

Senior Network Engineer

SUMMARY:

- Network Engineer with 8 years of expertise in Routing, Switching and Firewall Security including network planning, implementing, configuring, and troubleshooting network devices.
- Hands on experience in configuring Cisco Catalyst 2960, 3750, 4500, 6500 series, and Cisco 2600, 2800, 3600, 3800, 7200, 7600 series routers, Cisco Nexus 7000 series, 5000 series, 2000 series datacenter switches, Juniper EX/ MX/ SRX series.
- Troubleshooting of complex network systems including high-end routers: CISCO GSR, ASR1K, ASR9K, 2600, 2800, 3600, 7200, 12000 Series Routers, and Catalyst 4500, 6500, and 7600 switches.
- DataCenter Expertise: Strong expertise in Cisco (Switches, Routers, Nexus, ACI, ASR 9k), Juniper (Switches, Routers), F5/NetScaler Load Balancers, and Citrix Load Balancer. Familiar with Spine Leaf Architecture, VSS, VPC, VDC, EVPN, VXLAN, and MP-BGP.
- Proficient in Configuring Virtual Local Area Networks (VLANs) using Cisco routers and multi-layer Switches and supporting STP, RSTP, PVST, RPVST along with trouble shooting of inter-VLAN routing and VLAN trunking using 802.1Q.
- Experienced in planning and development of designs for Migrating to AWS cloud.
- Implemented redundancy with HSRP, VRRP, GLBP, Ether channel technology (LACP, PAgP) etc.
- Extensive knowledge and experience in configuring protocols like TCP/IP, Routing Protocols (RIP v1/v2, OSPF, BGP, IGRP and EIGRP).
- Experience with F5 load balancers for load balancing and network traffic management for business applications.
- Experience with Cisco ASA/Checkpoint/Palo Alto Firewall/Fortinet troubleshooting and policy change requests for new IP segments that either come online or that may have been altered during various planned network changes on the network.
- Worked with the team of network engineers to design and implement industry leading SDWAN infrastructure to provide secure, carrier-independent WAN connectivity across the enterprise.
- Hands on in deployment of GRE tunneling, SSL, Site-Site IPSEC VPN and DMVPN.
- Experienced working on network monitoring and analysis tools like SOLAR WINDS, CISCO works, RIVERBED and Wireshark.

TECHNICAL SKILLS:

Cisco Routers: Cisco1800, 2500, 2600, 2800, 3600, 3750, 3800, 7200, ASR 1K and 9K.

Cisco Switches: 6500, 7600, 5800, 2900, 4000, 3500, 4500, 5000, Nexus 2K, 3K, 5K and 7K,9K, MSFC, MSFC2.

Cisco Nexus: 5020, 5548, 5596T, 2148, 2248TP, 2348UPQ, 7010, 7702.

LAN Technologies: Ethernet, Fast Ethernet, and Gigabit Ethernet, SMTP, VLAN, Inter-VLAN Routing, VTP, STP, RSTP, Light weight access point, WLC.

WAN Technologies: Frame Relay, PPP, HDLC, (E1/T1/E3T3), DS3, OC192.

Network Security: Cisco ASA, ACL, IPSEC.

OS products/Services: DNS, DHCP, Windows (2000/2003/2008, XP), UNIX, LINUX. PAN OS.

Routing Protocols: OSPF, EIGRP, BGP, ISIS, VRF, PBR, Route Filtering, Redistribution, Summarization, and Static Routing, RIP

Gateway Load Balancing: HSRP, VRRP, GLBP, EGBP

Various Features / Services: IOS and Features, IRDP, NAT, SNMP, SYSLOG, NTP, DHCP, CDP, TFTP and FTP.

Network Management Tools: Wireshark, NetFlow Analyzer, Cisco Works, Ethereal, SNMP, HP open view.

Security Server Protocols: TACACS+, RADIUS.

Facilities: DS0, DS1, DS3, OCX, T1/T3

Load Balancers: Cisco CSM, F5 Networks (BIG-IP) LTM 8900, BIG-IP GTM 6800, Cisco ACE 4710.

