| ▪ Azure Administration | ▪ Cisco | ▪ Telecommunications |
| ▪ Microsoft 365 | ▪ Fortinet | ▪ VOIP |
| ▪ Microsoft Windows Server | ▪ Sophos | ▪ Data Backups & Retention |
| ▪ Microsoft Dynamics | ▪ Veeam | ▪ Mosaic |

PROFESSIONAL EXPERIENCE

Tier 2 Network Engineer

ITVoice

2022 – 2025

- Handled advanced troubleshooting and resolved complex network issues involving routing, switching, and firewall setups.
- Ensured smooth network operations by monitoring performance and identifying potential issues using tools like Wireshark, SolarWinds, and Nagios.
- Provided support for escalated incidents from Tier 1, ensuring quick solutions to minimize downtime.
- Configured and maintained networking hardware, such as Cisco, Juniper, and Fortinet devices, to support business needs.
- Reviewed network traffic and security logs to spot and address threats and vulnerabilities.
- Worked closely with teams on network upgrades, migrations, and new deployments to guarantee compatibility and efficiency.
- Documented configurations and troubleshooting steps to improve processes and make future support easier.

Senior System Administrator

Eclipse Advantage

2013 – 2022

- Led diverse projects as Project Lead, including VOIP mergers, company mergers and acquisitions, core system implementations, and upgrades.
- Developed comprehensive implementation plans and standard operating procedures for applications, network buildouts, and hardware deployment.
- Managed hybrid and cloud tenant-to-tenant migrations, ensuring seamless transitions and minimal downtime.
- Administered Azure environments, maintaining optimal performance and security.
- Diagnosed and resolved hardware, software, and network issues faced by end users, delivering timely and effective solutions.
- Researched, implemented, and maintained ticketing systems and remote assistance software to streamline IT support operations.

- Maintained accurate records of technical inventory, including hardware, software, and licensing compliance.
- Performed routine maintenance on multiple servers, including test and production environments, ensuring operational reliability.
- Built and nurtured relationships with vendors, overseeing account management, product enhancements, and performance reviews.
- Prepared detailed ROI analyses for products and services, presenting recommendations to the executive team.
- Provided leadership and mentorship to team members, fostering professional growth and team collaboration.

Network Technician

Artemis INT'L

2010 – 2012

- Identifies, troubleshoots, and resolves hardware, software, and network-related problems encountered by end user.
- Provided help desk support to end users via phone, chat, and remote assistance.
- Documented help desk tickets/resolutions.
- Configure user accounts, passwords and policies, and machine lock downs.
- Liaising with companies for software and hardware making acquisition recommendations.
- Installation and setup of Anti-Virus on networks, including pushing out to local machines.
- Worked with management team to develop security policies and conducted network systems security auditing.
- Responsible for network management including network performance tuning, security monitoring, file server backup, and email server administration.

CERTIFICATIONS

- CompTIA Security+
- Microsoft Azure AZ900
- Sophos Firewall Engineer
