

Karthik Saggadi

Email: Karthik.sagg@gmail.com | Mobile: +1 516-408-0513

PROFESSIONAL SUMMARY

- Skilled Quality Assurance Tester with over 9+ years of experience in Manual & Automation testing and have a good knowledge on SDLC, STLC and defect life cycle.
- Proficient in preparing testing artifacts such as Test Scenarios, Test Cases, Defect Reports and Test Summary Report.
- Expertise in Understanding and Analysing Test Requirements/ User stories, Functional and Technical Specifications, Tracking changes and maintenance of Test Requirements.
- Implemented web application testing including GUI Testing, System Testing, Functional Testing, Integration Testing, Regression Testing, Stress Testing and Performance Testing.
- Experience in developing scripts using tools such as Selenium WebDriver, JUnit, TestNG, ANT/Maven Build tools, Jenkins/Hudson for continuous integration
- Have experience working in all phases of Software development Life Cycle (SDLC), Software Testing Life Cycle (STLC) of projects.
- Good experience in automating Web Application Testing using Selenium WebDriver with TestNG framework.
- Built automation scripts using Behaviour driven, Data driven, Page Object Model (POM) using Selenium WebDriver.
- Experienced with Web Services, SOAP, REST technologies and writing Groovy Scripts.
- Experience working with BDD framework with Cucumber, Java and created feature files with scenario and scenario outline files.
- Good working experience in using Selenium WebDriver and creating test scripts for Black Box Testing.
- Expertise in Test Management and Defect Tracking tools like JIRA, HP ALM.
- Good working experience on source code version control system like GIT.
- Experienced in SQA (Software Quality Assurance) including Manual and Automated testing with tools such as HP Quick Test Professional and JUnit/TestNG, Load Runner
- Proficient in testing database applications developed with SQL Server, Oracle and MS Access and Experienced in writing and executing SQL queries
- Involved in testing web services (REST, SOAP) using tools such as Postman, SoapUI and Rest-Assured.
- Experienced in executing test cases developed on UNIX and Windows based platforms.
- Participated in all the phases of Agile Methodology (Sprint Planning & Estimation, Spring Execution, Sprint Retrospective, QA go/no go & Sprint Demo).

TECHNICAL SKILLS

- **Testing tools** : Selenium WebDriver and GRID, Soap UI, Postman, Rest-Assured, Cucumber, Coded UI, Apium, Playwright, Protractor, Jasmine, LoadRunner, JMeter, HP UFT, Neo load.
- **Languages** : Java, JavaScript, Python, HTML, SQL, Typescript.
- **Test Framework** :TestNG, Junit, Page Object Model (POM).

- Defect Tracking Tools : Jira, HP Quality Center (ALM), Bugzilla.
- CI/Build Tools : Jenkins, Ant, Maven.
- Databases : Oracle, SQL Server, MySQL.
- Version Control Tools : GitHub, SVN
- Operating Systems : Windows variants, UNIX, Mac OS, LINUX.

PROFESSIONAL WORK EXPERIENCE

Client Name: Machobear Studios

Role: QA Engineer.

Duration: May 2022 to Sep 2024.

Roles & Responsibilities:

- Developed maintainable test automation, tools, and automated test suites in response to growing feature sets and customer requirements.
- Worked in agile (Scrum) environment with frequently changing requirements and features set.
- Performed smoke, functionality, integration, system, regression tests based on Analysis, and understanding of the requirements, non-functional specifications, and end-user needs.
- Hands-on experience on Playwright testing for end-to-end test framework for Angular JS application and other JavaScript applications.
- Wrote and executed automated tests in Typescript/Playwright for a browser-based application.
- Extensively used XPATH, Regular expression and classes to perform UI actions. Exported output/reports for all automated testing results.
- Involved in the usage of BDD framework to develop Cucumber step definitions, Scenarios and features using Gherkin.
- Tested the REST calls (POST, GET, PUT, DELETE METHODS) using Postman.
- Used GitLab as a code repository to clone, commit, and push the changes into repository.
- Saved as co-ordinator for all testing activities during the project.
- Executed SQL queries to verify the database for the relevant test cases.
- Implemented JDBC connections in the automation framework to validate data in the database.
- Participated in status meetings to report issues. Communicated with developers through all phases of testing to prioritize bug resolution.
- Implemented mobile automation frameworks using APPIUM.
- Involved in mobile testing includes app testing, test automation for web applications using cucumber.
- Identifying feasible non-functional test cases for performance testing.
- Involved in testing application on different mobile platform such as IOS and Android.
- Created selenium web-driver automation scripts using java to validate functionality on various browsers.
- Implemented Appium scripts to test IOS and Android platforms.
- Implemented UI Automator viewer in Appium to inspect elements in mobile applications.
- Performed the testing on the various mobile devices with a various platform (IOS, Android.)

Environment: JavaScript, Typescript, Playwright, BDD, TestNG, Maven, Java, Neo load, SQL, SOAP, Cypress, Java, RESTful, Cucumber, GIT, JIRA, Postman, Appium, HP Quality Center, JUnit.