Operating Systems: Windows (98, ME, 2000, XP, Server 2003/2008, Vista, Windows 7/8), Linux, UNIX, WINTEL

Firewall & Security: Checkpoint (R62, R65, R70, NGX), Cisco ASA, Palo Alto, Juniper SRX, FortiGate 5000-series.

EXPERIENCE:

Client: US Food, CT (Remote)

Role: Senior Network Engineer

Jun 2022 – Present

Responsibilities:

- Installing, configuring, and administrating Nexus models like 7010, 5548, 5020, 2148, 2248 devices
- Dealt with Cisco router models like 7200, 3800, 3600, 2800, 2600, 2500 and 1800 series, Cisco catalyst 6500, 4500, 3750, 3500 and 2900 series switches.
- Extensive experience in layer-3 Routing Protocols OSPF and BGP. and layer-2 Switching.
- Deploying and decommissioning the VLANs on core ASR 9K, Nexus 9K,7K, 5K and its downstream devices.
- Working on Cisco 6509 and 4507 series switches for LAN requirements that include managing VLANs, Port Security and troubleshooting LAN issues.
- Cisco Nexus 9000 Series Switch ACI Solution troubleshooting and integration with VMware.
- Configuring Cisco ACI External Connectivity, Management, and application Migration.
- Actively involved in the datacenter migration from Cisco to Arista, ensuring minimal downtime and utilizing Vx LAN, with a specific emphasis on ASR 9k integration.

Senior Network Engineer

- Collaborated on the design and deployment of DNAC solutions for a more agile and responsive network infrastructure.
- Responsible for troubleshooting on Cisco ISE added new devices on network based on policies on ISE.
- Responsible for assisting with configuration of Palo Alto Firewalls utilizing Panorama and upgraded the branch office and datacenter Palo Alto models.
- Assisted in Migrating checkpoint 41k firewalls to Palo Alto 5250 and Installing Virtual Appliance (Palo Alto VM) in Azure Cloud.
- Worked on Cisco ISE to prevent unauthorized access to the network.
- Designing Networks for voice and data networks over LAN and WAN. Designing, Implementing and Managing WLAN Distribution Network.
- Installed and configured LAN/WAN as per organizational / client requirements, governed by communication protocols.
- Experience with Tools such as Expedite and AlgoSec to have the Rules compliant with Security Postures and Completed Firewall rule consolidation Project.
- Experience with next gen firewall technology like URL Filtering, SSL Forward Proxy, APP ID, Threat ID etc. on Palo Alto and checkpoint firewalls.
- Involved in Datacenter migration projects from the legacy datacenter to ACI (Application Centric Infrastructure).
- Responsible for Palo Alto, Checkpoint firewall management and operations across our global networks.
- Deploying and managing SDWAN solutions (Viptela, Citrix) for large-scale enterprises Experience with configuring FCOE using Cisco nexus 5548 Part of the New Product development team and responsible for User Acceptance Testing (UAT), SDWAN, Viptela, Versa, Meraki.
- Deployment of Prisma Access, Implemented the Global Protect VPN, IPsec VPNs and SSL VPNs through IKE and PKI on Palo Alto firewalls for site-to-site VPN Connectivity.
- Deployed and managed Aruba CX series switches to provide high-performance, scalable, and reliable network connectivity for enterprise environments, ensuring seamless integration with Aruba AOS infrastructure.
