

PROFESSIONAL SUMMARY:

- Senior Software Engineer with 5 years of experience in enterprise application development, focusing on scalable C# and ASP.NET solutions.
- Proficient in architecting and deploying Microservices and RESTful APIs leveraging modern .NET and ASP.NET Core frameworks.
- Expertise in developing robust data layers with SQL Server, including complex stored procedures, SSDT, and performance tuning.
- Extensive experience with cloud-native development and deployment on Microsoft Azure, utilizing services for scalability and reliability.
- Skilled in containerization technologies like Docker and orchestration with Kubernetes for efficient application deployment.
- Implemented real-time data processing and messaging solutions using Kafka and Azure's streaming ingestion capabilities.
- Adept at establishing and optimizing CI/CD pipelines using GitHub Actions and Azure DevOps for automated deployments.
- Strong command of .NET Framework 4.x and modern .NET 5+ for building high-performance, maintainable applications on Windows platforms.
- Proven ability to modernize legacy applications and lead teams in Agile environments to deliver high-quality software solutions.

EDUCATION:

Master of Science in Computer Science @ Kennesaw State University

WORK EXPERIENCE:

Senior Software Engineer @ Cigna | Bloomfield, CT Feb 2026 – Present

- Developed enterprise healthcare applications using ASP.NET Core and Microservices Architecture deployed on Azure.
- Designed and implemented secure RESTful APIs for member enrollment, leveraging modern C# and Web API.
- Built dynamic and responsive front-end components using Angular and integrated them with ASP.NET Core services.
- Utilized Entity Framework Core with SQL Server for managing critical healthcare data repositories and ensuring performance.
- Integrated Kafka messaging services for asynchronous communication across distributed systems, enhancing data flow efficiency.
- Configured Azure services and Docker containers for scalable application deployment and management within Kubernetes clusters.
- Implemented application security using OAuth2 authentication mechanisms within the .NET ecosystem for robust protection.
- Managed CI/CD pipelines using Azure DevOps, ensuring automated and efficient software delivery processes.
- Improved application performance and reliability through proactive monitoring and logging strategies in Azure.

Technologies Used: C#, ASP.NET Core, Microservices, Angular, Entity Framework Core, SQL Server, Kafka, Azure, Docker, Kubernetes, Azure DevOps, RESTful APIs, OAuth2, Unit Testing

Software Development Engineer @ Visa | Foster City, CA Aug 2022 – Nov 2024

- Architected and developed scalable Microservices using ASP.NET Core to support high-volume payment transaction processing platforms.
- Implemented secure RESTful APIs for merchant onboarding, leveraging modern C# and Web API standards.
- Designed reusable persistence layers using Entity Framework Core and SQL Server, optimizing data access efficiency and reliability.
- Developed responsive user interfaces and integrated them seamlessly with ASP.NET Core backend microservices.
- Configured Azure services, including Kubernetes for orchestrating containerized Docker applications effectively.
- Implemented authentication and authorization using OAuth2 and JWT security standards within the .NET framework.

- Integrated Kafka event streams for real-time transaction processing and notification workflows deployed on Azure.
- Automated CI/CD pipelines using GitHub Actions for streamlined deployment processes and quality assurance.
- Collaborated with Agile teams using Azure DevOps to deliver sprint-based releases, ensuring timely project completion.

Technologies Used: C#, ASP.NET Core, Microservices, Entity Framework Core, SQL Server, Kafka, Azure, Docker, Kubernetes, GitHub Actions, RESTful APIs, OAuth2, Unit Testing

Junior Software Engineer @ Big Lots | Columbus, OH

Feb 2020 – Jul 2022

- Developed and maintained retail management applications utilizing ASP.NET MVC architecture on .NET Framework 4.x.
- Implemented RESTful APIs using Web API to support inventory management and order processing workflows.
- Built interactive web pages using AngularJS, HTML5, CSS3, JavaScript, and Bootstrap for enhanced user experience.
- Developed robust database access components using Entity Framework 6 with SQL Server for data persistence.
- Created reusable service modules for inventory tracking and warehouse operations, improving system modularity.
- Processed JSON data exchanged between frontend and backend systems, ensuring smooth data flow.
- Developed unit test cases for ASP.NET components, contributing to application quality and stability.
- Worked closely with business stakeholders to translate retail requirements into effective technical solutions.
- Managed source code repositories and release activities, contributing to continuous improvement initiatives.

Technologies Used: C#, ASP.NET MVC, .NET Framework 4.x, AngularJS, HTML5, CSS3, JavaScript, Bootstrap, Entity Framework 6, SQL Server, Web API, RESTful APIs, JSON, Unit Testing

TECHNICAL SKILLS:

- **Programming Languages:** C#, SQL, PowerShell, JavaScript
- **Frameworks & Libraries:** ASP.NET Core, ASP.NET MVC, Entity Framework Core, Entity Framework 6, Web API, .NET Framework 4.x
- **Cloud Platforms:** Microsoft Azure (Event Hubs, Azure Data Explorer, Azure Service Bus), Azure DevOps
- **Databases:** SQL Server (SSDT)
- **Containerization & Orchestration:** Docker, Kubernetes
- **Messaging & Streaming:** Kafka
- **CI/CD & Version Control:** GitHub Actions, Git
- **Frontend:** Angular, HTML5, CSS3, Bootstrap
- **Tools & Methodologies:** RESTful APIs, OAuth2, Performance Tuning, Agile, Unit Testing
