

MANOHAR BANGALORE PUTTAIAH

ETL Data Engineer | ETL Informatica Architect

As a seasoned ETL Informatica data warehousing architect and data engineer at Cox Communications Inc, I am specialized in refining complex enterprise systems to boost performance and enhance decision-making processes. My expertise lies in meticulously analyzing, developing, and implementing custom tech solutions that significantly improve ETL workflows and data analytics. Enhanced business operations providing insights to support decision-making at all levels of the organization. Involved in gathering requirements and interpreting data, conducting research, and collaborating with stakeholders to ensure successful project outcomes. With an excellent communication skills, I have collaboratively worked with cross-functional teams. Additionally, I come with a good experience in project management experience (PMP Certified valid until 2027).

Profile

Highly skilled ETL Data Engineer / Data Architect with 19 years of overall IT experience and 6 years of experience in designing and implementing ETL based solutions, system integrations, and ETL data migration strategies. Extensively worked on Telecommunication, Supply Chain, Healthcare, Hospitality projects. Exceptional skills in collaborating with cross-functional teams, developing and maintaining design and architecture standards, and providing ETL technical guidance and support to drive project success. Engaged in delivering E2E solution at Atlanta based Telecom major.

Experience

- Technical cross-functional collaboration
- Requirements analysis and documentation
- Technical guidance and support
- Architecture standards and best practices
- Technical documentation
- System reliability and performance optimization
- Problem-solving and troubleshooting
- Communication and presentation skills
- Time management and prioritization
- Adaptability and continuous learning

Core Responsibilities

- **Empathize & Define:** I always begin with understanding the business and its users with an insight to achieve business goals. Perform deep research on users' thoughts, feedbacks, reviews, actions and words.
- **Define and Decide:** I have interpreted identified goals into actionable components and also produced prototypes to test experience hypothesis.
- **Validate and Iterate:** Collected the responses and valuable experiences to validate running into many iterations to strengthen my creativity and innovational ideas. I was involved in forming a framework to illustrate the non-linear, circular structures of knowledge generation from theory moving slowly to practice and research (design knowing).
- **Build and Deploy:** Ensured every inputs are considered coordinating with the engineering team to the finish line as smoothly as possible. Played a vital role in shifting theoretical conceptions across practical dimensions.

Education and Speaking

- Bachelors of Computer Science

Trainings / Skills

- Cloud computing Databricks
- ETL Data migration and Integration
- ETL Design and Architecture
- Project Management PMP Certified
- Agile Project Management
- Databases: Snowflake, Teradata, Oracle, Databricks, SQL Server
- RDBMS, Conceptual, Logical and Physical
- SME in business applications and data services.
- Knowledge of programming languages (Python and SQL)

Certifications

- PMP Certified 2024 valid till 2027
- Oracle Cloud Interface OCI Certified 2024
- IICS Certified 2023-24
- IDMC Certified 2023-24
- AWS Cloud Practitioner 2023-24
- Mongo DB Basics Certification 2022-23
- Agile Software Developer 2020-21
- Informatica Certified 2016
