Skills

- **Business Domains -** Healthcare.
- **Programming -** SQL, T-SQL, PL/SQL, Python, Java,
- **Databases -** Oracle, SQL Server, MySQL, PostgreSQL, MS Access
- **Data Warehousing -** Star Schema, Snowflake Schema, ETL, Data Integration,
- **Reporting & Analytics -** SSRS, Power BI, Tableau, Excel
- **Performance Tuning -** Query Optimization, Indexing, Execution Plans, Database Performance Analysis
- **System Testing -** Unit Testing, Integration Testing, UAT, Data Validation
- **Version Control & Collaboration -** Git, GitHub, Bitbucket, GitLab
- **APIs & Web Services -** RESTful APIs, SOAP APIs (for integrating with databases)
- **Methodologies -** SDLC, Agile, Scrum, DevOps, Data Warehouse Lifecycle, ETL Process, ITIL
- **Advanced Workday Skills -** SQL Server Integration

Laksmi Sai Sindhu

Summary

With 4 years of experience as an **SQL BI Developer** with expertise in developing, optimizing, and managing data solutions using **SQL Server, T-SQL**, and various BI tools. Proficient in designing and implementing complex **ETL processes**, data models, and data warehouses for reporting and analytics. Skilled in using **SQL Server Integration Services (SSIS)** for data integration, and SQL Server Reporting Services (SSRS) and Power BI for report development, data visualization, and dashboard creation tailored to business needs. Proficient in integrating data from various sources using **ETL tools** and technologies, and performing data validation and cleansing to ensure data quality and accuracy. Skilled in data migration, system testing, and ensuring seamless integration between **SQL databases** and external applications. Strong knowledge of version control tools such as **Git** for managing database changes and collaborating with cross-functional teams

Experience

SQL BI DEVELOPER

Health Catalyst, South Jordan, UT | July 2023 - Present

- Involved in Gathering end user requirements, developed applications and different audit functionalities depending on the requirement acting for both system analysts and application developer.
- Generated complex T-SQL queries, sub-queries, co-related sub queries, dynamic SQL queries etc.
- Involved in package logging in both standards (SQL server and file based) and custom logging using customer stored procedure and tables.
- Performed daily DBA activities, security assignment, user setup, backup, restore and job monitoring on MS SQL Server
- Involved in developing parameterized reports using single values, multi values and cascading parameters.
- Designed Power BI reports and dashboards, integrating live connections with SSAS and utilizing DAX functions for advanced calculations
- Tune SQL statements using hints for maximum efficiency and performance, create and maintain/modify PL/SQL Packages, mentor others with the creation of complex SQL Statements.
- Provided mentoring and training on SQL, T-SQL best practices, and Power BI development.

Services (SSIS), SQL Server Reporting Services (SSRS), Power BI, Advanced Query Optimization

Education

University of North Texas

Master of Science: **Advanced**

Data Analytics

Strengths

- Data Integration Mastery
- Advanced SQL Query Writing
- Business Intelligence & Dashboard Creation
- Collaboration with Development & Business Teams
- Reporting & Analytics Proficiency
- Cross-Functional Collaboration
- Problem-Solving & Troubleshooting
- Data Modeling & Warehousing
- Training & Mentorship
- Adaptability
- Attention to Detail
- Communication
- Data Quality & Validation
- Performance Tuning & Optimization

- Involved in database design, normalization, de-normalization in building data warehouse and reporting systems.
- Collaborated with Business Analysts to gather technical requirements and translate them into effective SQL solutions
- Collaborated with cross-functional teams, including HR, IT, and Finance, to support business initiatives and ensure alignment.

SQL BI DEVELOPER

Cigna Healthcare Remote | June 2020 to Nov 2022

- The project is designed in two phase's data gathering and reporting, the data gathering part is done using SQL Server Integration Services (SSIS) and the reporting portion is built on SQL Server Reporting Services (SSRS) platforms
- Developed Tabular Reports, Matrix Reports parameterized Reports Sub reports, Snapshot and Adhoc reports (SSRS).
- Created SSIS Templates for developing SSIS Packages that can be dynamically deployed into development, Testing and Production Environments.
- Involved in creating various Database Objects - Tables, Indexes, Store Procedure, Trigger, Views, and Roles Improved Performance by creating Clustered and Non-Clustered Indexes and by optimizing the T-SQL statements using SQL profiler.
- Designed and developed different type of reports including Tabular forms, Dashboards, Matrix (cross Tab report) form, Conditional, List items, Charts and Sub reports, custom report, Drill down reports using SSRS.
- Applied Snowflake's security features, including Role- Based Access Control (RBAC), data masking, and encryption to safeguard sensitive data
- Maintain security, assign logins, permissions and desk support for problems related to Active Directory.
- Developed dashboards and key Performance Indicators (KPI) with SQL Server Reporting Services (SSRS) and Power BI
- Implemented ETL processes using Azure Data Factory to migrate campaign data into Azure Synapse.
- Scheduled Jobs for executing the stored SSIS packages which were developed to update the database on Daily basis.
- Maintain security, assign logins, permissions and desk support for problems related to Active Directory.
