EDUCATION

Master of Science in Computer Science (GPA: 3.33/4) California State University, Long Beach (Relevant courses: Adv. Algorithms, Adv. Programming Languages, Adv. Software Engineering)	Aug 2023 - Present
Bachelor of Engineering in Computer Engineering (GPA: 4/4) Savitribai Phule Pune University, India (Relevant courses: Data Structures and Algorithms, DBMS, Object-Oriented Programming, Cloud Computing, Artificial Intelligence, Software Engineering)	Aug 2019 - Jul 2023

PROFESSIONAL EXPERIENCE

Python-Django and Web Developer Intern Elite Softwares Pvt, Limited	Aug 2021 - Oct 2021
- Spearheaded the development of a dynamic polling web application utilizing Django, ensuring responsiveness across various devices. - Established seamless integration between the front-end interface and a MYSQL database, facilitating efficient data management and retrieval. Implemented robust authentication and authorization mechanisms for users, leveraging Restful APIs to bolster security and user access control. - Improved the efficiency of the application by 30% by using the Admin Panel, reusable components, Object Relational Mapper provided by Django.	
Data Science Intern Let'sGrowMore	Jan 2022 - Feb 2022
- Actively engaged in a myriad of tasks including dataset manipulation, comprehensive data cleaning, and captivating data visualization. Conducted thorough Exploratory Data Analysis on a terrorism dataset, unearthing intricate insights and patterns within the data to drive informed decision-making. - Employed advanced Machine Learning algorithms such as Support Vector Machine (SVM) and Decision Tree for precise data classification, enhancing the predictive capabilities of the models and uncovering hidden data relationships.	

TECHNICAL SKILLS

Languages: Python3, C++, Java, SQL
Web Development: HTML5, CSS, JavaScript, Bootstrap, React, Django, Flask, DOM, REST API
Databases: MySQL, MongoDB
Tools: Visual Studio Code, Jupyter Notebook, AWS, Microsoft Office, Git, Postman

CERTIFICATIONS

Python Certification (Perfect PlanB), Intro to Machine Learning, Pandas, Mathematical Aptitude

PROJECTS

Vehicle Registration Application Python, Flask, SQLite
• Crafted an intuitive and user-friendly front-end interface using HTML and CSS, ensuring seamless navigation and interaction for users. • Formulated comprehensive Entity-Relationship (ER) diagrams to meticulously map out the intricacies of the vehicle registration process, enhancing understanding and clarity for stakeholders. • Implemented a robust system for vehicle registration, executing Create, Read, Update, and Delete (CRUD) operations with precision and efficiency. This was achieved through adept utilization of Python, Flask, and SQLite technologies, ensuring seamless management of vehicle registration data.
Water Quality Monitoring using Machine Learning ML, IOT, Web Technology
• Pioneered a cutting-edge water quality monitoring system that combines machine learning, Internet of Things (IoT), and web technologies. This innovative solution harnessed the power of physical and chemical parameters like pH, temperature, turbidity, and Total Dissolved Solids (TDS) to evaluate water quality. • Through the deployment of a Decision Tree ML model interfaced with a Wi-Fi module, real-time data comparisons were made against a meticulously curated training dataset, fostering accurate and timely assessments of water quality.
Data Science Projects Jupyter Notebook, Python Libraries
• IRIS Flower Classification: Handle and load data, classification using Support Vector Machine algorithm. • Prediction using Decision Tree Algorithm: Species of the IRIS flower is determined using classification model and found the accuracy of the model. • Exploratory Data Analysis (Terrorism dataset): Loading the dataset, Analysing, and cleaning the data, dataset visualization, determining the hot zone of terrorism.
