Professional Summary

Highly-motivated technology leader with a significant progressive experience in Microsoft Technology Full Stack development and having a track record of delivering measurable results. I have a strong background in design and development. I am currently working as a Technical Lead executing fast-paced, complex, and dynamic projects. The key focus areas include Microsoft .Net Technologies, system design, cloud computing, machine learning, web applications development, databases, and process improvement.

Expertise in development, designing and delivering projects in Microsoft .Net Technologies (Full-Stack), Azure, AWS, AI/ML.net primarily for US clients.

TECHNICAL COMPETENCIES & MANAGEMENT PROCESS	CORE STRENGTH & FOCUS AREAS
- Microsoft .Net Full-Stack, Sql Server - Azure Cloud Engineering & operations (SaaS, PaaS, IaaS) - Artificial Intelligence and Machine Learning (AI/ML), ML.net - Strong Experience of ADLC - Database Modelling - Coach Teams - Strong Communication Skills - Project Estimation - Research, Analysis, Feasibility and Risk Mitigation - Focused on technology-driven solutions	- Strong Track Record of Project Deliveries - Believe in Futuristic & Long-Term Solutions - Open to Learn New Tools & Technologies - Customer Focused - Product Design Thinking - Integrity & Commitment - Team building & coaching - Dynamic & adaptable - Collaborative development - Analytical problem-solving
TOOLS & TECHNOLOGIES:	
.Net Framework 1.x, 2.x, 3.x, 4.x, Entity Framework, .Net Core 2.x,3.x,7.x - WCF , AJAX, LINQ , .Net Enterprise Library, Dapper - ASP, ASP.Net, REST Api, GraphQL , MVC - AWS, Azure Cloud, Azure Board, AI/ML.net, Microsoft Cognitive Services - C# , VB.Net, VB 6.0, C++, SQL, PL/SQL, Java, Html - Big Data Ecosystems: Hadoop 2x, MapReduce, HDFS, HBase, Zookeeper, Hive, Pig, Sqoop, Oozie, Flume - Python, PySpark, AirFlow, Kafka - Java SE/EE, Spring Framework (Boot & Cloud), JDK 21, Java 11 - SharePoint, SQL Server Reporting Services, SQL Profiler , Execution Plans, SQL Index Analyser Tools - SQL Server 2000-2016, Oracle10g , Postgres, MS Access, MongoDB, Redis - PyCharm, Eclipse Neon, LINUX (Ubuntu 16.x), JIRA, TFS, Bit-Bucket (Git), Jenkins, Octopus (CICD) - NUnit, Visio (Data Modelling) , Bootstrap (HTML5, CSS, Java Script) - Knowledge of Mainframes (COBOL, CICS, VSAM, JCL, Regions), ETL(SSIS) - Code Smith, Axure (Wireframes), VSS, Jenkins, Subversion - Methodologies Agile, Iterative and Waterfall. Primarily worked in agile.	

Key Certifications & Training

- ✓ MCPD-EA Microsoft Certified Enterprise Architect
- ✓ AWS Cloud Architect
- ✓ Big Data Hadoop
- ✓ C#, Python, PySpark

Employment	Duration	Role
Peer Consulting Inc	Jan 2024 - Till date	Senior Technical Lead
Coforge Limited	Apr 2014 - Dec 223	Senior Solution Architect
Coforge Limited	Nov 2010 - Mar 2014	Technology Consultant
Fareportal CheapOair.com	Mar 2010 - Nov 2010	Technology Leader
Kynetix Technologies Ltd UK	Jun 2008 - Feb 2010	Software Developer
Accenture India	Sep 2006 - Jun 2008	Senior Software Engineer
NIIT Technologies Ltd	Oct 2003 - Sep 2006	Systems Analyst
GTL-PA	Oct 2002 - Oct 2003	Software Engineer
Infotech Global India	Dec 2000 - Oct 2002	Trainee Engineer, Programmer

Summary Of Projects and Responsibilities

Peer Consulting Inc (USA) since Jan 2024 till date

Senior Technical Lead:

- **Driving and leading the Overall Solution, Design, hand-on Development, Delivery, and Support.**
- **Worked collaboratively with Technology, Design and Products teams from conceptualization, live & to maintenance.**
- Led the changing cohort for Design and Development aligned with solutions and requirements.
- Provide technical leadership and Coaching to the Squad for project deliveries by reviews. Ensuring deliverables are per the expectation of overall requirements.
- Effectively managed communication between all stakeholders to ensure smooth operations.
- Provided technical leadership for any new initiatives.

