

Software Engineer | Full Stack Developer

Seasoned and results-oriented **Full Stack Developer** with extensive experience in **frontend development using JavaScript, React.js and backend development with .NET, C#**. Proficient in designing and implementing front-end, back-end, and full-stack architectures using modern tools and frameworks. Adept at creating **RESTful APIs**, integrating cross-functional systems, and optimizing performance for **SaaS platforms and enterprise applications**. Passionate about leveraging **cloud technologies, containerization, and DevOps pipelines** to deliver high-quality software in fast-paced environments. Skilled in troubleshooting, automation, and ensuring security and compliance while driving business objectives forward.

Technical Skills

Programming Languages:	C#, C++, Typescript, JavaScript, Python, OpenGL / WebGL, SQL / Linq / EF, HTML, CSS
Front-End:	JavaScript, React
Back-End:	.Net, C#
Frameworks:	React, Angular, Vue.js, Three.js, Redux.js, Node.js,
Cloud Services:	AWS, Microsoft Azure, Google Cloud Platform (GCP)
Containerization & Orchestration:	Docker, Docker Compose, Puppeteer, CI/CD, Linux
Version Control:	Git, Jira
API Development:	RESTful APIs

Career Experience

Homegig (Washington, D.C.) Software Developer	2023– Present
--	---------------

- **Delivered an interactive JavaScript-based design platform** for home remodeling, ensuring high performance and usability using WebGL and Three.js.
- **Implemented responsive UI/UX designs** with React and React Three Fiber, enhancing user interaction and engagement.
- Conducted **performance optimizations**, reducing page load time by 25% and improving client satisfaction.
- **Developed and integrated RESTful APIs** for seamless data exchange between client and server.
- **Collaborated cross-functionally with designers and stakeholders** to align the platform with business vision.

Optml.io Lead Software Engineer (Freelance)	2020– Present
--	---------------

- **Spearheaded the development of full-stack and mobile applications**, including the Project X1 Roller Coaster VR app featured in Frontier City Theme Park.
- **Built and optimized backend systems** for the RainAware app, scaling the user base to over 100k and achieving recognition on NBC TODAY.
- **Designed and deployed SaaS solutions** with **Docker, Firebase, and .NET Core**, enabling fast, reliable service delivery.
- **Utilized Angular and React for front-end development**, ensuring consistent user experience across platforms.
- **Improved system performance and scalability** by implementing microservices and automated **CI/CD pipelines**.

- **Engineered a React-based platform** for surgical planning and medical imaging in partnership with Medtronic PLC.
- Designed and **optimized visualization components** using WebGL, Node.js, and TypeScript for advanced data rendering.
- **Led presentations on new techniques and features**, ensuring broad team understanding.
- Developed **prototypes and proof-of-concepts for interactive UI designs**, expediting project timelines.

Red Earth Systems

Lead Software Engineer

2015– 2019

- **Built HIPAA-compliant messaging systems** and scalable SaaS web applications, aligning with industry regulations and client requirements.
- Created **secure, RESTful APIs and backend infrastructure** using C# and Node.js, achieving 99.9% uptime reliability.
- Designed and **executed data migration strategies** for seamless integration with external datasets.
- Automated **testing and deployment pipelines**, reducing manual errors and boosting team productivity.
- **Led the development of multi-tenant enterprise solutions**, improving user management and scalability.

Senior Software Engineer

2012 - 2014

- **Enhanced application stability** by troubleshooting complex issues and implementing robust error-handling mechanisms.
- **Architected scalable web services and backend systems** using ASP.NET and SQL Server, meeting enterprise demands.
- Developed **automation solutions for continuous integration**, improving efficiency across development cycles.
- Designed **full-text search and data processing pipelines** for a legal discovery platform, supporting large datasets.
- **Mentored junior developers**, promoting a culture of continuous learning and collaboration.

Additional Experience

Red Earth Systems | Software Engineer
opGames Inc | Founder & Lead Engineer

2010 - 2011
2007– 2015

Education & Certifications

B.A. Computer Science
Hastings College

Microsoft Azure for .NET Developers
Udemy

Angular - The Complete Guide
Udemy

Foundations of User Experience (UX) Design
Coursera

Area of Expertise

DevOps and Infrastructure | Software Development Lifecycle (SDLC) | Full Stack Development | Test-driven development | Responsive Design | Database Query Optimization | Code Review Processes | Algorithms Design | Multi-Language Support | Technical Leadership & Mentoring | UX/UI & Project Management | Data Analysis | Stakeholders Engagement | Product Development | Problem Resolution | Scalability | Process Application Management | Process Improvement & Innovation | Continuous Learning | Backlog Management | Roadmap Development
