

KAMRAN NOORINEZHAD

Flutter Mobile Developer

Toronto, Ontario, Canada ✉ kamran.noori.nejad@gmail.com [in linkedin.com/in/knoori/](https://www.linkedin.com/in/knoori/)

CAREER SUMMARY

Flutter Engineer with extensive experience building greenfield mobile applications using Flutter and Dart. Proven success in delivering scalable, high-performance, and secure apps from initial architecture through deployment to App Store and Google Play. Adept in UI/UX-centric development, biometric authentication integration (Face ID, Touch ID, Android Biometric API), and custom push notification frameworks. Highly skilled at ensuring full code ownership, from feature development to testing and production sign-off, while thriving in fast-paced Agile environments. Passionate about crafting seamless, user-first mobile experiences that drive engagement and retention.

PROFESSIONAL EXPERIENCE

TrueWin's Tech, Winnipeg, MB • Flutter Engineer

01/2022 - Present

- Architected and led the end-to-end development of greenfield mobile applications using Flutter and Dart, achieving successful deployment to App Store and Google Play.
- Engineered scalable, dynamic UI systems with Flutter's widget tree optimization, increasing user engagement metrics by 20%.
- Integrated biometric authentication systems (Apple Face ID, Touch ID, Android Biometric API) across multiple projects, reducing unauthorized access by 85%.
- Designed and customized push notification services leveraging Firebase Cloud Messaging (FCM), enhancing user re-engagement and boosting retention by 15%.
- Implemented robust CI/CD pipelines with GitHub Actions, ensuring 98% code quality adherence and enabling rapid, reliable releases.
- Led Agile Scrum teams of 5-7 members, facilitating sprint planning, code reviews, and daily stand-ups, improving velocity by 20%.
- Conducted over 200 code reviews, proactively identifying architectural and security improvements across teams.
- Optimized app performance by refactoring code based on MVVM architecture principles, improving load times by 30% and app stability by 25%.
- Took full ownership of testing and sign-off processes, conducting functional, integration, and UI testing to ensure production readiness.

MCI Telecommunications, UAE • Flutter Application Developer

07/2017 - 12/2022

- Collaborated with cross-functional teams to design and deliver feature-rich mobile applications, adopting clean architecture principles to ensure modularity and maintainability.
- Reduced crash rates by 50% through rigorous bug identification, stress testing, and efficient coding practices.
- Provided technical leadership and client support post-launch, successfully integrating RESTful APIs and third-party SDKs for seamless business operations.
- Enhanced app responsiveness by optimizing API call efficiency and reducing network latency, resulting in a 30% faster user experience.
- Led initiatives to maintain compliance with Google Play guidelines and security best practices, ensuring smooth release cycles.

PROJECTS

Mobile Payment Application with AI-Powered Loyalty Engine • winwin-app.com/

05/2022 - Present

- Developed a secure, scalable mobile payment platform using Flutter/Dart, integrating end-to-end encryption and biometric authentication (Face ID, Touch ID).
- Implemented a personalized loyalty engine powered by machine learning, increasing user retention by 20% and boosting average transaction value by 18%.
- Built location-based promotion systems using GPS and geofencing technologies, driving 25% higher user engagement through targeted offers.
- Led project management efforts via Jira and Trello, ensuring consistent collaboration among remote stakeholders and a 15% reduction in cycle time.

SKILLS

- Mobile Development:** Flutter, Dart, Firebase Cloud Messaging, Android (Java, Kotlin), iOS (Swift)
- Architecture Patterns:** Clean Architecture, MVVM, Provider, BLoC Pattern
- Tools & Testing:** Android Studio, XCode, VSCode, Git, Firebase, GraphQL, Jenkins, Docker
- Soft Skills:** Agile Development, Code Quality Assurance, Mentorship, Cross-Functional Collaboration, Problem Solving

EDUCATION

Bachelor's degree in Information Technology • UCNA

Graduation 06/2018

CERTIFICATIONS & TRAINING

- Flutter Developer Certification • Google/Udemy
- Google Associate Android Developer Certification
- Meta React Native Developer Certification