- Worked on AWS and Azure cloud configurations with respect to network connectivity and Security.
- Worked on configuring VNETs, Security Groups, Direct Connect, Express Routes, troubleshooting EC2 instances, Installation of Infoblox, Palo alto firewalls in different AZs.
- Installed and configured Firepower Management Center 6.0 on VMware and added ASA Sourcefire Agents as well as Firepower NGIPS for monitoring and management.
- R77 R80, NSX, Juniper SRX, Palo Alto with Panorama, Cisco ASA, and Fortinet), perform firewall rules risk assessment, design and optimize firewall rules/Policies with Tufin.
- Configured and managed Aruba AOS and CX switches, routers, and other network devices to provide high-performance, reliable, and scalable LAN connectivity for enterprise environments.
- Firewall troubleshooting and Implementing policy change requests for new IP segments that either come inline or that may have been altered during various planned network changes on the network.
- Maintenance & Upgrades of PAN OS of various models like 400, 5000,7000 and other series models in our branch offices and datacenters and panorama (active & passive) to latest PAN OS version as recommended palo alto TAC.
- Configured Palo Alto Firewalls with multiple zones based on traffic segregation requirements including DMZ and perimeter.
- Migrated Virtual Machines and applications from on premises cloud to AWS.
- Created Data-filtering profiles in Palo Alto devices which helps to prevent sensitive information.
- Worked on Application traffic security with WAF, F5 ASM, F5 APM for Authentication, Citrix NetScaler's for ICA proxy, Citrix VDI, Microsoft Office 365, Azure AD.
- Utilized Aruba Airwave for WLAN monitoring and troubleshooting, identifying and resolving connectivity issues, RF interference, and performance bottlenecks to ensure optimal WLAN performance.
- Worked on AWS, Zscaler Cloud based proxies, Cisco IronPort proxies and Blue Coat.
- Setting up and Managing Virtual Machines on AWS Cloud including working on EC2, Route53, RDS, Lambda.
- Responsible for design and implementation/migration from Cisco wireless platform to Aruba wireless platform.
- Firewall Policy provisioning on Palo Alto devices using Web UI as well as PANORAMA.
- Provided day-to-day operational support for all firewall and VPN platforms including Checkpoint and Palo Alto firewalls.
- Performed upgrades on Pan OS devices in High Availability pair.
- Firewall OS upgrades and Maintenance of OS up maintain dates as part of addressing Vulnerabilities on Firewalls.
- Configured rules and Palo Alto Firewalls & Analysis of firewall logs using various tools.
- Provide support for Cisco SDWAN fabric devices. Troubleshoot and resolve complex network issues.
- Security Policy, Provisioning, Managing Security zones and interface configurations on Palo Alto Firewalls.
- Build SolarWinds Environment - Primary Server, SiteScope HA servers, Polling Servers, NTA DB, DPA 12.0 servers.
- Worked on a project replacing the Aruba APs and AP controllers at some of the sites with Meraki and cloud management.
- Proficient in configuring and managing Fortinet's FortiGate firewalls to ensure robust network security and intrusion prevention.