Client Name: Treasure-Data

Role: Software Tester.

Duration: June 2019 to April 2022.

Roles & Responsibilities:

- Developed automated tests for testing of application using tools such as Selenium WebDriver, TestNG, Maven and Jenkins.
- Performed functional testing, regression testing, exploratory testing API testing and UAT testing.
- Involved in functional testing of SOAP and RESTFUL web services using Postman.
- Reviewed manual test cases thoroughly and developed efficient automation scripts with Selenium WebDriver using Java in Eclipse.
- App Centre was used to download QA Builds for Android, Gmail was Used for iOS and Test Flight was used for Regression Builds.
- Used Charles Proxy to interrupt API call for Error Scenarios and faking API Response to see and verify the behavior in PROD & QA.
- Conducted Accessibility testing to verify the navigation and the Alt text with the native Accessibility function in Android and iOS.
- Performed transactions in App & Web for QA & Prod environment like Bill payment and Data Top Up's.
- Involved in designing and developing data driven framework using Selenium Web Driver.
- Performed Cross browser compatibility testing using Selenium WebDriver and Selenium Grid.
- Defect information is entered in Jira using Zephyr plug-in and followed up with team to ensure that they are closed.
- Worked in developing and maintaining Automation Framework using Java/Selenium, Maven, Appium and TestNG.
- Implemented Simulator for mobile app testing in IOS and Android platform using Appium Tool.
- Good Knowledge of using BDD Frameworks like Cucumber.
- Cucumber was used for the entire regression testing and functional testing with Selenium as primary tool to the Test Scenarios, Testcases and Test conditions identified.
- Performed UI and API testing using Cypress and created framework from scratch.
- Used GIT as code repository and Code Collaborator to manage code reviews.
- Worked effectively with the developers and product owners in Agile team to increase the productivity and quality of the applications.
- Fulfilled data accuracy, data validation and data integrity testing by querying the database using SQL queries to check the data table on server. Conducted back-end testing using SQL queries to validate data for database.
- Effectively involved in Defects logging, tracking, and managing Defect Life Cycles using JIRA.
- Tested native and hybrid applications on various devices, iOS, and Android operating systems.

Environment: Selenium Web Driver, Selenium Grid, Java, JavaScript, Eclipse IDE, Night Watch, Circle CI, Postman, BDD, Jira, Git, Bit Bucket.

Client Name: IKS Inventurus Knowledge Solutions.

Role: Quality Analyst.

Duration: April 2017 to May 2018.

Roles & Responsibilities:

- Research, define and write accurate, detailed, organized user stories and acceptance criteria based on product goals and business objectives.
- Created Traceability Matrix for the entire project using Jira, which clearly identifies the test cases, pass, fail criteria and reports graph.
- Involved in automation environment setup using Eclipse, Java, Selenium WebDriver jars and TestNG.
- Reviewed the user stories assigned to me in JIRA, created automated test cases for those features and tested accordingly.

- Used JavaScript libraries like Karma, Jasmine, Protractor along with Selenium web driver API for UI test execution assertions.
- Raised defects while doing System Integration Testing, cross browser compatibility testing and regression testing
- Tested SOAP and RESTFUL web services applying assertions on response time, status code, response type, response header, post method check, String response and authorization in Postman
- Developed user scripts using Load Runner's Web (HTTP/HTML), Citrix and Web Services protocols based on the user workflows.
- Performed automated acceptance tests written in Java implementing BDD Framework using Cucumber.
- Implemented Java Mail to send the regression result automatically.
- Created data-driven automation scripts for testing REST full Services using Postman.
- Installed and configured Dynatrace agents on the application server to collect the server stats and communicate to the Dynatrace client.
- Used Monitoring tool dynaTrace for performing in-depth analysis to isolate points of failure in the application.
- Performance Monitoring, Bottleneck findings, Tuning using Java VisualVM, App Dynamics, etc.
- Used HP tools Quality Center (QC), LoadRunner, QTP, Performance Center and JMeter Open-source tool for Performance Testing.

Client Name: Magus IT Solutions.

Role: Manual Tester.

Duration: June 2015 to January 2017.

Roles & Responsibilities:

- Involved in analyzing the Functional Requirement Documents (FRD).
- Involved in the development of test strategy, test plans and test cases based on the application requirement documents.
- Detecting the bugs and classifying them based on the severity and reporting.
- Involved in Functional Testing, GUI Testing and Compatibility Testing.
- Created test suites using TestNG framework and TestNG annotations.
- Developed test code in Java language using Eclipse IDE and TestNG framework.
- Run smoke/sanity test suites before accepting the build.
- Performed Retesting and regression testing after bug fix to make sure the updated build does not affect the functionality of existing features.
- Generated Bug Reports and Test case coverage reports for status meeting and involved in resource planning for test cases coverage
- Planned, Designed, Developed and executed User Acceptance Testing (UAT) test cases.
- Involved in code review meetings and weekly walk through to verify the status of the application testing and discuss the defects.
- Delivering test summary reports.

ACADEMICS

Bachelor of Commerce (B.com) from Osmania University, India - 2015
