

Snr . Mobile App Developer

I'm Joseph Okon Etim

Contact . United State Atlanta , Georgia USA

Phone : +1 (470) - 519 - 4725

Email : jetim186@gmail.com

Linkedin: www.linkedin.com/in/josephdev1

My Youtube Channel : <https://www.youtube.com/@codehouse2>

Skills

7+ years Software experience with 10k+ total app downloads

- Native Mobile App Developer With JAVA , XML and KOTLIN.
- Cross Platform Mobile Flutter App Developer IOS and ANDROID
- Experience in Using Frameworks Like REACT , FLUTTER , SPRING BOOT, NODE.JS to build Full stack applications
- I have worked remotely and used CI/CD tools like jenkins for continuous integration and deployments. Used GIT tools to deploy and push code.
- Expertise in applying software architecture and design patterns , principles to software problems and solutions
- Hands on JSON-WEB Services interaction and parsing using a VSC like GIT , and REST API
- Familiarity with testing tools and processes.
- AI/Artificial intelligence integration on mobile applications
- Solid understanding of mobile UI/UX best practices and standards.
- Extra Cloud and AWS SERVERLESS skills for micro services.
- Mentorship and training abilities .

Objective

Contributing collaboratively to teams, helping them build innovative products, learning new tools and growing with knowledge.

Proficient in backend development using javascript(NODE.JS) , JAVA SPRING BOOT and web applications with React.js . Driven by a belief in simplicity , iterative approaches , and data-driven decision-making to deliver impactful solutions

Experience

JAN 2022 - DEC 2024

MEDALLA , SWEDEN – *Senior Mobile Developer*

Mobile app impact : 900+ Users Downloads

Link To App : [MEDALLA LINK](#)

- Designed and built the CROSS - PLATFORM APP using FLUTTER , Integrating native code with KOTLIN as necessary.
- Implemented Authentication with the SWEDEN BankID system to ensure secure user access .
- Parsed JSON Responses from REST API endpoint
- Optimized Video Player and uploading processes using Flutter Library and packages including FFMPEG , enhancing performance and user experience
- Developed a job matching searching algorithms to effectively connect healthcare professionals with suitable job opportunities for ANDROID and IOS.
- Assisted WEB developers build few REACT.JS COMPONENTS for the com website
- Performed GIT ACTION and applied CI/CD through the development phase
- Interacted with the UI/UX DESIGN team and built Mobile UI .

JANUARY 2021 - JUNE 2021

KSBTECH – MOBILE DEVELOPER

Mobile app impact : 10k+ Users Downloads & 239 reviews

Link To App : [KSB TECH APP](#)

- Assisted in Design and developed the mobile application user interface(UI/UX) based on high-quality professional design mockups, ensuring a seamless and visually appealing user experience.
- Used Flutter to build the app and made use of Widget Trees for UI design
- Integrated RESTFUL-API endpoints to enable real-time communication between the mobile application and backend services , ensuring efficient data exchange and synchronization.
- Best STATE-MANAGEMENT practices were implemented using PROVIDER and optimized app performance to deliver a smooth user experience across various devices and SCREENS
- Conducted thorough testing and debugging to ensure the application met quality standards and functioned as intended in all scenarios

FEB 2020 - FEB 2022

DOMAIN EXPERTS GROUP , USA TEXAS- SENIOR SOFTWARE DEVELOPER

- Made and managed backend services using JAVA SPRING framework
- Helped to migrate legacy code base written in DOT.NET to JAVA SPRING .
- Changed and converted DATABASE communication between POSTGRESQL and DOT.NET to POSTGRESQL and JAVA Spring framework.
- Built FRONTEND APPS with Flutter for both DESKTOP AND MOBILE DEVICES
- Made use of CI/CD TOOLS like jenkins for automation and deployment.
- Collaborated with junior developers to help them understand code-base and review code.
- Built CROSS PLATFORM applications with FLUTTER , DART .

JANUARY 2018 - DECEMBER 2019

PAYHELPA (FINTECH) USA , TEXAS – FULL STACK DEVELOPER

Platform impact : 100+ Users Downloads

Link To App : [PAYHELP LINK](#)

- Built the WEB-SITE Using REACT and Built MOBILE APP with flutter collaboratively with team members
- I used FLUTTER on the MOBILE APP to interact with native features of the mobile application for Android and IOS.
- Interacted with Rest Apis using http library for post , get and put requests .
- Integrated Third Party Library in the flutter application
- Used GET-X for state management
- I used Kotlin on the mobile app to interact with native features of ANDROID
- Converted Figma Designs to real life mobile designs using flutter while working collaboratively with UI/UX team
- Test the app using jenkins for CI/CD and applied overall integration testing using both real and mocked data

JANUARY 2017 - DECEMBER 2018

VICTORY CHAPEL - *Mobile Native java and kotlin developer*

Link To App : [HYMN BOOK](#)

Church App : [Church App](#)

- Used Java to communicate with rest apis for mobile applications
- Designed Mobile apps with XML for android devices.
- Made sure to use Native Realm Database to cache and store frequently used data
- Tested the app using CI/CD tools
- Collaborated with teams members for update and reviews
- Accomplish good deployments to app store and had up to 5k users with good reviews
- Helped to Migrate from JAVA TO KOTLIN during upgrading phase.

CODEHOUSE2 - *Software mentor and tutor*

January 2016 – 2017 Jan.

Youtube link attached above

- Trained and helped in developing young intelligent individuals. Ensured they understood the

- core programming concepts and software design concepts
- Communicated and assigned students to various projects to help enhance their skills
- Started online tutoring to reach wider audience worldwide
- Assisted Students on their final year projects and personal projects.
- Created a social media community for online students worldwide to interact with each other
- I learnt a lot during these training sessions I have had over the years.
- Assisted in the development of online learning materials to assist learners as well as
- mentoring, and monitoring all activities as specified in the Hub
- I Made the tutorial Videos and thought the online students

Personal Projects

- **AI GOALKIT APP** AI driven goal tracker that helps users stay focused on their goals by reminding them to complete daily , weekly and monthly tasks through audio calls and push notifications powered by AI technologies.
- Link To App : [AI APP LINK](#)

TECHNOLOGIES USED FOR AI GOALKIT APP FLUTTER & DART (Mobile Frontend), NODE.JS, EXPRESS.JS (backend), OPENAI APIs, REACT.js for project landing page.

IMPACT OF AI GOALKIT APP 100+ users actively use the app, providing positive feedback on its effectiveness in goal tracking.

Work Availability

Immediately - *i am fully available for an interview and open to work immediately as soon as approved.*

Education

MONTH JAN 2014 - NOV 2020

B.S.C - Degree in engineering

- Learnt about the basic of programming and concepts
- Was thought about the best engineering practices to apply while solving problems
- Learnt how to apply logical and critical thinking to solutions

MONTH JAN 2017 - NOV 2018

SIMPLILEARN SOFTWARE INSTITUTE , USA - *Certified Android and Java developer 2018*

- I thought about the JAVA SDLC , DESIGN PATTERNS AND ARCHITECTURE .
- Learnt more about the ANDROID lifecycle
- Built complex project and learnt about best UI/UX practices

UDEMY ANDROID COURSES

- Learnt from different tutors the different and best practices for application development
- Built Projects that helped shaped my mindsets towards the future of software developments

HACKR.IO STUDENT SOFTWARE TRAINEE

- Worked with different tutors
- Collaborated with different student during the training and learnt more about team work

EXTRA ABILITY

One of my unique abilities is being able to train and mentor students on my youtube channel. I have trained a couple of students and created various tutorials . This shows my unique ability to mentor and train people .