Senior Network Engineer

Client: Fujitsu, Ct

Apr 2020 – May 2022

Role: Firewall Engineer

Responsibilities:

- Experience with switchport configuration and provided switchport assignments to the Datacenter technicians.
- Configured, created new firewall rules, and modified the existing rules on Palo Alto firewalls.
- Experience with decommissioning Palo Alto firewall rules and ports that are no longer used.
- Used ServiceNow and Jira for change management process.
- Managed Configuration, Logging and Reporting of Palo Alto firewall through the Panorama.
- Palo Alto Firewall specialist with good experience with specialization in network administration and network security.
- Decommissioned the Palo Alto firewall rules and the switches and the interfaces that are no longer needed in the infrastructure.
- Configuring PAN Firewalls and policies for the security of internal resources.
- Handled Software version upgrade on Palo Alto Firewalls (Pan OS).
- Building the broker connectivity from on-premises as well as Equinix datacenter.
- Scheduled day to day firewall related changes and seeking approvals if required for production impacting changes.
- Experience with IDS/IPS to identify threats in the network for rapid containment and remediation.
- Planning, designing, and Implementation of legacy MPLS and Internet sites to Viptela SDWAN.
- Designing, and implementing scalable cloud-based web applications using AWS and GCP.
- Implementation and troubleshooting of 802.11a/b/g/n technology with primary focus on Cisco Unified Wireless Network /Configure Aruba wireless Controller 7210.
- Designed, implemented, and managed Aruba WLAN solutions, including access points (APs), controllers, and ClearPass for authentication, ensuring seamless and secure wireless connectivity for users.
- Configure Service end point on the V net to connect to Azure services over an optimized route over the Azure backbone network.
- Configured and performed software upgrades on Cisco Wireless LAN Controllers 2504, 4404, 5508 for Wireless Network Access Control integration with Cisco ISE.
- Configured and maintained Cisco Meraki to manage Remote Branch office networks and Internet connectivity.
- Planning and development of designs for Migrating to AWS cloud.
- To perform an in-depth detailed analysis of bandwidth assessment of all the in-scope sites and finalize the bandwidth for new SDWAN circuits.
- Configuration and management of Cisco ASA firewall (5510, 5520), Fortinet 3061C, 400,800,300c, 100,40C, 80c firewalls, Checkpoint N-70,75, 76, SRX Juniper.
- Involved in design and implementation of several datacenter components into ACI.
- Conducted site surveys and RF planning to optimize WLAN coverage, capacity, and performance, minimizing interference and maximizing throughput for client devices.
- Shared the data with integrated partner solutions to accelerate the capabilities to identify and remediate threats using Cisco ISE.
- Troubleshooting of layer 2 and layer 3 issues.
- Deployed applications and host websites on AWS cloud involving blackboard.
- Ability to analyze, configure and troubleshoot networks, Performing Maintenance activities in Switches, Routers, and firewall.
- Configuring Aruba Controllers integrating with Cisco ACS and RADIUS servers for Dot1x authentication.
- Cisco ASA/Checkpoint Firewall troubleshooting and policy change requests for new IP segments that either come online or that may have been altered during various planned network changes on the network.
- Implementing of Site-to-Site and Remote access VPN and troubleshooting the VPN Connection issues on CISCO ASA firewall.
- Provided proactive threat defense with ASA that stops attacks before they spread through the network.
- Responsible for Cisco ASA firewall administration, Rule Analysis, Rule Modification.
- Involved in troubleshooting and resolving issues escalated by the NOC and internal systems, including developing, implementing, and deploying emergency hot fixes within a global network.
- Used Microsoft Visio for technical documentation.
- Monitoring all system alerts and Maintain asset management in SolarWinds.

Client: Otsuka Pharmaceuticals, NJ

Sep 2018 - Mar 2020

Network Engineer

Responsibilities:

- Installing, configuring, and administrating Nexus models like 7010, 5548, 5020, 2148, 2248 devices
- Experience in configuring vdc, fex pinning, fex port-channel, port-channel, peer keep alive, peer link.
- Experience in working and designing configurations for VPC, VPC domain, VPC peer-gateway, VPC peer-switch, auto-discovery, VPC single sided, VPC double sided, NX-OS, Vfr, Otv, fabric path.
- Experience with configuring Nexus 2000 Fabric Extender (FEX) which acts as a remote line card (module) for the Nexus 5000.

