PROFESSIONAL SUMMARY

- Around **10** years of hands-on experience in Mainframe technologies - **COBOL, JCL, DB2, VSAM and IBM tools and utilities**.
- I've worked on all phases in the software development life cycle, from requirement Analysis, Design, Coding, Testing to Production Support. My experience spans across business verticals like Healthcare, Retail, Banking, Financial Services & Manufacturing.
- Good analytical ability & communication skill, adept in working with diverse teams as well as independently.

WORK EXPERIENCE

- **IBM DB2 V 10.1** Certified Professional.
- Advanced level programming using COBOL, DB2 batch programming using JCL and PROC.
- Good experience in working with Mainframe tools & utilities like FileAid, ChangeMan, Endeavor, Xpedit, SPUFI, QMF, Jobtrac, BMC Tools, Syncsort, Abendaid, DFSORT, ICETOOL.
- Adept at Waterfall and Agile Software Development Life Cycle (SDLC)
- Knowledge of AWS, EC2, networking, source code management, GitHub, Jenkins pipelines, and CI/CD(DevOps principles).
- Strong development experience and debugging skills.
- Compliant with IT policies and procedures, especially those for quality and productivity standards.

TECHNICAL SKILLS

Programming Languages	COBOL, JCL,SQL, SparkSQL, Scala
DBMS	DB2, VSAM, SQL, DB2 Utilities,Snowflake,Apache Spark,AWS Cloud
Tools	TSO/E, ISPF, QMF,QEDIT, FILEMASTER, File-AID Debugger: XPEDITOR Scheduling: CA7, Control-M
Methodologies	Waterfall,Agile
Configuration Management Tools	ENDEVOR, Changeman

EDUCATION

June 05 – June 09

Bachelor of Engineering, Electronics & Telecommunication, University of Pune, Maharashtra, India

PROFESSIONAL EXPERIENCE

LTIMindtree,Mumbai.

Project Name/Client: American Express/Offshore

Duration: Mar '22 – Jan '23

Description	Amex Financial project
Technology	COBOL, JCL , DB2
Responsibilities	• Acted as liaison between business and technology teams to refine the product and incorporate features based on market demands • Participated in daily stand ups and mitigated impediments during the sprint in terms of issues and risks • Perform user acceptance testing • Post implementation validation

Enterprise Solutions, Inc./Wipro,Chicago,IL,USA.

Project Name: Capital One Card Partnership Data platform/Capital One/ Chicago,IL,USA

Duration: Jan 19– Aug ‘19

Description	Capital One Card Partnership Data platform
Technology	COBOL, JCL , DB2 , Snowflake
Tools	File-Aid, Changeman, Sort Utilities,TOAD, Github,JIRA
Role	Data Engineer
Responsibilities	1. Analyze various legacy ETL modules, complex job flows, table loads and analytical reports (built using COBOL, IBM Mainframe) understand and document the complex data transformation functions, business rules, job level dependencies. 2. Reverse engineering the legacy ETL (Extract, Transform and Load) code base to build the metadata and translate them into functional/technical specifications 3. Performed extensive data profiling on the existing source platform 4. Build and code the ETL / data integration requirements using Unix, Python with Spark and data load scripts to load and store data in cloud enabled Datastores like Postgres,Onelake,Redshift and Snowflake. 5. Perform PGP Encryption and decryption for sensitive data while sending from Capital One to the external system. 6. Convert data formats from EBCDIC to ASCII and vice versa. 7. Participate and contribute in all agile ceremonies - Story grooming, Sprint planning, Daily stand ups, raising impediments using Jira and other tools defined for Agile ceremonies. Demonstrate product at end of each sprint to the Product owner and get acceptance, using working code demo, documentation and other deliverables.

Genpact Headstrong Capital Markets,USA.

