

JOYCE HELGA

MS SQL SERVER DATABASE ADMINISTRATOR

Palatine, IL 60067 | 224-539-6550 | jomiahely@gmail.com | <http://www.linkedin.com/in/joyce-h-nassuuna-8992b3130>

PROFESSIONAL SUMMARY

A SQL Database Administrator with over 5 years of experience with a passion for optimizing database performance and ensuring seamless operations. Proficient in SQL Server management, performance tuning, and implementing robust security measures. With a track record of successfully leading database projects, I specialize in enhancing efficiency and reliability through meticulous maintenance and innovative problem-solving. Collaborative and adaptable, I thrive in dynamic environments, working closely with cross-functional teams to deliver tailored database solutions that drive organizational success. I am constantly seeking new challenges and opportunities to leverage technology for achieving strategic business objectives.

SKILLS AND TOOLS

SQL Server Administration | Backup and Restore | Security and Access Control | High Availability and Disaster Recovery | Data Migration | Performance Monitoring | Automation and Scripting | ETL Processes | Transact-SQL (T-SQL) | SQL Server Management Studio (SSMS) | SQL Server Analysis Services (SSAS) | SQL Server Integration Services (SSIS) | SQL Server Reporting Services (SSRS) | Hyper-V | Virtual Machines Configuration (VMs) | MS Teams | Microsoft Office | Microsoft Azure | Windows Operating System | Windows Server Operating System | Extended Events | SQL Server Profiler | Solar Winds (DPA) | JIRA | Service Now | Analytical Thinking | Effective Communication

WORK EXPERIENCE

MS SQL Database Administrator

Jetsetters Journey

Nov 2022 - Present

- Ongoing support of existing enterprise level applications and MS SQL Server 2012/2014/2016/2019 to the business needs.
- Upgraded the database management system from SQL Server 2008 to 2016, enhancing performance by 75% and reducing downtime by 60%.
- Installed, configured and Administered Databases in Test, Development and Production environments using MS SQL 2012/2014/2016/2019.
- Performed all day-to-day aspects of MS SQL database administration. Responsibilities include database design, installation, configuration, upgrades, security, performance monitoring and tuning, database availability, backup, and recovery.
- Diagnose and troubleshoot database errors (SQL Agent Job failures, availability group syncing issues, blocking & deadlocks, connectivity troubleshooting, slow running queries, etc.)
- Configured High Availability and disaster recovery Solution such as Traditional failover Clustering, Always On, Database Mirroring and Log Shipping, replication.
- Create Logins, Users, and permissions and managed Security issues of the Server and Databases according to Security Policies defined by the company.

- Applying Service Packs and Security patches for the Servers as released.
- Ensures business continuity with appropriate backup and recovery processes, failover procedures, and testing to guarantee point-in-time recovery for avoiding all types of data loss, including major catastrophic disaster.
- Creating and Modifying Tables, Stored Procedures, Views, Indexes, User-defined Functions and Triggers as requirement on SQL Server Environments.
- Use SSIS, Import and Export to migrate data from other source like Oracle, MySQL to MS SQL.
- Assisted and provided 24/7 production support in finding ways to improve performance without missing deadlines.

SQL Server Database Administrator

PLS Financial | Chicago IL

June 2019 – May 2022

- Managed and administered SQL Server databases for multiple clients, ensuring optimal performance, availability, and security.
- Reduced data breaches by 50% through the implementation of comprehensive security protocols. Introduced a data encryption system that further decreased breaches by 75%.
- Executed data cleansing processes, normalized data, and performed batch data imports and exports to maintain data accuracy and integrity.
- Configured High Availability Solution- AlwaysOn Cluster, Traditional Failover Clustering, Database Mirroring and Log Shipping.
- Monitor and troubleshoot database performance issues, analyzing query execution plans, and implementing necessary optimizations.
- Implemented and maintained high availability and disaster recovery solutions such as Always On Availability Groups, database mirroring, and log shipping.
- Developed and implemented database backup and restore strategies, ensuring data integrity and minimizing downtime in case of failures.
- Performed Backups, DBCC utilities, updated index statistics, monitored database and disk space.
- Rebuilding the indexes at regular intervals for better performance.
- Creating and Maintaining database maintenance plans for Update statistics, database integrity check and backup operations.
- Restore databases from full, differential, and transaction log backups on Production and Preproduction environments.
- Upgraded SQL Server from 2008R2 to 2014 side-by-side upgrade.
- Used SQL Server Profiler, Extended Events, Query Store and Database Engine Tuning Advisor for performance.
- Configured and supported replication and log shipping in SQL, 2012 and 2014. Performed database migrations and consolidations, ensuring minimal downtime.

EDUCATION

Master's Degree (M.A.): Public Administration and Management | Uganda Management Institute /
September 2015 - December 2017

CERTIFICATIONS

- SQL Server 2016/2017/2019 Administration and T-SQL Programming
- SQL Server 2022 Administration – LinkedIn

RECENT PROJECTS

- Setting up Always-on for High availability and Disaster recovery.
- Upgrade \ Migration of database from 2012 to 2019
- Security review and policy enforcement in selected production instances after SQL injection attempt.
