

Mahesh Makam *Data Analyst/PowerBI Developer*

✉ mahemakam@gmail.com ☎ (913) 808-2959 📍 Overland Park, KS 66223 🔗 LinkedIn

PROFILE

Results-driven Data Analyst/Power BI Developer with 3 years of experience driving business growth through data-driven insights. Proven track record of optimizing data pipelines, executing advanced A/B testing, and implementing scalable data models. Skilled in Power BI, Python, R, SQL, AWS, and MySQL, with expertise in CI/CD pipelines, data visualization, and predictive modeling. Deliver high-quality solutions in Agile environments, transforming complex data into actionable insights that drive innovation and organizational success.

SKILLS

Programming Languages — Python, R, C, C++, JavaScript, HTML5, CSS, Scala, TypeScript, Java, SQL

Frameworks & Libraries — Angular, Node.js, Django, React, Spring Boot, Hibernate

Data Analytics — A/B Testing, Hypothesis Testing, Time Series Analysis, Data Cleaning, Data Transformation, Data Integration, Data Mining

Data Warehousing — MySQL, AWS, MS Dynamics CRM

Cloud Technologies — AWS (EC2, SQS), RDS

Version Control — Git, SVN

CI/CD Tools — Jenkins, Maven

BI and Visualization Tools — Excel, Power BI, Tableau, Alteryx

Development Tools — JIRA, Eclipse, WebSphere Application Server

Methodologies — SDLC, Agile Frameworks

PROFESSIONAL EXPERIENCE

Aircare Health

Jan 2024 – present

Data Analyst/PowerBI Developer

- Propel conversion rates by 15% through advanced A/B testing strategies and actionable data insights, driving user engagement and acquisition.
- Design and develop interactive Power BI dashboards, visualizing complex data trends and empowering decision-making across departments.
- Utilized Power BI's data modeling capabilities to create a centralized data repository, enhancing data consistency and reducing data redundancy by 30%.
- Streamline SQL and MySQL data pipelines, reducing query processing time by 20% and optimizing ETL processes for seamless data integration.
- Leverage AWS cloud solutions to construct scalable data warehouses, integrating operational and transactional data with 98% accuracy.
- Utilize DAX expressions to create custom measures and KPIs, enhancing analytical capabilities and tailoring insights to business needs.
- Conduct time series analyses to forecast demand trends and develop predictive models with Python and R, optimizing resource allocation and strategic planning.
- Automate data refresh schedules and implement CI/CD pipelines, ensuring up-to-date reporting and accelerating analytics solution delivery.
- Improve report performance by 25% through optimization techniques and query adjustments, enabling faster decision-making.
- Collaborate with cross-functional teams to integrate MS Dynamics CRM data, enhancing segmentation strategies and customer engagement.
- Conduct rigorous hypothesis testing and data validation, identifying inefficiencies and improving system performance by 10%.

Dell Technologies

Feb 2021 – Jun 2022 | Hyderabad, India

Data Analyst

- Enhanced database performance by 30% through the design of scalable SQL and MySQL data models, improving analytics.
- Increased campaign ROI by 12% through A/B testing and hypothesis validation, driving marketing success.
- Automated data cleaning workflows with Python, saving 20+ hours weekly while improving data quality by 15%.
- Developed interactive dashboards using Tableau and Power BI, empowering stakeholders with actionable insights.
- Leveraged AWS-based data warehousing to process over 1M+ records daily, ensuring efficient analytics and scalable data solutions.
- Applied time series analysis to predict trends, reducing inventory stockouts by 10% and enabling better forecasting.
- Strengthened CI/CD pipelines to accelerate deployments by 25%, fostering cross-team collaboration and reducing manual interventions.
- Conducted detailed data mining and statistical analysis, uncovering patterns that led to a 20% improvement in business decision-making.
- Utilized Excel macros to automate data cleaning, formatting, and reporting, resulting in a 30% reduction in manual effort.
- Designed predictive models with machine learning techniques, improving customer segmentation and marketing effectiveness.
- Collaborated with cross-functional teams to deliver data-driven strategies, increasing operational efficiency by 15%.
- Implemented SQL query optimization techniques, decreasing query execution time by for large datasets.
- Delivered monthly KPI reports to senior leadership, highlighting key trends and actionable recommendations to meet business objectives.

PROJECTS

Sales Performance Dashboard (Power BI, DAX, SQL, Power Query)

Jan 2024 – May 2024

- Designed and developed an interactive Power BI dashboard to analyze sales performance metrics, including revenue, profit, and regional trends.
- Integrated SQL Server data using Power Query and ETL processes.
- Created advanced DAX measures and calculated columns for dynamic reporting.
- Designed intuitive visuals (bar charts, line graphs, KPIs, slicers) for enhanced decision-making.
- Implemented row-level security (RLS) for secure data access.
- Optimized report performance using query reduction, aggregations, and indexing

EDUCATION

University of Central Missouri

Aug 2022 – May 2024 | Lee's Summit, MO

Masters in Computer Science

Lovely Professional University

Jun 2018 – May 2022 | Punjab, India

Bachelors in Computer Science