Recent Projects:

- **Intelligent Document Extraction and Management System** for a USA-Client investment Company.
Solution Design, Development, and Delivery using Azure, .Net Core, AI/ML.Net, SharePoint, Lex-NLP Python Library, Azure Cognitive Search
- ✓ **Project Overview:**
The problem statement was to intelligently extract the sentences from trade compliance documents. The idea was to get the text extracted based on pre-defined data fed to create a base model. Then the extracted data was reviewed by analysts and fed back to the model at a pre-defined interval to create a trained model using model builder for further processing.
- ✓ **App Services:**
Deployed and managed multiple websites on Azure App Services, ensuring optimal performance and scalability.
Implemented continuous integration and deployment pipelines for seamless application updates.
- ✓ **Azure Cognitive Services:**
Integrated Computer Vision and Form recognition services into applications, enhancing image processing and data extraction Azure capabilities. Collaborated with cross-functional teams to develop innovative solutions leveraging Azure Cognitive Services.
- ✓ **Application Insight:**
Implemented Application Insight for detailed logging, monitoring, and troubleshooting, improving application reliability.
- ✓ **Azure Functions:**
Developed and deployed background processes using Azure Functions, automating critical tasks and improving overall system efficiency.
- ✓ **Graph API for SharePoint:**
Utilized Graph API for SharePoint operations, streamlining collaboration and data management processes.
Implemented secure and efficient data transfer between applications and SharePoint.
- ✓ **AI / ML with ML.Net Model Based:**
Applied ML.Net for Degenerative ML, contributing to predictive analytics and data-driven decision-making.
Collaborated with data scientists to integrate machine learning
- ✓ **Azure DevOps (Azure Board):**
Utilized Azure Board for version control and streamlined deployment processes, ensuring efficient and organized development Agile workflows.

Coforge Limited (USA) since Nov 2010 to Dec 2023 as Senior Solution Architect:

- **Business Operational Efficiency and CDP (Customer Data Platform) Projects** for a USA-based Wealth Management Company.
Solution Design, Development, and Delivery using MVC, .Net Core, SharePoint, SQL Server
- ✓ **Project Overview:**
This initiative aims to optimize operational efficiency and also ingesting customer data like email, Social media, Loyalty, ERP, CRM from multiple platforms through APIs and providing a single view to Marketing Department, by .NET-based web based solutions, incorporating robust features and functionalities to streamline business processes.
Key Components:
- ✓ **Automation of Repetitive Tasks:**
Identify and automate routine and repetitive tasks using ASP.NET-based applications to reduce manual effort and minimize errors in day-to-day operations.
- ✓ **Integration with Enterprise Systems:**
Utilize ASP.NET Web API to seamlessly integrate the .NET web application with existing enterprise systems, ensuring real-time data exchange and cohesiveness across different departments.
- ✓ **Responsive User Interface:**
Implement a responsive and user-friendly interface using ASP.NET MVC, ensuring accessibility across various devices, and enhancing user experience for operational staff.
- ✓ **Data Visualization and Reporting:**

Leverage ASP.NET and Telerik reporting tools to create intuitive dashboards and reports, providing management with actionable insights for decision-making.

✓ **Role-Based Access Control (RBAC):**

Implement a robust security model using ASP.NET Identity, ensuring role-based access control to sensitive operational data and functionalities.

✓ **Workflow Automation:**

Develop workflow automation modules using Windows Workflow Foundation (WF) to streamline complex business processes, reducing turnaround time and enhancing operational agility.