Project Name: Mail Order –LINKS/CVS Caremark/ Chicago,IL,USA

Duration: Jul 18– Nov ‘18

Description	Leveraging Integrated Networks, Knowledge and Systems (LINKS) is the Prescription Management system for the Mail Order Pharmacies. Prescription orders are received from multiple channels including: Portal, IVR, PeopleSafe, Electronic Prescriptions, Fax, FastStart, and postal mail (via Order Entry). The prescriptions are translated from what the doctor wrote into a specific drug within the LINKS database.
Technology	COBOL, JCL , DB2 , CICS, MQSeries,Java
Tools	File-Aid, Changeman, Sort Utilities,TOAD
Role	Mainframe developer
Responsibilities	As a developer perform following day to day activities:
	☐ Code, test and debug application programs
	☐ Preparing the Unit test plan and executing unit test cases
	☐ Involved in Implementation activities

Genpact Headstrong Capital Markets,USA.

Project Name: CDH Adjudication/CVS Caremark/ Chicago,IL,USA

Duration: Apr 18– Jun 18

Technology	COBOL, JCL , DB2 , MQSeries
Tools	Spufi, File-Aid, Changeman, Sort Utilities,TOAD
Role	Mainframe developer
Responsibilities	As a developer perform following day to day activities:
	☐ Code, test and debug application programs
	☐ Preparing the Unit test plan and executing unit test cases
	☐ Involved in Implementation activities

BC Forward/Accenture,USA.

Project Name: Membership Reverse Eligibility/H CSC/Chicago,IL,USA

Duration: Apr 17– Mar 18 (12 months)

Description	Production Support for Membership Application
Technology	COBOL, JCL , DB2 , VSAM
Tools	Spufi, File-Aid, Endeavor, Sort Utilities, Zeke Scheduler,ServiceNow
Role	Production Support Analyst
Responsibilities	As an Application Support Analyst perform following day to day activities:

	☐ Identifying and solving issues within multiple components of critical business systems.
	☐ Providing resolution of critical issue over technical calls including multiple stakeholders
	☐ Performing reviews and implementation of system upgrades and/or enhancements and make recommendations to management on opportunities for improvement.

TATA CONSULTANCY SERVICES LTD.

Project Name: Warranty Applications – Aftersales (Global Services) / Chrysler/ Offshore

Duration: Jun 15 – Feb 16 (8 months)

Description	Warranty Operations is the business process that manages Warranty and post warranty support activities that include • Warranty Registration • Vehicle Warranty • Claims submission • Claims processing • Claims Payments • Service Contracts • Reporting and Analysis
Technology	COBOL, JCL , DB2 , IMS DB/DC,Easytrieve
Tools	Spufi, File-Aid,QMF,Sort Utilities,CA7
Role	Senior developer
Responsibilities	As a senior programmer I was actively involved in the below phases of project: ☐ Develop program specifications /detail design documents ☐ Code, test and debug application programs ☐ Drive UAT with customers ☐ Involved in Implementation and post implementation activities

TATA CONSULTANCY SERVICES LTD.

Project Name: Extended Vehicle Protection (EVP) – Aftersales (Global Services) / Chrysler/ Offshore

Duration: Oct 14 – May 15 (8 months)

Description	The Mopar Vehicle Protection business group in Chrysler is launching a dealer Private Label program which will allow a dealer to sell MVP service contracts under their own private label brand name such as AutoNation Service Contracts. Mopar will still underwrite the service contracts and receive the sales revenue but any Mopar/Chrysler branding cannot be used for any customer facing information or documents. Additionally the Mopar/Chrysler branding should not be used for any dealer facing information. This will allow MVP service contracts to be sold at Non-Chrysler stores and provide additional sales and revenue for the MVP business group. This program will require system enhancements to hide or replace any Mopar or Chrysler branded content, screens, reports, etc.
Technology	COBOL, JCL , DB2
Tools	Spufi, File-Aid,QMF,Sort utilities
Role	Senior developer
Responsibilities	As a senior programmer I was actively involved in the below phases of project: ☐ Develop program specifications /detail design documents ☐ Code, test and debug application programs ☐ Drive UAT with customers ☐ Involved in Implementation and post implementation activities

INFOSYS LTD.

