Hammond -IN

Experience Summary

- A focused professional with a total of 2+ years' Experience in contact Center Technology.
- Experience working on developing Complex IVR Call flows for the Contact Center using Genesys cloud Architect Flows.
- Hands on Experience in creating Self Service IVR's Secure call flows for Card Activations, Balance Enquiries and other issues related to Cards.
- Hands on Experience on creation and maintenance of Outbound Campaigns.
- Hands on Experience on Admin related Activities in Genesys Cloud like Queue creation and Bulk creation of User profiles with Roles and Groups assigned and Queue configurations.
- Defect Triage Management and Experience working on Agile Methodology and using JIRA Tool for task management.
- Experience working on Genesys Cloud Implementation, API Explorer, Architect IVR Flow Development, Outbound Campaigns & Voice-bots.
- Experience of creating Custom & Dynamic Scripts using the Genesys Cloud Scriptor Tool which can assist the agent to better address the caller.
- Hands-On experience with Genesys reporting & analytics, creation and visualization of advanced reports, dashboards, wallboards with KPI administration in eMite Advanced Analytics.
- Dashboard builds for reports and real-time analytics in Genesys A3S Analytics tool.
- Mining and analyzing Topics & Intents for Voice Bots and Quality.
- Post-Call Survey Builds using Genesys Architect and CentraCX Survey tool.

EDUCATION

Purdue University, Hammond, Indiana, USA.

May 2023

MS in Electrical and computer engineering

GPA: 3.2

Bharath University, India.

May 2018

B. Tech in Electrical and communication engineering

Certifications: Forage – Accenture Nordics - Developer Job

Udemy – Complete Guide to Build IOT Things from Scratch to Market

NPTEL – Introduction to Internet of Things

Relevant Courses: Introduction to Computer Networks, Computer Network Security, Power electronics, Introduction to robotics, Digital signal processing, computer architecture, digital control systems, Machine learning.

Skills & Responsibilities

- Genesys Cloud Development, Administration, and Implementation.
- IVR outbound & inbound call flow development using Genesys Cloud Architect Tool.
- Voice Bot implementation experience using manual slotting, intents & utterances.
- Created Outbound campaigns for different dialling modes with custom outbound scripts, rules and outbound call flows (based on call analysis responses and voicemails).
- Integrations with 3rd party applications like Commerce AI, Centra CX Survey & eMite.
- End-to-End user & access management including bulk user deployments, assignment of roles & permissions, grouping & phone management.
- Agent Onboarding, Offboarding and using Rest APIs for updating Profiles, bulk auto answer enabling and troubleshooting for any issues.
- Integration of IVR flows with CRM using Data Actions, Scripts and OAUTHs.
- Setting up dynamic call dispositions from Genesys scripter to integrate into CRM database.
- Creating & publishing multiple types of evaluation forms for better contact center quality management.
- Speech & Text Analytics with Topics and Programs to understand the call trends and customer satisfaction.
- Customized build of advanced historical reports, real-time wallboards and dashboards in eMite Advanced Analytics, Genesys Pure Cloud & Genesys A3S tools.
- Deep-drilled data analysis for different contact-center, agent-level, queue-level and flow-level KPIs and metrics to plan for optimizations, understanding overall performance and to strategize designs for better improvement.
- Configuring Business Units, Management Units, Planning Groups, Activity Codes, Forecasts and Work Plans for Genesys WFM and for better agent scheduling to handle expected volumes.
- Post-Call survey configurations from Genesys Architect and survey data analysis with 3rd party survey tools like CommerceAI and CentraCX.

Software:

- C, C++, Embedded C, Hardware-Software Integration, Real-Time Systems

Soft Skills:

- Analytical Thinking and Problem-Solving, Effective Communication and Interpersonal Skills, Adaptability and Quick Learning, Leadership and Team Collaboration, Project Management and Organizational Skills, Client Interaction and Issue Resolution

EXPERIENCE

Nations Benefits India – Hyderabad, India

Telecommunications Trainee

January 2021 – June 2021

As a Telecommunications Intern, I gained hands-on experience in cloud-based telecom solutions, specializing in Genesys Cloud Admin operations, SIP architecture, and IP telephony. My role focused on building and managing call flows, configuring user access, and developing custom reports and dashboards in Emite to enhance system performance and user experience. I also supported telecom operations by analyzing system data, optimizing call flow designs, and ensuring seamless user experiences through effective problem-solving and data-driven insights. This experience has strengthened my understanding of cloud telecommunications systems and developed my skills in SIP trunking, call flow management, and real-time data analytics.

Nations Benefits India – Hyderabad, India.

July 2021-June 2023

Genesys cloud engineer

- As a Genesys Cloud Engineer with over two and a half years of hands-on experience, I am skilled in designing, configuring, and managing cloud-based communication solutions that drive efficient and seamless customer interactions. My expertise includes deep knowledge of Session Initiation Protocol (SIP) and IP telephony, which allows me to build and optimize custom call flows and IVR systems to meet diverse operational needs.
- In my role, I am proficient in using Genesys PureCloud for configuration, user management, and access control, as well as Emite for custom reporting and performance monitoring. My responsibilities involve administering secure access, monitoring system performance, and troubleshooting to maintain high availability and quality standards.
- My role requires constant engagement in data analysis, real-time monitoring, and performance optimization, helping the team make data-driven decisions and improve customer satisfaction. I am adept at troubleshooting technical issues, conducting system upgrades, and ensuring secure, reliable cloud-based telecom solutions.

LEADERSHIP Indian Student Association at Purdue (ISAP) – co-ordinator

October 2023 – January 2025

- Revitalized a defunct Indian student organization by taking proactive measures and leading efforts to grow membership to 200+ and crowdfunded over \$5000, expressing a can-do attitude and strong leadership skills
- Demonstrated exceptional event planning and organizational skills, delivering five outstanding Indian cultural events with attendance exceeding 240 guests per event

Purdue NW Engineering Department – Contact center Coordinator

August 2024– December 2024

- Managed contact center operations for the Engineering Department, ensuring seamless communication and issue resolution for students and faculty members.
- Supported students and staff on the use of call handling and reporting, leading to a 23% increase in call resolution efficiency.
- Implemented process improvements using Six Sigma DMAIC methods, streamlining call workflows and reducing average response time for student inquiries by 20%.
- Applied SIP architecture knowledge to enhance IP telephony workflows, reducing communication downtime and ensuring smooth telephony operations.

ACADEMIC PROJECT

RECONFIGURABLE SMART SENSOR INTERFACE FOR INDUSTRIAL WSN AND HUMAN HEALTH MONITORING IN IOT ENVIRONMENT

- . Designed a highly adaptable sensor interface that integrates seamlessly with multiple sensors, enabling efficient data acquisition for various industrial and healthcare applications.
- . Developed to track key health parameters like temperature, heart rate, and oxygen levels, improving patient care and enabling preventive measures in critical healthcare settings such as ICUs.
- Technologies Utilized: IoT, WSN, FPGA/CPLD, advanced sensor interface design

EMOPOT

- Developed an innovative IoT-based plant pot named "Emopot" that displays a plant's emotions based on soil moisture levels. Utilized a soil moisture sensor connected to an Arduino Nano R3 to monitor water content in the soil.
