EDUCATION

The University of Texas at Dallas

Master of Science, Information Technology and Management

Richardson, TX

Dec 2024

Gayatri Vidya Parishad College for Degree and P.G. courses, College of Engineering

Bachelor of Engineering, Electronics and Communications

Visakhapatnam, India

July 2021

EXPERIENCE

Elevondata Labs Inc.

AI Solutions Intern

Dallas, Texas

Sep 2024 – Dec 2024

- Built a hybrid search mechanism combining regex based & vectorized techniques, improving PDF search accuracy by 30%
- Fine-tuned LLMs like T5, BERT, and RoBERTa on domain-specific datasets, achieving a 25% improvement in accuracy for unstructured data processing tasks
- Designed scalable pipelines to preprocess and vectorize diverse document types, integrating TF-IDF, Word2Vec, and LLaMA, ensuring seamless handling of multi-format inputs
- Collaborated on model deployment readiness by creating integration scripts, resolving scalability challenges, and validating performance in a simulated production environment, ensuring a smooth transition to live systems
- Trained and adapted LLaMA to automate TOC generation from diverse document formats, streamlining content navigation and enhancing user accessibility

Elevondata Labs Inc.

Summer Intern

Hyderabad, India

May 2024 – Aug 2024

- Developed a PoC using OpenAI GPT-4, integrating multiple data sources (RSS feeds, internal documents, news, and government websites), reducing data retrieval time by 30% across diverse inputs
- Created and documented 12+ user stories based on client requirements, enhancing the model's ability to handle various data inputs, improving usability by 22%
- Engineered a multi-source data querying framework within Streamlit, enabling real-time interaction with active data sources, resulting in a 25% reduction in response time
- Automated data extraction from 10+ news websites, RSS feeds using web scrapers, ensuring 95% accuracy in model responses
- Integrated GPT-4o, GPT-4o Mini models into application, leveraging dynamic input data sources to streamline querying process

Cognizant Technology Solutions

Programmer Analyst

Hyderabad, India

Oct 2021 – Jul 2023

- Implemented credit & debit memo functionality enhancement, resulting in streamlined financial processes across 52 regions
- Reduced system errors by 25% through proactive monitoring and resolution of unprocessed communication channels and XML messages using Integration Builder and the Enterprise Service Repository (ESR)
- Enhanced issue resolution efficiency by 37% through effective analysis and resolution of client concerns via ServiceNow, delivering faster and more accurate solutions that improved client satisfaction
- Spearheaded system maintenance on SAP PO/PI systems, leading to 17% reduction in processing errors; ensured consistent system stability through monthly reviews
- Improved system accuracy by resolving IDoc errors, refining code, and customizing smartforms for better functionality

PROJECTS

GoogleBERT and FinancialBERT

Jun 2024

- Cloned and customized GoogleBERT, FinancialBERT models from HuggingFace for question-answering, sentiment analysis

Big Data Analytics

Apr 2024

- Integrated and migrated large datasets into HDFS and Hive, improving data retrieval and analysis efficiency by 30%.
- Enhanced data processing speed by 25% and reduced query times by 20% using Spark, HiveQL, and Pig.

IoT-based Menu Ordering System

Jul 2021

- Integrated a 4x4 keypad and LCD display for order entry and confirmation, streamlining the ordering process and enhancing efficiency by 100% through improved user interaction
- Installed Arduino, Node MCU modules, and ultrasonic sensors for automated order alerts and human presence detection, optimizing waitstaff performance by 100% and reducing electricity consumption by 20%

SKILLS AND CERTIFICATIONS

Technical Skills: AI/ML, Python, SAP ABAP, AWS, Azure, Git, Hadoop, Hive, LLM, R, SAP PO/PI, Spark, SQL

Tools: Confluence, Google Colab, Jupyter Notebook, PyCharm, MS Office, Power BI, Tableau
