJS.
- Gained experience using Webpack and Node.js for managing frontend build processes, enabling efficient bundling and module management.
- Learned to design and integrate RESTful APIs with Spring Boot, facilitating communication between microservices and handling AJAX calls to improve interactivity.
- Practiced database design and optimization with MySQL and PostgreSQL, and implemented Hibernate and JPA for efficient object-relational mapping.
- Implemented Hibernate ORM for database interactions, focusing on improving CRUD operations and query performance.
- Learned to integrate a ReactJS frontend with a Spring Boot backend, working towards performance optimization and responsive design.
- Developed an understanding of security measures such as input validation, HTTPS, and SQL Injection prevention for securing applications. Practiced writing complex queries using JPA and MySQL.
- Collaborated with cross-functional teams, using GitHub for version control, and participated in code reviews and CI/CD pipelines.
- Set up CI/CD pipelines with Jenkins on the AWS Cloud platform, helping streamline the deployment process and ensure application stability.
- Worked closely with product managers, QA engineers, and DevOps teams in an Agile environment, learning best practices for delivering high-quality software solutions.

Certifications & Achievements

- . Certified by Sololearn on JavaScript and HTML Fundamentals
- . Certified by Datacamp on Java
- . Certified by Eduonix on SQL
- . Attended MIT APP Inventor, a 3 day workshop conducted by APSSDC on Java Mobile Application Development in 2017.
- . Worked as an intern for L-Cube Innovative Solutions (Glenwood Systems) Pvt Ltd and got trained on designing Puzzle games using Java. Learned to work with applets and worked on Eclipse in 2020.

Education

Masters in Data Science**August 2021 – December 2022**

University Of New Haven, West Haven, Connecticut, CT

Bachelor of Computer Science**July 2016 – September 2020**

Potti Sriramulu Chalavadi Mallikarjuna Rao College Of Engineering & Technology, Vijayawada, India
