

Maalik Jones

Cloud System Administrator

Current Security+, 4 Years Managing Air Force, DoD Infrastructure, Top Secret/SCI Clearance: 4 years managing National, Air Force, and DoD environments with Top Secret Clearance including web security, help desk, data center, troubleshooting and repeatedly resolving critical issues, mitigating risk, and preventing loss of network access. Coordinates and implements SLAs and MOUs with user agencies such as Air Force, Army, and DIA.

Experience Related to the Information Technology Life Cycle: Experience with the information technology life cycle including Systems development life cycle (SDLC), Information technology system operation, building, installing, configuring, repairing hardware, as well as Information Assurance operations.

Implements Web Security: Uses and implements web security tools such as Public Key Infrastructure (PKI), Single Sign-on (user ID/password), as well as defines requirements and policies for the use of passwords and UserIDs.

Troubleshoots, Configures 83+ Computer Systems, and Programs: Troubleshoots, configures 83+ computer systems, monitor issues, programs such as Microsoft outlook, MacAfee, graphics drivers and cabling for the computer, HDDs to see if they need to be replaced and re-imaged.

Manages Help Desk Customer Service: Manages Help Desk customer service for 43 personnel, handling or processing tickets or tasks for customers, such as Officers or enlisted, in the Vault which included communicating via email, messaging systems, telephone, assigning 75 Remedy trouble tickets monthly, resourcing staff, as well as briefing and training customers.

Currently employed taking calls over multiple Networks for Customers JWICS, NIPR, SIPR, and takes around 20-30 calls a day.

Data Center Experience: Experience working in a data center and performing system resource management including load balance, system-wide backups, patching, capacity planning, network, system troubleshooting, as well as writing related standard operating procedures (SOPs).

Core Business Analysis skills: Requirements gathering, Documentation, use case documentation, Business Modeling, Design, Writing Test Plans, Test Scripts, Facilitating JAD Sessions, and End-User Training

Technical Proficiencies: Microsoft Office 365, SharePoint, Remedy, McAfee, Service Now, Active directory, Active roles web service, Microsoft Exchange, Printers, Print Servers, PKI's, Windows 7/10/Server 2016 & 2019, DEPO, SCSM, RHEL 7 RHEL 8 Linux, AWS, PuTTY, NIFI, STIG Viewer, AWS CLI

Certifications: CompTIA Security + Certification Renewed (2017-2027); Agile Methodology Certification (2020)

Security Clearance: Top Secret TS / SCI CI polygraph since (2020)

Citizenship: United States

WORK EXPERIENCE

Cloud System Administrator | Highlight Technologies (Contract)

10/2023 - Present

- Provides backend support for MASS through AWS by monitoring to make sure data feeds are still working and updating the website when needed. Patching windows servers as well as RHEL servers monthly. Making sure data feeds to websites monitored continue to function through NIPR and SIPR and if site ends up going down able to reboot instance through AWS.

- Runs and monitors STIGs for windows and RHEL monthly to stay compliant and clears out any critical or high issues on servers.
- Able to troubleshoot issues on RHEL servers and able to move files between AWS S3 and RHEL using AWS CLI.
- Checks to make sure data feeds are still running through NIFI on NIPR and SIPR.
- Uses Putty to manage RHEL 7-8 server instances created by AWS
- Assisted with SIPR ATO and was lead on NIPR ATO for RHEL 7 & 8 on completing STIGS and updating IA along with providing CKL Files.
- Remediated over 100 STIGS across three different Linux Servers

Cloud Help Desk Technician | Highlight Technologies (Contract)

11/28/2022-10/2023

- Provided support for customers on MASS through remedy ticketing system and answering questions regarding MASS and assigning permissions through keycloak so users can gain access MASS. Unlocking users accounts and providing users with the ability to password reset their accounts if they lost access MASS
- Knowledge of active directory security groups to assign roles for users gaining access to MASS IQ
- Checking that account request forms for access are done correctly for users trying to gain access to MASS and keeping them updated on the status of their account access by updating them through remedy.
- Assigning roles through keycloak after forms have been approved
- Weekly closed out multiple tickets around 3-5 and monitored multiple tickets from different users daily through remedy.
- Ability to navigate remedy ticketing system along with monitoring tickets, closing tickets, and assigning tickets to myself to keep ticket queue small and closing tickets in a timely manner.
- Ability to use Remedy, Active directory, and Keycloak.

