

Jyothinadh Minnekanti

Sr. Salesforce Developer

(315) 244-8116 | jminnekanti@gmail.com

<https://www.linkedin.com/in/jyothinadh-minnekanti/>

PROFESSIONAL SUMMARY

Experienced Salesforce Developer with Full Stack experience with 7 years of expertise in Salesforce, Angular, and React, holding 7 certifications in Salesforce Administration and Development. Proficient in optimizing Sales, Service, and Marketing Clouds, developing custom workflows, and maintaining robust data architecture. Demonstrated success in integrating Salesforce with various systems, leading to a 40% increase in sales team productivity and a 20% boost in revenue. Skilled in building dynamic, responsive web applications using Angular and React, implementing RESTful APIs, and enhancing user experience through seamless front-end and back-end integrations.

PROFESSIONAL EXPERIENCE

Senior Salesforce Developer

Vetica Systems

May 2024 – Present

- Implemented **Salesforce Service Cloud** to manage and track confidential document digitization orders, integrating with Vault Inventory Management systems for real-time updates and streamlined workflows.
- Designed and configured **custom Salesforce objects** to manage collections, boxes, and folders, enabling efficient tracking and status management of digitized documents with Salesforce Flows and Apex automation.
- Developed integration between **Salesforce and external OCR tools** using RESTful APIs, enabling seamless extraction and processing of document data directly within Salesforce.
- Configured **Salesforce Files and Content Management** for secure storage and management of digitized confidential documents, integrating with external storage solutions like MinIO for enhanced file handling.
- Created custom automation using **Salesforce Flow and Apex Triggers** to manage the lifecycle of collections, boxes, and folders, including automated status updates and notifications.
- Enhanced **data security and compliance** by implementing Salesforce permission sets, encryption, and sharing rules to manage access to sensitive information in accordance with regulatory requirements.
- Designed **Salesforce Reports and Dashboards** to provide real-time insights into document processing stages, collection statuses, and key operational metrics, supporting data-driven decision-making.
- Developed **API integrations** between Salesforce and Node.js backend services, ensuring real-time data synchronization for inventory management and document processing workflows.
- Built custom **Lightning Web Components (LWC)** to create dynamic, responsive user interfaces for managing collections, boxes, and document processing tasks, enhancing user experience and efficiency.

Salesforce Developer

TARS

August 2022 – April 2024

- Designed and developed user-friendly forms using Salesforce **Screen Flow**, incorporating dynamic fields, conditional logic, and lookup fields to improve data entry and user experience.
- Created responsive and intuitive user interfaces using **Lightning Web Components**, enhancing accessibility and interaction for form submissions and document handling.
- Developed business logic using **Apex** to automate key processes, such as generating dynamic links to cases, integrating with external systems, and updating records in real-time.