Project Name: Card Member History Database/ American Express / Offshore

Duration: Dec 12 – Sep 14 (1 year 10 months)

Description	The CMHDB is the central repository of all existing and former customers (card and transaction information), corporate and SE's who own various products offered by American Express. This information is extracted from different systems of AMEX and stored in DB2 backend database on daily, weekly and monthly frequencies for JAPA, EMEA & LAC Regions. It's known as the 'Card Member History Data Base' for the Amex Technology, since from their view, it's a system which gathers various historic information for warehousing data. It's the Business which interprets the extracted information and they often refer to it as the 'Customer Marketing History Data Base'.
-------------	--

	The Technology side is responsible for extracting the various details and the Business group interprets the data for various marketing purposes.
Technology	COBOL, JCL, DB2, VSAM
Tools	SPUFI, FILE –AID, QMF, Changeman, Xpeditor, HP Quality Centre
Role	Senior Programmer
Responsibilities	As a senior programmer I was actively involved in the below phases of project:
	☐ Develop program specifications /detail design documents
	☐ Code, test and debug application programs
	☐ Assist users in testing and preparation for operations
	☐ Involved in Implementation and post implementation activities

INFOSYS LTD.

Project Name: System On Line Dealing - GTSA/ Barclays / Offshore	
Duration: Jun 12 – Nov 12 (6 months)	
Description	AD provider to Barclays Commercial for SOLD and GTSA application and provide the best optimal solutions.
Technology	SCOBOL, Tandem Advanced Command Language (TACL), Nonstop SQL
Role	Senior Programmer
Responsibilities	As a team member I was actively involved in the below phases of project :
	☐ Develop and review artefacts (Code, Documentation, Unit test scripts)
	☐ Perform self as well as peer reviews.
	☐ Unit testing of the developed code.
	Offered production support which involved responding to the issues assigned, do analysis, suggest / implement workaround

ZENSAR TECHNOLOGIES

Project Name: Waitrose – Extended Non Food / JLP/Offshore	
Duration: Sep 11 – Feb 12 (6 months)	
Description	The Waitrose ENF project allows Waitrose to take complete ownership of the stock in the Waitrose stores. Waitrose will: - Buy products direct from suppliers - where non-food sale quantities are sufficiently large, - Buy stock from John Lewis - where non-food quantities are not large enough to justify placing orders directly with a supplier. John Lewis will receive order requirements from Waitrose and deliver the stock to the Celestia, the new Waitrose distribution centre. The functionality is initially being developed specifically for the sale of John Lewis products to Waitrose, but it could be used for other Business to Business sales in which John Lewis may engage.
Technology	COBOL, DB2, JCL
Role	Developer
Responsibilities	As a team member I was actively involved in the below phases of project :
	☐ Develop and review artefacts (Code, Documentation, Unit test scripts)
	☐ Perform self as well as peer reviews.
	☐ Unit testing of the developed code.
	☐ Offered production support which involved responding to the issues assigned, do analysis, suggest / implement workaround.

ZENSAR TECHNOLOGIES

Project Name: Branch Number Change / JLP/ OFFSHORE	
Duration: Jun 11 – Aug 11 (3 months)	
Description	The John Lewis Partnership 69,000 partners own the leading OFFSHORE's retail businesses - Waitrose, John Lewis and Green Bee. The profits and benefits created are shared by all the partners and this defines the unique company. To provide resolution for the current problems being experienced by John Lewis Systems in respect of Branch Number Provision. At present there are only a small number of numbers which we can be used for new branches. The Branch Number project is intended to provide JL Systems with the infrastructure necessary to use a greater range of 'Branch' numbers than that are at presently available.
Technology	COBOL, DB2, JCL, VSAM
Role	Developer
Responsibilities	As a team member I was actively involved in the below phases of project:

	☐ Code enhancement as per the business requirements
	☐ Unit testing and system integration testing of the developed code.
	☐ Offered support during the testing phase.