Deskside Support Tier 2 | Teksystems (Contract)

04/15/2022-DEC 2022

- Provides first contact and incident resolution to customers with hardware, software, and application problems. includes both customer telephone support as well as electronically submitted requests
- Provides polite and friendly customer service
- Attempt to resolve as many incidents as possible during the first contact, or at tier i. efficiently escalates incidents to higher tier ii or tier iii when required
- Documents incident status and solutions in incident database tools.
- Possesses current working knowledge of computers, printers, laptops, and common windows applications
- Worked through various types of tier 2 issues with telephone assist
- Provided answers to frequently asked questions or solutions to common problems as part of a customer self-help capability
- Imaged multiple laptops and prepped machines for usage at AUSA

Service Desk Administrator Tier 1 | Antero Technology (Contract)

01/17/2021—03/2022

- (Live chat Support and Advanced support) Work with 3-5 customers at a time during high chat volume Call out to VIP's and other customers as to not allow tickets to bust SLA.
- Troubleshoots PKI issues with multiple sites and provide customers with PKIs and revoke PKIs as a Trusted agent

- Troubleshoots over multiple networks with admin credentials troubleshooting various issues involving, email, hardware, software, network connectivity, account issues, and VOIP and TSVOIP issues.
- Utilizes Service Central ticketing system for tracking, managing SLA, and actively completing tickets
- Remotes into thin and thick clients using desktop director for thin clients and Citrix receiver to remote into thick client machines.
- Fix VIOP and TSVOIP issues related to resetting voicemail using Cisco Unity login or extension mobility
- Utilizes Active Directory web interface to reset passwords and unlock accounts, create security groups, and troubleshoots customer account issues to resolve
- Fixes Issues related to Microsoft Office 365 products, Outlook email related issues to PKI's not loading or being unable to encrypt, sign or send emails. Microsoft word for users not being able to save edit, save or open any files.
- Map printers remotely using print servers and loading drivers onto the machines as well
- Uses Microsoft Exchange to update security groups, distribution lists, and to update shared and personal mailboxes Members/owners and permissions.

Cyber Systems Operations Journeyman | Air Force, Ellsworth AFB, SD 1/2016—12/2020

- Technical expert providing advice and solutions to leadership and key stakeholders as it relates to networked systems, software, and hardware including facility design, military construction programs, minor construction planning, base comprehensive plan, and civil engineering projects.
- Coordinates and implements system service level agreements (SLAs) and memoranda of understanding (MOUs) with user agencies including Air Force, Army, and DIA.
- Manages customer service for 43 personnel and 83 systems, as a result of creating 75 remedy tickets and 2 change requests monthly.
- Fixes ~50 computer issues monthly including updating drivers, software installations, software removal, outlook, email problems, and resolved user network incidents.
- Administers 3 networks, using Distribution Resource Administrator (DRA), by creating groups, adding people, deleting, updating groups, user accounts, unlocking, deleting accounts.
- Processes, reviews C4 systems requirement documentation, telecommunication service requests, status of acquisition messages, and telecommunication service orders. Performs strategic and budget planning for networks.
- Implements and enforces national, DoD, and Air Force security policies and directives defending against hostile information operations. Analyzes risks and vulnerabilities while taking corrective action to mitigate or remove them.
- Utilizes enterprise patching tools to implement security updates such as Information Assurance Vulnerability Assessments (IAVA), C4 Notice to Airman (C4 NOTAM), Time Compliance Network Orders (TCNO), Time Compliance Technical Order (TCTO), operating system patches, and antivirus software updates.
- Manages project milestones, funding from inception to completion by determining adequacy and correctness of project packages, amendments, system installation records, files, indexes, evaluates contracts, wartime, support, contingency, and exercise plans to determine impact on manpower, equipment, and systems.
- Manages secure authentication methods utilizing public key infrastructure (PKI) technologies and procedures.
- Standardizes user privileges and system settings using automated deployment tools such as Group Policy Management Console (GPMC) and System Management Server (SMS).
- Performs scheduled system resource management including load balance, capacity planning, system-wide backups and data recovery. Ensures continuing systems operability by providing ongoing optimization and problem-solving support. Categorizes, isolates, and resolves system problems and performs fault recovery by validating, isolating, correcting faults, and verifying service restoral with customers. Processes scheduled, authorized outages and submits outage reports in response to unscheduled outages.
- Created 5 SCIF TEMPEST and vault diagrams with 100% accuracy and provided updates from 2018 through 2020.
- Coordinated a Windows 10, 40-machine upgrade, requiring transportation, re-installation on 31 classified systems, and 46 unclass systems by troubleshooting the correct graphics drivers for dual screen issues.
- Executed a critical manually McAfee frame package update on 56 systems preventing a loss of network access.

- Cross functional collaborator with an extensive team using critical specialties including customer service, program management, development, test, software, hardware, network, procurement, finance, and leadership.

EDUCATION

U.S. Air Force Cyber Systems Operations Tech School and Security 3D0X2 Keesler AFB 01/10/2017-04/17/2017

Security + CE Bootcamp
