

Jamal Martin

Senior Software Engineer | Backend Java Developer

Provo, Utah · <https://www.linkedin.com/in/devjamlmartin/> · martinjamal092@gmail.com · +1 231 930 4311

PROFESSIONAL EXPERIENCE

GENPACT

Oak Park (Remote)

Senior Java Developer

Aug 2021 – Present

- Developed microservices with clean code principles and extensive documentation and Integration Tests for 70% of the source code, enhancing code quality and reliability.
- Designed a Payment Gateway with high throughput and availability. Reduced production bugs by 40% using Integration Tests.
- Streamlined the income settlement from the bank account by automating manual work, resulting in a 30% increase in the operation team's productivity.
- Automated document generation for microservices during project compilation, 100% obliterating manual documentation for APIs.

Skills: Project Leading, Java 17, Kotlin, Spring Boot, JPA, SQL, PostgreSQL, CockroachDB, Redis, NATS, Hazelcast, Solr, Microservices, CI/CD, Git, GitLab, GitHub, SCRUM, gRPC, Docker, IntelliJ

WESTERN DIGITAL

San Francisco (Remote)

Java Engineer

Oct 2015 - Jul 2021

- Reduced an ETL and BI app's data loading phase duration by approximately 80% by developing a new data loader for Elasticsearch using Cassandra, Kafka, and Spring Boot.
- Improved the searching API performance by approximately 100% by Crafting a new Graph Database using JanusGraph, Elasticsearch, and Cassandra.
- Load-tested the existing and new apps using Gatling. Optimized the 3 main APIs of the existing app.

Skills: Java, Kotlin, Microservices, Kafka, ELK, Spring Boot, Spring Framework, Hibernate, Cassandra, DevOps, Ansible, Git, Docker, IntelliJ

TATA CONSULTANCY SERVICES

San Francisco (Hybrid)

Full Stack Developer

Mar 2012 – Oct 2015

- Automated the calculation and payment of property and real estate taxes by 100% by implementing a Tax Management System, streamlining the tax calculation and payment process.
- Reduced employees' waste times by 30% by developing a Time-Salary Management System.
- Decreased the fraud risk of exporting, importing, and transiting in Customs by approximately 40% by crafting a Signature-Based Fraud Detection Framework named Rule Manager.
- Generated ad-hoc reports automatically by implementing a Report Framework using Java, Wicket, and Hibernate. Improved the new reports development speed in the Customs apps by approximately 300%.

Skills: Java, Javascript, AngularJs, Spring Boot, Spring Framework, Hibernate, PostgreSQL, MySQL, Microservices, Highcharts, jQuery, Jira, Git, Bitbucket, IntelliJ

EDUCATION

UPPSALA UNIVERSITY

Sweden

Bachelor's Degree in Software Engineering

2008-2011

ADDITIONAL INFORMATION

- Other Non-Backend Technical Skills:
 - Frontend: JavaScript, Typescript, Angular, jQuery, React, HTML 5, CSS (3 years)
 - DevOps: SDLC, CI/CD, Maven, Docker, Ansible, Jenkins, Bitbucket Pipelines, Gitlab (5 years)
 - Microservices: API Gateway, Distributed Systems, SOAP, REST API, gRPC, JSON (5 years)
 - Design: MVC, TDD, Software Design Patterns, Object-Oriented Design, Service Oriented Architecture (9 years)