ZENSAR TECHNOLOGIES

Project Name: Stock Optimization / JLP/ OFFSHORE

Duration: Dec 10 – May 11 (6 months)

Description	A systems development project that supports the capital plans of the business, enabling the efficient delivery of the stocking up element of occupation during a new shop opening or relocation. To include planning, reservations and allocations of stocks through the design of a new system and reporting.
Technology	COBOL, DB2, JCL
Role	Developer
Responsibilities	As a team member I was actively involved in the below phases of project : ☐ Development of code as per the business requirements ☐ Unit testing and system integration testing of the developed code. ☐ Offered support during the testing phase. ☐ Handled knowledge sharing session and guidance sessions for trainees in the project.

ZENSAR TECHNOLOGIES

Project Name: Gift List & Special Ordering Admin/ JLP/ OFFSHORE

Duration: Sep 10 – Nov 10 (3 months)

Description	GL & SO Admin Project to create a centre of excellence for all Gift List and Special Orders administration and customer contact in the new Hamilton Contact Centre near Glasgow. A centralized operation managing remote customer contact and administration for Gift Lists and non-complex customer special orders for all branches, achieved with minimal systems changes
Technology	COBOL, DB2, JCL
Role	Developer
Responsibilities	☐ As a team member, involved in the activities of Analysis, Design, Development, Unit & integration testing, Implementation and extended support to Post-Implementation. ☐ Played a key role in coordinating the activities, understanding the existing business requirement and translating them into design specifications. ☐ As a key team member, involved in Development, Testing and Baseline Production Support activities.

ZENSAR TECHNOLOGIES

Project Name: Product Hub Support/ JLP/ OFFSHORE

Duration: Apr 10 – Aug 10 (5 months)

Description	John Lewis had planned to use IBM tool as their Product Information Management (PIM) System. It was, however, realized that the tool has certain limitations in terms of performance, response times and scalability. A need was therefore felt to replace the existing tool and Assortment systems with an in house developed tool – Product Hub. Zensar in collaboration with the core John Lewis Systems (JLS) team was involved actively during all the Project stages right from Requirements Analysis, Design through end to end development & testing of the new Product Hub system. The application is about product information management for the retail business. The product for John Lewis is the final Item that is getting sold to the end consumer. The various types of Products that will be maintained into the system are – E - Electrical appliances H - Home appliances T - Technology appliances F - Fashion Products (Men, Women, Baby, Gift etc)
Technology	COBOL, DB2, JCL
Role	Developer
Responsibilities	As a team member I was actively involved in the below phases of project: ☐ Handled Production Support for Product Hub application everyday by fixing jobs within the SLA times. ☐ Coordinated with onsite in resolving critical production issues. ☐ Worked as a key person on Product Hub support project and worked in ABEND analysis, and provided the best solution to fix the High occurrence ABEND. ☐ Handled production fixes which involved implementing complex Db2 queries

ZENSAR TECHNOLOGIES**Project Name: Vagen Testing/ JLP/ OFFSHORE****Duration: Nov 09 – Mar 10 (5 months)**

Description	Visual Age Generator is currently being phased out from John Lewis systems. This is due to the fact that IBM is withdrawing support of this product and is due to be phased out in last quarter of 2011. So the whole system is supposed to get converted into the CICS, COBOL, and DB2 and thoroughly tested before its deployment.
Technology	VAGen, COBOL, DB2, JCL
Role	Tester
Responsibilities	As a team member I was actively involved in the below phases of project :
	☐ Preparation of high level and low level test plans
	☐ Preparation of test data according to business requirement
	☐ Unit testing by writing the Test Prep, system testing of the converted modules
	☐ Root cause analysis of the defects found in the converted code
