

Javier Jimenez

Software Engineer/Full Stack Developer

PROFESSIONAL EXPERIENCE

Code the Dream Labs

Development Shop –Durham, NC

Software Engineer / Full Stack Software Developer

March 2021- April 2024

Technologies Used: Ruby on Rails, MVC, RSpec, JavaScript, HTML, CSS, SQL, Bootstrap, RESTful API, PostgreSQL, Git, GitHub, Docker, DigitalOcean, Jira

- Contributed to the front end and back end of the Aggregate Analysis of ClinicalTrials.gov (AACT) project, a Ruby on Rails application.
- Improved the application by creating the Saved Query System. This feature allows users to run SQL queries directly on the browser to access the AACT Postgres database, instead of installing standard query & analytic tools. It also gives users the option to save their SQL queries and make them public to share with other users.
- Created the Query Background Jobs to process user queries more efficiently. Query submissions were placed in a background queue to improve server availability and response times by 50%.
- Deployed using Docker to DigitalOcean Droplets. Utilized Git and GitHub source control and collaborated daily with 4 co-workers implementing the Agile Methodology development process.

Spaulding Apartments – Los Angeles, CA

Owner and Property Manager

July 2004 – July 2021

- Managed 4 residential apartment units and ran day-to-day operations. Renovated and increased rental income by over 350%.
- Led landscaping, construction, electrical and plumbing projects for all improvements and repairs. Cut repair labor costs by 50%.
- Collected rents per Los Angeles City Housing Department guidelines.

BAE Systems, Platform Solutions – Los Angeles, CA

Senior Software Design Engineer

May 1997 – June 2004

Technologies Used: C, C++, ADA, MS Visual C/C++, AdaMulti

- Project lead for a team of 5 software engineers that coded real-time software using ADA on the Comanche EMD project.
- Developed automated module tests that used C language models of the ADA code to verify the software functionality and code coverage of the software requirements specification.
- Project lead for a team of 4 software engineers that designed, coded, and tested the Fuel Quantity Gauging System (FQGS) software for the H1 and AB139 helicopters. Tested and integrated AB139 FQGS software at Aerazur company in Rouen, France.
- Wrote and released the FQGS documents “Software Safety of Flight” and the “Software Requirements Specification”. Supported the Software Quality Assurance department and maintained the software releases and development files.

EDUCATION

University Of California

– Berkeley, CA

Bachelor of Science

Electrical Engineering and Computer Science

Code the Dream Software Development Coding School

- Durham, NC

Certificate

React.js Front End Development

September 2023 - February 2024

Certificate

Node.js Back End Development

June 2022 - October 2022

Certificate

Ruby on Rails Back End

Development

March 2021 - July 2021

Code Tenderloin Software Development Coding School

– San Francisco, CA

Certificate

*JavaScript Algorithms
& Data Structures*

March 2020 - October 2020

PROJECTS

Aggregate Analysis of ClinicalTrials.gov ([AACT](#))

Ruby on Rails Application

GitHub: [aact-core](#) & [aact-admin](#)

March 2021 - PRESENT

- Web application that contains all information about every study registered in ClinicalTrials.gov.
- Built with Ruby on Rails, PostgreSQL database, DigitalOcean and Docker deployment.

Jobs Application Programming Interface

Node.js and Express API

GitHub: [o6-jobs-api](#)

October 2022

- Jobs API used to track users, employment applications and status.
- Built with a Node.js and Express back end, MongoDB database and Heroku deployment.

Community Landscaping Service

Ruby on Rails Application

GitHub: [Community-Landscaping-Service](#)

July 2021

- Web application used to help senior citizens post landscaping jobs and allow teenage students to apply to the jobs.
- Built with Ruby on Rails and MySQL database.

RELATED ACTIVITIES

Code the Dream

Ruby on Rails Mentor

June 2021- PRESENT

- Mentored 12 students from all over the US via Zoom and Slack. Students were from underserved communities that included people from immigrant backgrounds and people of color.
- Reinforced the fundamentals and best practices when working with Ruby on Rails, Node.js, Express, React.js and Agile Methodology.

SKILLS

Front End:

JavaScript, React.js, Bootstrap, jQuery, HTML, CSS

Back End:

Ruby, Rails, RSpec, SQL, MySQL, PostgreSQL, Node.js, Express, Postman, Mongoose, MongoDB

Other:

RESTful API, MVC Architecture, Git, GitHub, Docker, Jira, Agile Methodology

HONORS and AWARDS

BAE Systems:

Integrated AB139 FQGS Software at Aerazur Company

Rouen, France

2003

BAE Systems:

VITAL Team 3rd Quarter FY '99
Outstanding Achieving Team

Santa Monica, CA

1999

Society of Hispanic

Professional Engineers:

NTCC Academic Olympiad
National Champion

Seattle, WA
