WORK EXPERIENCE

Senior UX Designer | Johnson and Johnson Medtech

January 2024 – January 2025

- Designed intuitive platforms for orthopedic surgeries (hip and knee replacements), resulting in a 15% improvement in user satisfaction
- Optimized facial reconstruction surgery project timelines by 25% through streamlined workflows, iterative design enhancements, and converting the web view into a mobile version, making it more efficient and user-friendly
- Contributed to the development of a unified design system, reducing design inconsistencies by 30% and increasing user retention by 20%
- Awarded the INSPIRE GROW award for leadership in proposing mobile app designs with exceptional UX functionality

UX Researcher and Designer | Luddy School of Informatics and Computing (IUI)

August 2022 – March 2024

- Led user research and contextual inquiries involving 35 healthcare providers and nurses, translating key insights into a 65% improvement in the NeoRoo app's newborn care workflows, thereby enhancing usability and efficiency across diverse clinical settings
- Engaged Kenyan healthcare providers for an NSF-funded project, broadening cultural and contextual understanding and refining app usability for a global user base, ultimately promoting equitable healthcare solutions
- Mentored Google Summer of Code '23 contributors throughout the development cycle, achieving a 90% project completion rate and ensuring integration of features into the app, further strengthening the user experience for healthcare professionals worldwide

UI/UX Designer | Enovation Controls

June 2023 – August 2023

- Redesigned digital interfaces for speed boats, trucks, and vans using modern design principles, streamlining workflows and boosting product performance
- Conducted 20 usability interviews, think-aloud analyses, & system usability tests to address critical pain points, raising device usability by 35%
- Prototyped an integrated marine app for 18 devices, collaborating with stakeholders on iterative feedback to deliver a user-centric solution

UX Business Consultant | Ernst and Young LLP

November 2020– July 2022

- Reduced underlying IT risk by 75% by applying user-centric testing methodologies and implementing iterative design improvements for critical workflows, ensuring compliance integration while enhancing usability and user satisfaction across enterprise platforms
- Spearheaded six large-scale statutory audits for global financial services clients, aligning stringent compliance requirements with intuitive user experiences to minimize friction, uncover actionable insights, and strengthen risk mitigation strategies
- Developed an automated Excel Macro that increased testing efficiency by 92% and cut manual effort by 55%, enabling the team to allocate more time to UX strategy, innovation, and value-added initiatives throughout the project lifecycle

Product Designer | Fitpeo

May 2019– October 2020

- Performed in-depth user surveys with 11 patients aged 50+, prompting a comprehensive Fitpeo app redesign that embraced a neomorphic design approach and tackled key usability issues, ultimately boosting senior-user engagement and satisfaction
- Elevated accessibility by 55% while reducing healthcare provider workload through carefully structured information architectures for Chronic Care Management (CCM), Remote Patient Monitoring (RPM), and Behavioral Health Integration (BHI) modules, improving user efficiency
- Collaborated closely with developers to build a high-performing website using HTML, CSS, JavaScript, and Angular, which contributed to a 5-star customer satisfaction rating and drove a 40% revenue increase, underscoring the success of an enhanced user experience

PROJECTS

CulturVerse - Sustainable Cultural Tourism for Mobility Disabled people

- Designed an AR/360° platform enabling 3.6 million housebound Americans and 1.3 billion individuals worldwide with disabilities to virtually access cultural landmarks
- Engaged local volunteers to provide real-time guidance, fostering genuine cultural exchange and community involvement
- Addressed a \$1.2 trillion post-pandemic tourism gap by creating sustainable revenue streams, promoting inclusive global tourism, and supporting long-term cultural growth

FitGamer - Video Game Addiction

- Designed an app solution targeting a global audience of 2.5 billion gamers, with 45% exceeding recommended screen time
- Applied heuristic evaluations & think-aloud testing to refine UX, reducing achievement confusion by 30%, boosting event participation by 20%
- Introduced a buddy system predicted to cut sedentary gaming sessions by 15%, fostering healthier habits and sustained user engagement

EDUCATION

Indiana University Indianapolis

August 2022 - May 2024

Master of Science - Human-Computer Interaction | GPA: 3.98

- Awards: Merit Scholarship \$9000, Google Summer of Code Mentor - LibreHealth, Lightning Talk Speaker at Richard Tapia 2023 Conference

University of Mumbai

July 2016 - August 2020

Bachelor of Engineering - Information Technology | GPA: 3.75

- Awards: Winner of Smart India Hackathon 2020, Gold Medalist in Chess, 2nd place in Design thinking competition

SKILLS

Design Methods: Interaction Design, Visual Design, Design Systems, Wireframing, High-Fidelity Prototyping, Information Architecture, Accessibility

Research Methods: User Research, Contextual Inquiry, Usability Testing, Surveys, Personas, Heuristic Evaluation, A/B Testing, Affinity Mapping

Tools and Technologies: Figma, Adobe XD, Sketch, HTML/CSS, React JS, Python, Jira, Webflow, Illustrator, Microsoft Excel, PowerPoint, CMS
