

Kalyan Gaddala

.NET Full Stack Developer

Email: kalyanb.sde1@gmail.com | Phone: (940) 758-4526 | Address: Plano, Texas

PROFESSIONAL SUMMARY

.NET Full Stack Developer with over 4+ years of hands-on experience in designing, developing, and deploying robust, scalable web and enterprise applications. Proficient in backend technologies such as C#, ASP.NET Core, and Web API, and well-versed in front-end frameworks including Angular, React, and Vue.js to build modern, dynamic user interfaces. Extensive experience with cloud platforms like Azure, AWS allowing for efficient cloud-native application development and deployment. Adept at working with both relational (SQL Server) and NoSQL (MongoDB, Cosmos DB) databases to ensure seamless data management. Skilled in implementing CI/CD pipelines using Azure DevOps, ensuring streamlined and automated software development and deployment cycles. Experienced in utilizing Agile methodologies and collaborating in cross-functional teams to deliver incremental releases. Proven ability to write clean, maintainable code and conduct rigorous testing with frameworks such as XUnit, NUnit, and Jest to ensure high-quality software. Strong problem-solving skills, with a passion for optimizing applications for performance and scalability. Excellent communication skills, with a focus on building strong relationships with clients and stakeholders. Quick to learn and adapt to new technologies, ensuring the delivery of cutting-edge solutions in fast-paced environments.

TECHNICAL SKILLS

- **Languages & Frameworks:** C#, ASP.NET Core (2.x/3.x/5.x/8.x), Web API, MVC, Angular (13), ReactJS, Vue.js, JavaScript, TypeScript
- **Cloud Platforms:** Microsoft Azure, AWS (S3, Lambda, EC2, RDS), Google Cloud Platform (GCP)
- **Database:** SQL Server (2016/2018), MongoDB, Cosmos DB, Oracle
- **DevOps & CI/CD:** Azure DevOps, Git, Bitbucket, Docker, Kubernetes, Jenkins, AWS CodePipeline, Terraform
- **Testing & Tools:** XUnit, NUnit, Jest, Karma, Jasmine, Postman, Swagger UI, Fiddler
- **Web Development:** HTML5, CSS3, Tailwind CSS, Bootstrap, AJAX, jQuery, Vite
- **Messaging & Streaming:** Apache Kafka, RabbitMQ
- **Development Tools:** Visual Studio (2019/2022), VS Code, Bitbucket, GitHub
- **Authentication & Security:** OAuth 2.0, JWT, Azure AD, Identity Server

PROFESSIONAL EXPERIENCE

.NET Full Stack Developer

Valero Energy Corp | San Antonio, Texas

June/2023 - Present

- Developed and deployed scalable web applications using ASP.NET Core Web API and ReactJS, ensuring high performance and modularity.
- Built dynamic, user-friendly front-end interfaces using React, TypeScript, and Tailwind CSS, ensuring responsiveness across devices.
- Worked with Azure Cloud services for deploying APIs and managing cloud-based resources such as databases and virtual machines.
- Utilized Azure Blob Storage for efficient handling of unstructured data, including file uploads and large data streams.
- Integrated SQL Server and Cosmos DB for data storage and optimized queries with Entity Framework Core.
- Created custom API endpoints and handled OAuth 2.0 token-based authorization for secure user management.
- Implemented Kafka for real-time data processing, providing faster data flow between services.
- Designed and implemented CI/CD pipelines using Azure DevOps for streamlined deployment and automated testing workflows.
- Wrote comprehensive unit tests using XUnit and Jest to ensure code quality and robustness.
- Engaged with clients to gather requirements and translate them into actionable development tasks.
- Ensured application security by implementing best practices for authentication and authorization in ASP.NET Core.
- Collaborated with cross-functional teams in an Agile environment, delivering incremental releases and feature updates.

Environment: C#, ASP.NET Core, ReactJS 18, Azure, SQL Server, Cosmos DB, Kafka, Entity Framework Core, Git, Azure DevOps, Postman, Swagger UI, XUnit, Tailwind CSS.

Full Stack Developer

Innova Solutions | India

June/ 2020 – Nov/2021

- Developed web applications using ASP.NET Core and Angular 13, building dynamic and responsive UI's.
- Integrated RESTful APIs with front-end applications, improving the client-side performance by optimizing HTTP requests.
- Used AWS for deploying microservices and maintaining a cloud-native architecture for the project.
- Utilized **Amazon S3** for storage of application assets and static content, reducing latency.
- Designed and optimized database schemas in MongoDB for handling large-scale, unstructured data sets.
- Developed and consumed SOAP and RESTful web services for communication with third-party systems.
- Utilized Git and Bitbucket for version control and code collaboration, ensuring best practices in software development.
- Wrote unit and integration tests with Jest, ensuring that all features passed rigorous testing before production deployment.
- Configured and managed CI/CD pipelines using AWS Code Pipeline and AWS CodeBuild to automate deployments and streamline the development lifecycle.
- Participated in sprint planning and retrospectives, ensuring efficient team collaboration and timely delivery of features.

Environment: C#, ASP.NET Core, Angular 13, AWS (Lambda, S3, Elastic Beanstalk, CloudWatch, CodePipeline, CodeBuild), MongoDB, RESTful APIs, Entity Framework Core, Git, Bitbucket, Swagger UI.

.NET Developer

Experion Technologies | India

Feb/2019 – May/2020

- Developed and maintained ASP.NET MVC web applications, incorporating complex business logic and database interactions.
- Created dynamic user interfaces using Angular 2/4 and Bootstrap, enhancing the overall user experience.
- Integrated SQL Server with Entity Framework for handling complex queries and ensuring fast data retrieval.
- Designed RESTful APIs for seamless communication between client and server, ensuring scalability.
- Optimized database performance with stored procedures, functions, and indexes to handle large datasets efficiently. Implemented Multithreading concepts to improve the application performance.
- Involved in writing the Unit Test Cases on Business and Service classes using NUnit. Involved in various phases of system testing such as unit, integration and regression testing.
- Used AWS Lambda for serverless computing, simplifying event-driven workflows and reducing infrastructure overhead.
- Monitored application performance and resource utilization using Amazon CloudWatch, proactively addressing performance bottlenecks.
- Participated in Agile development cycles, delivering features and bug fixes based on client priorities.
- Collaborated with front-end and back-end teams to ensure the smooth integration of services and APIs.
- Conducted code reviews assisting other team members, enhancing overall team performance.
- Wrote detailed documentation for system architectures, APIs, and workflows, improving team onboarding and project clarity.

Environment: C#, ASP.NET MVC, Angular 2/4, SQL Server, AWS, RESTful APIs, Entity Framework Core, Git, Postman, Swagger UI.

EDUCATION

Master of Science, University of North Texas

Bachelor of Technology (B.Tech), Gudlavalleru Engineering College

CERTIFICATIONS

AWS Certified Cloud Practitioner
