Jersey City, New Jersey | +1 (315) 952-9985 | ksbirada@gmail.com | [LinkedIn](#) | [GitHub](#)

EDUCATION

Syracuse University, Syracuse, NY, USA

AUG 2022 - MAY 2024

Master of Science - Computer Science

GPA - 3.78/4.0

Coursework: Design and Analysis of Algorithms, Artificial Intelligence, Computer Architecture

Visvesvaraya Technological University, India

AUG 2015 - JUL 2019

Bachelor of Engineering - Computer Science and Engineering

Coursework: Object-Oriented Programming in JAVA, Data Structures, DBMS

TECHNICAL SKILLS

- **Programming Languages:** Python, Java, C, C++, Apex, JavaScript, TypeScript, SQL, HTML, CSS
- **Frameworks:** AngularJS, JSP, J2EE, NodeJS, NextJS, Spring Boot, JQuery, Bootstrap, Aura
- **Cloud Services:** Salesforce, AWS, Microsoft Azure, Google Cloud Platform (GCP)
- **Databases:** Microsoft SQL Server, MongoDB, MySQL, NoSQL, Oracle
- **Tools and IDE:** Git, Postman, Jira, Visual Studio Code, Eclipse, PyCharm, IntelliJ, Jupyter
- **Certifications:** Salesforce Certified System Administrator, Salesforce Certified Platform Developer I
- **Salesforce Technologies:** Lightning Web Components, Triggers, SOQL/SOSL, Lightning Flow, Visualforce

WORK EXPERIENCE

MILAAN FOUNDATION, USA

JAN 2025 - PRESENT

Salesforce Developer

- Design and optimize Salesforce CRM functionalities including donor and grant tracking systems, ensuring seamless data management and organizational efficiency.
- Develop user-friendly dashboards, customize reports, and automate communication workflows (e.g., thank-you letters, tax letters), enhancing operational insights and donor engagement.

SYRACUSE UNIVERSITY, NY, USA

JUL 2024 - PRESENT

Graduate Research Intern

- Developing an AI-powered travel assistant, boosting user engagement through advanced NLP, real-time data integration, and **Gemini Pro** function calling.
- Designing and implementing a Next.js based UI, integrating Google Maps and Weather APIs, while optimizing performance and ensuring accessibility for diverse user needs.

PROGYNY, Inc., New York, USA

NOV 2024 – JAN 2025

Software Engineer Intern

- Supported the onboarding of over 70 clients for the End-of-Year (EOY) Cost Share module, client eligibility checks by leveraging AWS EC2, S3, and Salesforce, and optimizing backend services using Python, Docker, and containerization.
- Developed a logic to update AWS RDS with fake data to replace real data during development, to ensure emails were not unintentionally sent, using Python.

INFOSYS LIMITED, India

SEP 2019 - AUG 2022

Salesforce Developer

- Developed 75% of **frontend** Complaint Management module in Salesforce B2B e-commerce application for a multinational beverage corporation using Lightning Web Components (**HTML, CSS and JavaScript**).
- Collaborated with team to create **HIPAA** Validation flow for an American Insurance company operating on Salesforce Health Cloud and automating it utilizing **Lightning Flow**.
- Produced a unique **Apex** an Object-Oriented language search functionality to query in back end from millions of user records based on name, SSN and DOB.
- Built Apex methods to implement OAuth, **SOAP** and **REST API** calls to store data in External Objects in Salesforce.
- Translated a global B2B commerce application into multiple languages to facilitate deployment in various countries around the world using AWS Translate and Salesforce Translation Workbench.
- Experienced in **end-to-end** agile development life cycle, version control, code review, unit testing and CI/CD.
- Minimized code in **JavaScript** controllers of **Lightning Web Components** to cut down application loading time.

PROJECTS

Cuse Alumni Groves | ReactJS, Java Spring Boot, MongoDB, Rest API

SPRING 2024

- Built an application enriching user experience for alumni and students through secure login, streamlined sign-up processes, and a dynamic feed page featuring updates, job opportunities, and mentorship requests with **React, Java Spring Boot** and **MongoDB**.
- Implemented design patterns, RESTful APIs with Spring Boot, improving data access and integration, and optimized application performance resulting in a 30% reduction in response time and amplified user engagement.

Gomoku AI | Python, NumPy, Matplotlib, Pandas, SciPy

FALL 2023

- Constructed an AI for Gomoku using MCTS with UCT and alpha-beta pruning, leveraging **Python's Numpy** for efficiency. Achieved 75% better performance than existing Gomoku AI.

Twitter Sentiment Analysis towards ChatGPT | Python, Tweepy, NLTK, Scikit-learn

SPRING 2023

- Created a robust data processing pipeline for Twitter data collection, preprocessing, visualization and identified sentiments related to ChatGPT with an accuracy rate of over 70%.