✓ **Scalability and Performance Optimization:**

Utilize caching mechanisms, asynchronous programming, and load balancing techniques in ASP.NET to optimize the application's performance, ensuring scalability as operational demands grow.

✓ **Error Tracking and Logging:**

Implement Application Insights for real-time monitoring, error tracking, and logging, facilitating quick identification and resolution of operational issues.

✓ **Benefits:**

✓ **Increased Efficiency:**

The automation of repetitive tasks and optimized workflows leads to a significant reduction in manual effort, minimizing the likelihood of errors and improving overall efficiency.

✓ **Enhanced Collaboration:**

Integration with enterprise systems and implementing role-based access control foster seamless collaboration among different departments, ensuring data consistency and accuracy.

✓ **Data-Driven Decision Making:**

Incorporating data visualization tools empowers decision-makers with clear, actionable insights, facilitating informed and strategic decision-making.

✓ **Improved Security and Compliance:**

Robust security measures, including RBAC and comprehensive error tracking, provide a secure operational environment, ensuring industry standards and regulations compliance.

✓ **Adaptability to Growth:**

The scalable architecture of the .NET web application allows for seamless adaptation to the growing operational needs of the organization.

Fareportal (cheapoair.com) USA - Technology Lead Mar 2010 - Nov 2010

- As a Technology Lead, Leading a team of Developers for the development of New Features of cheapoair.com
 - Developed Legacy program of ClubMiles.com for Fareportal end customers
 - Implemented 3-tier Architecture independently for the entire web application.
- Technology Set: Asp.net, C#, WCF, HTML, SQL Server,

Kynetix Technologies UK Client London Metal Exchange – Software Developer, London, Jun 2008 - Mar 2010

- Worked as an onsite developer for LMESword.com application for the London Metal Exchange in London City
 - Designed and Developed the Seller/Buyer workflow for the registered customers, Role Based on Access Control by using Asp.net Membership
 - Worked on the continuous Integration and Deployment using Cruise Control
 - Test Driven Development
 - Developed Reports using SSRS. Role-based Rapid Report Development was done for Business Users.
- Technology Set: Asp.net, C#, HTML, SQL Server, SSRS

Accenture Services India - As Senior Software Engineer India /Gurugram Sep 2006 - Jun 2008

- Had taken over the banking application suits for GE-Money Sweden, for Development and Maintenance
 - Solved Complex application deployment, configuration, and execution with diverse technology set
 - Trained and Mentored team with the application domain and technical knowledge
- Technology Set: Asp.net, C#, VB.Net, HTML, SQL Server, EPiServer, BizTalk

NIIT Technologies Limited -As Senior Software Engineer USA Oct 2003 - Sep 2006

- As a Systems Analyst I worked for the Wealth Management Project for their Retirement Benefit Payroll System
 - Worked on the migration project from VB 6.0 to Asp.net
 - I got an opportunity to go onsite on an H1B assignment and I worked as an onsite coordinator for that project.
- Technology Set: Asp, VBScript, Mainframe AS400, Asp.net, SQL Server 2000

GTL-PA India - As Programmer Oct 2002 - Oct 2003

- Worked on Citigroup project using .net with a team of 4

- My primary responsibility was to build the User Interface and User Access Control System
Technology Set: Asp.net, SQL Server 2000

Infotech Global India, Delhi - As Systems Analyst at Dec 2000 - Oct 2002

- Here I worked as a Trainee and was eventually promoted to a .net programmer.
- I used to train my teammates as well since lots of new tools and technologies were coming in the industry
- This was the best organization for my career for learning and sharing knowledge
- We worked on a Database Resources Utilization project for Mckinsey Consulting
Technology Set: VB 6.0, Forms, Reports, SQL Server 2000

Education:

- ✓ **Bachelor of Engineering in Computer Science**
From Maharishi Dayanand University, Rohtak Haryana

Residency Status:

- ✓ **Visa : Valid H1B with Approved I-140**
- ✓ **Location: California USA**