Senior Network Engineer

- Experience working with Layer 3 Routing Protocols OSPF and BGP.
- Configured and maintained VPCs with 7010/7018 and 5548 in the network and maintained VDCs in 7k switches, maintained VRFs in those separate VDCs.
- Worked on ACE, A10 load balancers.
- Responsible for assisting with configuration of Palo Alto Firewalls utilizing Panorama and upgraded the branch office and datacenter Palo Alto models.
- Experience with F5 load balancers - LTM, GTM series like 6400, 6800, 8800 for corporate applications and their availability.
- Experience consisting of Global load balancing, Local load balancing, SSL acceleration, HTTP compression.
- Involved in the modification and removal (wherever necessary) of BGP from the MPLS routers.
- Deployed & Implemented rules and created various zones in Palo alto firewalls like PA2020, PA2050. Maintain, and troubleshoot Cisco IOS SIP gateways and TDM trunks, plus VoIP UC servers, infrastructure, and application.
- Ability to analyze, configure and troubleshoot networks.
- Responsible for turning up BGP peering and customer sessions, as well as debugging BGP routing problems.
- Strong understanding in cloud, managing systems and networks in AWS Environment.
- Deploying, Scaling, and troubleshooting many DataCenters across all of AWS network fabrics.
- Hands on experience with Aruba 7200, 3600 series wireless controllers.
- Provided Desktop Support for internal users and Handled Service-Now tickets related to & Zscaler Proxy, Zscaler private access, Secure Pulse VPN and Aventail VPN along with the connectivity issues and escalating working with TAM whenever needed.
- Scripted Meraki devices to pull firewall logs in one command through Python.
- Establishing VPN tunnels using IPsec encryption standards and configured and implemented site-to-site VPN, Remote VPN
- Worked on troubleshooting and resolving issues escalated by the NOC and internal systems, including developing, implementing, and deploying emergency hot fixes within a global network.
- Experience in Intrusion Detection, DMZ, encryption, Zscaler proxy service, SSL VPN, Port-security, and policy-based routing.
- Configuring VLAN, Spanning tree, VSTP, SNMP on EX series switches
- Involved in a team for implementing MPLS VPN for the Branch locations.
- Handled deployment and management Checkpoint GAIA, R75, R71, R65 and Cisco ASA 5500 series.
- Implemented the numerous firewalls rules on the Checkpoint with both Hide Nat and Static NAT.
- DNS administration like adding/modifying/deleting IP and DNS assignments using log messages.
- (Cisco Fire Power (FTD) replacing ASA 5505 with ASA 5506 with FTD.
- Involved in Palo alto migration of 40+ ASA 5550.
- Worked on Firepower Management Center (FMC) to manage firewalls, application control, intrusion prevention, URL filtering and advanced malware protection. Deployed changes in Firewall.
- Responsible for Palo Alto, Checkpoint firewall management and operations across our global networks.
- Working with Palo Alto, Checkpoint Support for resolving escalated issues.
- Configured and designed LAN networks with Access layer switches such as Cisco 4510, 4948, 4507 switches.
- Provided technical support for expansion of the existing network architecture to incorporate new users.
- Worked extensively in Configuring, Monitoring and Troubleshooting Cisco's ASA 5500.
- Experience in Designing and assisting in deploying enterprise-wide Network Security and High Availability Solutions for ASA.
- Implementing Routing using the following protocols: IS-IS, OSPF, BGP on Juniper M series routers.
- Configured and deployed Cloud Lifecycle Management (CLM) DNS solution to automate IP address assignment and DNS record updating for new servers created in the CLM environment.

Client: Emerline, FL

Jan 2017 – Aug 2018

Role: Junior Network Engineer

Responsibilities:

- Experience in Cisco switches and routers: Physical cabling, IP addressing, Wide Area Network configurations.
- Migration of RIP V2 to OSPF, BGP routing protocols.
- Configured EIGRP for Lab Environment.
- Implemented ISL and 802.1Q for communicating through VTP.
- Installing, configuring, administrating arista switches in the datacenter using CVP.
- Working with Client teams to find out requirements for their Network Requirements.
- Designing solutions for frozen requirements using Cisco Routers and Switches.
- Deploying the network infrastructure to meet the requirements.
- Created VLAN and Inter-Vlan routing with Multilayer Switching.
- Monitor performance of network and servers to identify potential problems and bottlenecks.

Senior Network Engineer

- Served as primary NOC technical contact to investigate and resolve post-cutover Data Network trouble tickets, both hardware and software related.
- Implemented Zscaler products ZIA (Zscaler internet access) & ZPA (Zscaler private access) in Production.
- Performed administrative support for RIP, OSPF routing protocol.
- Maintained redundancy on Cisco 2600, 2800 and 3600 routers with HSRP.
- Real time monitoring and network management using Cisco Works LMS.
- Satisfactorily Resolved Problems in a timely manner with focus on providing a high level of support for all customers.
- Provide high level technical support, including identifying and resolving problems on Cisco for e-Commerce infrastructure.
- This included external routing and internal/intranet routing for DMZ servers.
- Designed VLAN's and set up both L2 and L3 logically to have it communicate to the Enterprise network.

EDUCATION:

Bachelor's in computer science - PNC & KR college - 2010

Master's in computer science - Sacred Heart university - 2023
