Work Experience

QA Engineer Lead at Elate | March 2025 – Present

Led the initiative to build and formalize a QA department for a company specializing in productivity and financial services software. Integrated QA processes into the existing development workflow, built a centralized knowledge hub and created comprehensive QA documentation, applying best practices to ensure high-quality testing standards. Built a new automation framework from the ground up and implemented unit tests, widget tests, and integration tests for Flutter applications. Provided leadership and mentorship to team members on QA strategies and tasks.

Top skills: Flutter, Dart, Go, Playwright, JavaScript, Bruno, Linear, Google Suite, CI/CD, Leadership.

QA Automation Engineer at DealerBuilt | June 2022 – Dec 2024

Performing manual and automated testing for the Dealer Management System software at iService/DealerBuilt, ensuring seamless dealership-customer interactions through both web and mobile apps. Skilled in Playwright automation, E2E, regression and integration testing, with expertise in bug tracking, feature verification, and documentation. Focused on delivering high-quality, reliable software through rigorous testing and automation.

Top skills: Playwright, JavaScript, TypeScript, React, Web Services, Jira, Confluence, End-to-end, UAT, Unit tests, Bug reporting & tracking, Test case management, Slack, GIT, Postman, Swagger, VS Code, Docker, Vercel, Scrum, Agile.

QA Automation Engineer at Audere | Jan 2022 – June 2022

Testing multiple mobile and web apps leveraging Computer Vision AI to analyze Rapid Diagnostic Tests (RDTs) via device cameras. Skilled in mobile app testing, AI accuracy validation, and bug reporting. Focused on ensuring AI reliability through adversarial testing, data analysis, and detailed documentation for improved performance.

Top skills: AI, Python, Selenium, Java, Appium, TestRail, ADA, Firebase, Data Analysis, GIT, Google Suite, AWS, S3, CircleCI.

App Developer at VECA Electrics and Technologies | May 2017 – Sep 2021

Designing and developing front-end and back-end systems using REACT and SQL Server to build essential business applications. Created and maintained timecard, payroll, work order and requisition apps used daily by 500+ field electricians and supporting staff, improving workflow efficiency. Taking part in project management, team leadership, user training and error handling to ensure seamless app functionality and data integrity.

Top skills: SQL, Stored Procedures, Building Queries, ETL, Back-end Optimization, Data Warehouse, React, JS, jQuery, C#, APIs, SSIS, SSRS, BI Dashboards, MS Teams, Office Suite, Canva, Trello, SCCM, Active Directory, Project Management.

Education

Green River College | 2012–2016

Bachelor of Applied Science in Computer Science

Certified Scrum Master | 2019

Certified Scrum Master from Scrum Alliance

Achievement

Top Rated Plus Freelancer on Upwork | 2022 – Present

Ranking in the top 3% of all Upwork talent. I have 100% job success rate with over 40 different projects totaling over 5500 hours billed through my own freelancing service. I offer my skills and experience in software development and QA/Automation to clients and help them build their projects and guiding them to the finish line.
