

JESSE ALAN WOOD

Senior Software Engineer

MELBOURNE, FL | 321-312-0011 | jesse.alan.wood29@gmail.com

<https://www.linkedin.com/in/jesse-a-wood-888b5934a>

Summary

Senior Software Engineer with over 7 years of experience building high-performance, scalable solutions for top-tier clients. Specialize in designing microservices with Spring Boot and integrating streaming technologies like Apache Kafka and Samza for efficient real-time data processing. Expert in optimizing CI/CD pipelines using Jenkins and Docker, enabling rapid and seamless deployments. Proficient in leveraging AWS to create scalable, high-availability infrastructures. A skilled mentor and leader, fostering collaboration and excellence within remote development teams. Passionate about delivering secure, efficient applications that drive innovation and meet the highest industry standards.

Experience

Senior Software Engineer — FIS

June 2021 – December 2024 *Jacksonville, FL*

- Developed a secure transaction validation microservice using Java Spring Boot and integrated with Apache Kafka to stream transaction data for real-time fraud detection.
- Devised caching strategies alongside efficient RESTful API structures, reducing transaction cycles by over 40 seconds and enabling instant access to critical functionalities.
- Crafted responsive web interface components using Angular 14, accelerating the development process and ensuring optimal site performance across various devices.
- Designed and implemented a Samza-based stream processing system to handle high-throughput data from banking APIs, enabling robust error handling and smooth integration with downstream services.
- Migrated legacy monolithic systems to microservices, leveraging Kafka for asynchronous communication between services, reducing deployment times by 14% and improving flexibility and maintainability.
- Architected cloud solutions leveraging AWS (EC2, S3, RDS, Lambda) to secure 99.9% uptime and automated resource scaling using Terraform.
- Orchestrated CI/CD pipelines via Jenkins and Docker, expediting deployments by 35% while mitigating release-related risks.
- Guided a remote team of 3 developers, conducting structured peer reviews and pair programming to enhance collaboration and reduce bugs by 20%.
- Refined SQL query designs and implemented advanced indexing, improving data access times by 24% while reducing server loads.

Senior Full Stack Developer — *TechWave*

July 2017 – April 2021 *Houston, TX*

- Developed a product recommendation engine using Java Spring Boot, integrating Apache Kafka to process large-scale event data from customer interactions in real time, increasing personalized recommendation accuracy by 12%.
- Optimized SQL queries and indexing in MySQL and Kafka-based message queues for reliable event delivery and fault tolerance, reducing response times for recommendations by 24% during peak traffic.
- Integrated Apache Samza for stream processing of recommendation data, enabling faster decision-making and real-time updates to recommendation models.
- Built robust RESTful APIs to seamlessly connect back-end microservices with Angular front-end layers, enhancing data handling efficiency by 25%.
- Deployed cloud-based solutions on AWS, utilizing EC2 for computation and S3 for data storage, ensuring uninterrupted performance during traffic surges.
- Strengthened system security by introducing JWT and OAuth 2.0 frameworks, safeguarding sensitive data while maintaining compliance with regulatory standards.
- Established automated testing and deployment pipelines through Jenkins and Docker, cutting release times by 28% and bolstering feature rollout reliability.
- Facilitated cross-functional collaboration to drive adoption of Agile workflows, which accelerated project delivery timelines by 17%.
- Pioneered innovative data management strategies, ensuring optimal server utilization and sustained high availability across the platform.

Java Full Stack Developer — *BlueWave*

July 2014 – May 2017 *Boston, MA*

- Developed a customer feedback module using Java Spring MVC and AngularJS, which interfaced with Kafka to process feedback data in real time, improving system performance by 15% and user satisfaction scores by 10%.
- Integrated third-party payment gateways to extend application functionality, increasing versatility by 24% and improving transaction success rates.
- Optimized PostgreSQL queries for customer data, reducing query execution time by 12% and improving data retrieval accuracy.
- Led the adoption of Test-Driven Development (TDD) practices, decreasing bug rates by 32% and increasing code reliability.
- Enhanced front-end performance using **SCSS**, reducing load times by **20%**, which improved the overall user experience.
- Conducted performance tuning and optimization, reducing server load by 30% and enhancing system responsiveness.
- Collaborated with UX/UI teams to redesign the application interface, improving user engagement and reducing bounce rates by 23%.

- Developed advanced reporting tools that saved 40 hours per month in manual reporting, allowing teams to focus on strategic initiatives.
- Implemented Agile methodologies, streamlining project workflows and improving team efficiency by 30%.
- Provided technical support and troubleshooting, maintaining 99% application uptime and resolving issues promptly.

Education

Bachelor's Degree in Computer Science

Florida International University (FIU) — *Miami, FL*

September 2010 - May 2014

Skills

Languages: Java, JavaScript, Python, TypeScript, HTML5, CSS3

Backend: Spring Boot, Spring MVC, Express.js, Hibernate, Flask, FastAPI

Frontend: Angular, React, Vue.js, jQuery, Bootstrap

APIs: RESTful APIs, GraphQL, Microservices, SOAP

Databases: MongoDB, MySQL, PostgreSQL, Redis, Oracle, DynamoDB

Cloud: AWS (S3, RDS, EC2, CloudFormation), Azure

DevOps: Git, Jenkins, Docker, Kubernetes, Maven, JIRA

Testing: JUnit, Selenium, TestNG, Postman, Cypress

Other: Apache Kafka, Samza, Microservices Architecture, TDD, Agile/Scrum, Elasticsearch, WebSockets

Certifications

- Oracle Certified Professional, Java SE 8 Programmer
- AWS Certified Developer – Associate
- Certified Scrum Master
- Microsoft Certified: Azure Developer Associate
- Certified Kubernetes Application Developer (CKAD)
