PROFESSIONAL EXPERIENCE

CONTPAQi – SLA 2 (4yrs) / Software Engineer (3 yrs)

November 2013 – April 2021

Guadalajara, Jalisco, México

- Attention to general requirements of internal company applications, generation of reports, and analysis of information from SQL databases.
- Monitoring of services and application resources on servers.
- Maintenance and implementation of changes in web applications for internal use (collaborators) and distributor portals.
- Report updating with the Jaspersoft reporting tool.

Database activities:

- Creation and execution of scripts to deal with queries, problems, and application errors from internal and end users.
- Preparing reports and results with scripts.
- Modification of views, stored procedures, information updating, data analysis, jobs and log monitoring, and process improvement.
- implementation of executables and console applications in C# for occasional or recurring tasks in SQL jobs.
- Management at the administrative level of the telephone switch, registration of users, configuration of service lines, and modification of agents in call queues.
- Implementation, maintenance, design, and testing of web APIs in C# and .Net Core languages for Licensing services, product activation, and protection, as well as product websites in the cloud.
- Collaboration with development teams using the SCRUM methodology.
- Publish artifacts, task, and user stories, change deployment, and releases in Team Foundation Server (TFS) and Azure DevOps platforms.
- Use of TFS and Git as version control systems in applications.

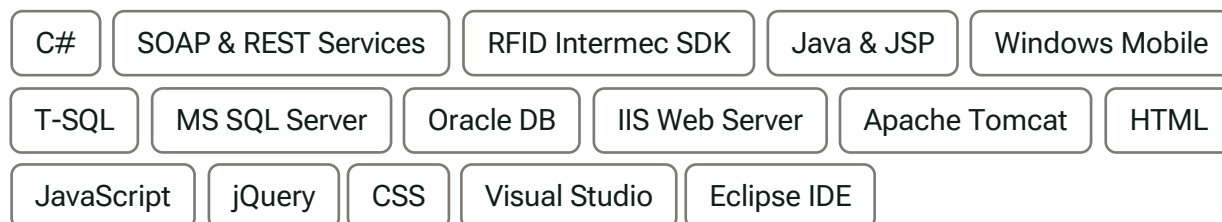

.NET	ASP.NET APIs	JavaScript	JQuery	JSON	HTML	CSS	Postman
Xunit	EF Core	Moq 4	OpenAPI Swagger	Jaspersoft	SQL Server	SCRUM	
Bootstrap	Git	TFS	Azure DevOps	T-SQL	SOLID design	Visual Studio	
LINQ	SQL Server Management Studio	Power BI					

Solutia Intelligence – Software Engineer

 August 2011 – July 2013

Guadalajara, Jalisco, México

- Design, implementation and testing of custom solutions in C# and Java integrating RFID (radio frequency) and barcode technologies.
- SQL Server database creation and maintenance, and Oracle database management.
- Development and implementation of solutions for Intermec mobile devices (currently Honeywell), console, and desktop applications in C#.
- Maintenance and update for services, management systems, and asset administration, working with Java, JSP, and Apache Tomcat.
- Installation, adjustment, and service configuration of MS-SQL Server, IIS, and Apache Tomcat.

CECOBAN – Digitization Assistant

 January 2009 – July 2009

Guadalajara, Jalisco, México

- Assistance in the process of receiving and digitizing checks from foreign bank branches.
- Use of encryption software for management and backup.
- Attend requests for tracking or reprocessing digital documents and preparing reports in Excel.

EXPERIENCE NOT FOCUSED ON THE IT FIELD

Jireh Packing Company – Bagging Operator