- Automated the creation of cases and configured **approval processes** using Salesforce **Process Builder, Flow, and Apex**, ensuring efficient tracking, escalation, and resolution of user requests.
- Configured custom **email templates** and automated email alerts to notify stakeholders of case updates, form submissions, and approval status changes, improving communication and response times.
- Implemented Salesforce security measures, including **field-level security, permission sets, and sharing rules**, to control access to sensitive information and ensure compliance with data protection standards.
- Developed automated **approval workflows** for high-priority cases, facilitating quick decision-making and ensuring proper oversight by managers and stakeholders.
- Created **validation rules** and error handling processes within Salesforce forms to ensure data integrity and guide users in correcting errors during submissions.
- Designed Salesforce **Reports and Dashboards** to provide actionable insights into case statuses, document processing, and key operational metrics, supporting data-driven decisions.
- Managed **audit trails and logging** to enhance compliance and accountability in data handling, approval processes, and case management.
- Integrated Salesforce with external systems using **RESTful APIs**, ensuring seamless data synchronization and enhancing the overall workflow efficiency between platforms.
- Enhanced form usability by implementing **multi-file upload** functionality, allowing users to attach and submit documents efficiently within Salesforce forms.
- Configured complex business logic using Salesforce **Flow** to automate repetitive tasks, such as field updates, record creation, and notifications, reducing manual intervention.
- Developed custom **record-triggered flows** to automate field updates and case assignments based on specific criteria, improving the responsiveness of the support process.
- Created and deployed **Lightning App Pages** to organize and display data in an interactive and user-friendly manner, improving the overall user experience within Salesforce.
- Implemented **Salesforce Path** to guide users through key stages of record progress, enhancing process visibility and ensuring compliance with business protocols.
- Configured custom record pages using **Lightning App Builder**, tailoring the user interface to specific business needs and enhancing workflow efficiency.
- Set up Salesforce **Data Loader and REST API integrations** for bulk data import, export, and synchronization, ensuring data consistency across platforms.
- Conducted **unit testing** and deployment of Apex classes, triggers, and Lightning Web Components to maintain code quality and ensure reliable performance.
- Automated **deployment processes** using **Salesforce DX and Git-based version control**, ensuring smooth transitions between development, testing, and production environments.
- Created **Apex test classes** to validate custom business logic and ensure high code coverage, maintaining robust and reliable application performance.
- Configured Continuous Integration and **Continuous Deployment (CI/CD)** pipelines to streamline deployments, reduce manual errors, and ensure consistent code quality.
- Utilized **custom metadata types and custom settings** to manage configuration data, allowing for easy adjustments without altering the codebase.
- Leveraged **Salesforce Shield** for enhanced security, including encryption at rest, field audit trails, and event monitoring to protect sensitive information.
- Conducted **code reviews and maintained high code standards** by ensuring Apex classes and Lightning components meet established code coverage thresholds.
- Managed deployment and release processes using **change sets, Salesforce DX, and Metadata API**, ensuring effective collaboration and smooth application updates.
- Configured **connected apps** for secure integration with third-party services, enhancing the platform's extensibility and connectivity.
- Created scalable and maintainable **Apex classes, triggers, and batch jobs** to handle complex business logic and data processing tasks.
- Set up **platform event listeners and real-time data synchronization processes**, ensuring responsive updates across integrated systems.

Client: Neil Kelly (House Remodeling Company)

- Led Salesforce implementation for Neil Kelly, enhancing their customer relationship management and sales processes, resulting in a 45% increase in lead conversion rates.
- Developed a customized Salesforce solution tailored to the home remodeling industry, including **integration** with third-party project management tools, streamlining workflows and improving project tracking.
- Implemented Salesforce **Service Cloud** to manage service requests, track project timelines, and automate customer communications, improving service delivery time by 30%.
- Integrated Salesforce with external scheduling and **inventory management systems**, optimizing resource allocation and reducing project delays by 25%.
- Created custom **Lightning components** for Neil Kelly's sales team, providing a user-friendly interface to manage client interactions and track job progress in real time.
- Automated sales processes with **Salesforce Flow and Process Builder**, reducing manual data entry and increasing operational efficiency by 40%.
- Configured personalized **dashboards and reports** to monitor key performance metrics, enabling data-driven decision-making and improving project visibility.
- Developed training sessions for Neil Kelly staff on Salesforce best practices, significantly enhancing user adoption and overall productivity.

Client: Orange Coast (Real Estate Company)

- Directed Salesforce projects for Orange Coast, a leading real estate company, implementing CRM solutions that streamlined property listings and client management, enhancing agent productivity by 50%.
- Developed custom **Salesforce Sales Cloud** functionalities to track property leads, manage sales pipelines, and automate contract processes, reducing sales cycle time by 35%.
- Integrated Salesforce with third-party real estate platforms via **SOAP and REST APIs**, improving data synchronization and reducing manual data entry errors by 60%.
- Implemented automated email campaigns and customer journey mapping using **Salesforce Marketing Cloud**, increasing lead engagement rates by 25%.
- Created **custom objects and workflows** tailored to the real estate industry, including property management and buyer/seller matching, enhancing service delivery.
- Configured Salesforce security settings, **including field-level security and sharing rules**, ensuring data protection and compliance with industry standards.
- Provided targeted training for Orange Coast's sales team, focusing on leveraging Salesforce features to boost sales performance, resulting in a 40% improvement in user proficiency.
- Designed detailed **reports and dashboards** for sales performance, lead tracking, and pipeline forecasting, enabling management to make strategic decisions with real-time insights.

