+1-641-233-0129 • hangkheangtaing@gmail.com • linkedin.com/in/hang-kheang-taing • https://kaitaing.netlify.app/home

Software Engineer

Focused on building scalable backend systems, real-time applications, and clean frontend interfaces using .NET, Angular, and cloud-native technologies. Strong foundation in system design, performance optimization, and automation. Passionate about clean code, data-driven architecture, and secure APIs.

WORK EXPERIENCE

SAHAKRINPHEAP MICROFINANCE PLC

09/2021 - 04/2024

Senior .Net Developer & Core Banking Officer

Phnom Penh, Cambodia

- Merged **two legacy banking apps** into a single **.NET Windows application** to simplify codebase; improved developer productivity by **2×**.
- Optimized slow plugin reports using **SQL indexing, caching, and ELT pipelines**; cut report load time from minutes to **<1 second**.
- Built real-time monitoring with **Telegram Bot API**; enhanced system alerting and raised reliability by **98%**.
- Modernized outdated reporting with **ASP.NET MVC**, applying **CORS, token-based auth, and SQL injection prevention**; ensured compliance and security.
- Connected **ZKTeco biometric system** with backend logic to automate staff check-ins; reduced payroll delays by **90%** across **200+ users**.

PATHMAZING INC

03/2021 - 09/2021

.NET Full-Stack Developer

Phnom Penh, Cambodia

- Created **Odoo ERP portal** and **Python REST API** tailored to business workflows; achieved **95% user satisfaction**.
- Integrated **ABA PayWay** gateway into backend system; streamlined online transactions and improved payment success rates.
- Engineered the **KhmerCare** fundraising platform using **Next.js** and **.NET + SignalR**; enabled real-time updates for **198+ active campaigns**.

ANAKUT DIGITAL SOLUTION CO. LTD

10/2020 - 05/2021

.NET & Angular Developer

Phnom Penh, Cambodia

- Developed custom **POS system** with **.NET Core** and **Angular**; boosted client operational performance by **20%**.
- Enabled accurate inventory tracking for animal traders by linking **scale machines** via **.NET serial communication**.
- Delivered full-featured **Hotel Management System** using **ASP.NET MVC + Angular**; cut check-in time by **40%**.
- Built end-to-end **Clinic Management System** with **appointment automation**; decreased client waiting time by **60%**.
- Automated weight-based inventory across POS systems; eliminated **99% of manual entry errors** with serial device integration.

EDUCATION

Master of Science in Computer Science

Maharishi International University

Fairfield, Iowa

Bachelor of Science in Computer Science

Royal University of Phnom Penh

Phnom Penh, Cambodia

PROJECTS

BiUrSite

03/2025 - 03/2025

Self

BiUrSite is a full-stack web application built with **.NET API**, **Angular**, **MSSQL**, and **Docker**, designed to provide a safe platform for users to share ideas and seek advice anonymously or with verified accounts.

The project emphasizes secure authentication, role-based access control, email verification, and scalable deployment using Kubernetes on cloud platforms like AWS or Azure.

Following clean code principles and strong security practices, BiUrSite is designed for performance, scalability, and maintainability.

Portfolio

02/2025 - 02/2025

Self

This portfolio was developed with **Angular CLI** using **pure HTML, CSS, and TypeScript**, without external UI frameworks. It showcases my technical skills, professional experience, and ability to build responsive, fully customized web applications from scratch, focusing on clean design, performance, and best practices.

SKILLS

- **Languages:** C#, JavaScript, TypeScript, Python
- **Backend Development:** ASP.NET Core, ASP.NET MVC, RESTful API, Entity Framework, Dapper, xUnit Test, ORM, LINQ, T-SQL, .NET Framework, ASP.NET WebForms
- **Frontend Development:** Angular, React, HTML5, CSS3, JavaScript, Bootstrap, JSON, NPM
- **Databases:** SQL Server, Postgres, T-SQL, Redis, ELT, Stored Procedures, Cosmos DB, SSIS, SSRS
- **Cloud & Deployment:** AWS, Docker, Kubernetes, CI/CD Pipelines
- **Architecture:** Microservices, Clean Architecture, CQRS, Event-Driven Architecture, System Design, Service Bus, Load Balancing, Multi-tenancy, Monolith, SAGA Pattern
- **API Security:** OAuth2, JWT, CORS
- **SDLC & Methodologies:** Agile, Scrum, Kanban, Waterfall
- **Tools:** Visual Studio 2022, SQL Server Management Studio (SSMS), Jira, Git, GitHub, Postman, Bitbucket
