

JADE COX

FULL STACK DEVELOPER

Alpine, UT, 84004 • +1 480 409 1087 • jadecox.dev@gmail.com • linkedin.com/in/jade-cox-8089a1348

I am a seasoned Full-Stack Developer with over 12 years of hands-on experience in building innovative and scalable software solutions. Throughout my career, I have demonstrated a deep passion for technology and a relentless pursuit of excellence in everything I do.

My technical proficiency encompasses a diverse array of languages and frameworks, including JavaScript (React, Angular, Vue.js, Node.js), Python(Django, Django Rest Framework), and C#(.NET core). Over the years, I've cultivated expertise in various databases, cloud platforms, CI/CD pipelines, and containerization technologies. This broad skill set enables me to navigate the complexities of modern software development, delivering robust and scalable solutions.

I approach each new challenge with a combination of creativity, analytical thinking, and a commitment to continuous learning. Whether it's architecting scalable systems, optimizing performance, or solving intricate technical problems, I take pride in finding elegant and efficient solutions that drive business success and exceed client expectations.

PROFESSIONAL EXPERIENCE

Grid Dynamics | Dallas TX

08/2020 – 01/2025

Senior Software Engineer (Remote)

Spearheaded the development of a complex financial management system and retail platform, enhancing efficiency by 30% through automation of key processes and reducing error rates by 20%.

- Received recognition for outstanding problem-solving skills and innovative solutions, contributing to a 15% increase in client satisfaction scores.
- Utilized React.js to craft a responsive and intuitive front-end, ensuring a consistent user interface across various devices and browsers.
- Wrote unit testing using jest, react testing library, playwright and cypress, increased the test coverage as 90%.
- Identified and addressed the performance bottlenecks, resulting in a 15% increase in overall system efficiency and responsiveness.
- Played a crucial role in upgrading the existing Angular projects to version 13 and involved careful planning and execution to ensure a smooth transition, taking advantage of the new features while minimizing disruption to ongoing development.
- Implemented strategic caching mechanisms, reducing load times by 25% for critical functions and improving overall user experience.
- Implemented agile methodologies, resulting in a 25% increase in project delivery speed and improved adaptability to changing client requirements.
- Implemented Elastic Search for log management, providing real-time insights and facilitating data-driven decision-making.

Skills: React, Angular, Vue.js, Node.js, Python, Express.js, C#, .NET core, Restful API, GraphQL, AWS, GCP, Next.js, Jest, HTML, CSS, SASS, PostgreSQL, Git, Jira

AVOXI | Atlanta, GA

06/2017 – 08/2020

Full Stack Engineer(remote)

Contributed to the success of an enterprise-level SaaS platform, serving over 100k+ users, through valuable contributions to the development and optimization of software solutions.

- Developed and maintained a highly scalable VoIP SaaS platform using React.js for the frontend and Node.js and Golang for the backend.
- Implemented unit testing and integration testing using Cypress, React Testing Library, Jest and Go testing framework, ensuring code quality and reducing production bugs by 20%.
- Utilized Next.js server-side rendering to optimize the performance of the front-end, achieving a 20% reduction in page load times, ensuring swift content delivery and improving SEO rankings by generating responsive pages on the server, resulting in a seamless and responsive user experience.
- Regularly met with the Product team to establish timelines for initiatives.
- Worked with team leads to plan initiatives and help architect services.
- Developed web applications using Node.js and React, including database design and API development.
- Conducted through 200+ code reviews, designed best practices with TypeScript.
- Coached direct reports through development planning and work-life balance problems.

Skills: React, Angular, Vue, Node.js, Python, Golang, GCP, AWS, React Testing Library, Cypress, Elastic Search, PostgreSQL, Jira, Figma

SunPower Innovations | Austin, TX

09/2014 – 06/2017

Full Stack Engineer (Hybrid)

- Led the end-to-end development of complex features and modules for Sunpower's solar energy solutions, collaborating closely with stakeholders and cross-functional teams to define technical requirements, aligning development efforts with the strategic goals of the solar energy division.
- Optimized the initial loading time of proposal details page with migration from React.js to Next.js and used server-side rendering to load everything at once.
- Architect and developed robust, scalable, and maintainable full-stack solutions, using cutting-edge technologies and frameworks like React and Node.js, while adhering to best practices and coding standards.
- Integrated a specialized solar financing API, reducing the solar loan application process by 35% and providing a user-friendly experience for applicants.
- Conducted code reviews and mentor developers to maintain high code quality, ensure adherence to coding guidelines, and foster a culture of continuous learning and improvement.
- Configured CI/CD pipelines using GitHub Actions to automate the build, test, and deployment processes to Google Cloud Run.
- Proactively identified technical challenges and propose innovative solutions to improve application performance, user experience, and overall system reliability.

Skills: React, Next.js, Node.js, Express.js, Tailwind CSS, Github Actions, Google Cloud Platform, Google Cloud Run, Google SQL, Figma, Jira, Agile/Scrum Methodology

Verion | Austin, TX

10/2013 – 08/2014

Software Engineer (on-site)

- Developed high-quality software solutions using industry-standard programming languages and frameworks.
- Engaged with clients to understand their requirements, provide technical insights, and ensure alignment between development efforts and client expectations.
- Pursued continuous learning to stay abreast of industry trends and technologies, enhancing personal and team skillsets.
- Initiated knowledge-sharing sessions, improving team-wide understanding of new technologies and coding practices.

EDUCATION

Texas Tech University

2009 - 2013

Bachelor's degree in Computer Science

PROFESSIONAL SKILLS

Languages: Node.js, C#, .NET Core, Python, Golang, JavaScript, TypeScript, HTML5, GraphQL, SQL, XML, HTML, CSS

CSS & UI Frameworks: Bootstrap, Material UI, Tailwind CSS, Styled Components

Libraries / Frameworks / APIs: React, Redux, Next.js, web3.js, Node.js, Jest, Playwright, C#, .NET, OAuth2, NestJS, Vue.js, Express.js, Svelte, Django, JSON API, RESTful APIs, Stripe API, AWS Amplify, Twilio API, OpenAPI

Platforms: AWS Lambda, Amazon EC2, Amazon Web Services (AWS), Docker, Java EE, Twilio, Agora, Elastic Search

Paradigms: Microservices, Agile, Unit Testing, Automated Testing, Scalable Application, Event-driven Programming, Cross-Platform, DevOps

Databases: MySQL, PostgreSQL, Amazon S3(AWS S3), Redis, MongoDB, Google Firebase, Supabase, MariaDB, Prisma

Version & PM Control: Git, GitHub, Bitbucket, Jira, Asana, Click Up, CI/CD Pipelines

Others: SaaS Development, Product Development, Web Development, Full Stack Development, Front-End Development, Back-End Development, Database Development, Cloud Platform Development, Unit Test