Client: RRD (Marketing, Packaging, and Print Solutions)

- Managed Salesforce implementation for RRD, focusing on transforming customer touchpoints into impactful moments by leveraging Salesforce's full capabilities.
- Integrated Salesforce with **MuleSoft** to streamline cross-platform data flows between marketing, packaging, and print solutions, elevating operational efficiency by 25%.
- Developed custom Salesforce solutions to support RRD's diverse marketing and supply chain needs, optimizing campaign management and enhancing customer engagement.
- Implemented Salesforce Communities to enhance client interaction, providing a self-service portal for tracking orders, accessing marketing assets, and managing campaigns.
- Utilized Salesforce **Einstein Analytics** to develop advanced dashboards, offering RRD's marketing teams real-time insights into campaign performance and customer behavior.
- Automated data flows between Salesforce and RRD's enterprise systems, reducing manual input and improving data accuracy across marketing, packaging, and print operations.
- Configured complex approval processes within Salesforce to streamline marketing material approvals and reduce

project turnaround times by 30%.

- Delivered Salesforce training to RRD's teams, focusing on advanced functionalities and automation capabilities, significantly improving user adoption and reducing onboarding time.

Software Engineer

TCS

March 2018 – April 2020

- Configured and managed Salesforce admin settings, including user roles, permissions, and automation workflows.
- Developed the **TechSol Dashboard** using Angular, implementing a modular architecture with reusable components, services, and optimized state management.
- Integrated **Angular Router** for seamless navigation and route guards for secure access control; utilized reactive forms with validation using **Reactive Forms Module**.
- Created dynamic, responsive UI components with **PrimeNG** and **Angular Material**, enhancing user experience with custom themes and animations.
- Implemented performance optimizations including **lazy loading**, onPush change detection, and **RxJS** operators for efficient data handling and reducing load times.
- Wrote unit and end-to-end tests using **Jasmine** and **Karma** to ensure component reliability and application stability through continuous integration pipelines.
- Developed the **TechSol Web Platform** using React, focusing on responsive UI, state management, and performance optimization with hooks, Context API, and Redux.
- Integrated **React Router** for dynamic routing and secure access with protected routes; used Axios for API interactions with robust error handling.
- Created reusable components, custom hooks, and forms with **Formik** and **Yup** for validation, enhancing code modularity and user experience.
- Implemented performance enhancements like **lazy loading**, **code-splitting**, and memoization; ensured accessibility compliance with semantic HTML and ARIA.
- Conducted unit and integration testing using **Jest** and **React Testing Library** to validate component interactions and ensure application reliability.

SKILLS

- **Salesforce CRM:** Sales Cloud, Service Cloud, Salesforce Marketing Cloud, Process Automation, Flows, Apex Triggers, Classes, Test Classes, SOQL & SOSL Queries, REST API, SOAP API Integration, Visualforce Pages, Aura Components, Lightning Web Components, Deployment - Change sets, ANT Migration, Metadata, Data Import and Export, User Support, Salesforce Security (Sharing Rules, OWD, Permission sets, Profiles, Roles, Public Groups). Einstein Analytics, OmniStudio, AI
- **Front-end:** HTML5, CSS3, Javascript, Bootstrap, Reactjs, Angular, Typescript
- **Backend:** C, C++, .Net, Java, Python, JavaScript, Typescript, JSON, XML, APIs, Multi-threading, Data Structures.
- **Database:** MySQL, MongoDB, PostgreSQL (Amazon Web Services) AWS, Azure, Heroku, Database Design, Liquibase.
- **Project Management & other** CI/CD, Docker Container, Jira, MS Excel, Git, Agile development, CMS, ETL, GitHub, Release management, Waterfall, Data Architecture, Software Development Life Cycle, SCRUM, QA, Acceptance testing, Flexible, Verbal and Written communication skills.

EDUCATION

B. Tech in Computer Science and Engineering, Acharya Nagarjuna University

June 2014 – May 2018

CERTIFICATIONS AND AWARDS

- Salesforce Certified Administrator
- Salesforce Certified Platform Developer 1
- Salesforce Certified Platform Developer 11
- Salesforce Certified Platform App Builder
- Salesforce Certified AI Associate
- Salesforce Certified AI Specialist
- Salesforce Certified OmniStudio Consultant
- MERN Stack Web Developer Certification.
- Accepted paper at IEEE AI x VR 6th International Conference in California, January 2024.
- Awarded Apisero Aces and Kokua titles for resolving client issues and delivering impactful solutions.
