

N Manusha

Senior Java Developer, Spring Boot Microservices, AWS Cloud

Irving, TX | ✉ mnugula6@gmail.com | ☎ (972) 827-8281 | [LinkedIn](#)

PROFILE SUMMARY

- Results-driven **Java Developer with 7+ years** of expertise in designing, developing, and optimizing scalable, high-performance **microservices** using **Spring Boot**.
 - Expert in developing **RESTful APIs**, event-driven architectures, and cloud-native solutions using **AWS**, **Kubernetes**, and **Docker**.
 - Expert in database integration using **MySQL**, **PostgreSQL**, and **NoSQL** databases like **MongoDB** to support high-throughput applications.
 - Hands-on knowledge in caching and performance optimization using **Redis**, **Kafka**, and advanced **multithreading** techniques.
 - Strong in designing secure and resilient applications with **OAuth2**, **JWT**, and role-based access control (**RBAC**).
 - Adept in **Agile & DevOps** practices, including **CI/CD** pipelines with Jenkins, **GitHub pipelines**, and **containerized** deployments.
 - Experienced in distributed logging and monitoring using **Splunk**, **Sumo Logic**, and **New Relic**, **Datadog** to gain real-time insights.
 - Passionate about writing clean, maintainable, and scalable code following best practices, **SOLID** principles, and **TDD**.
 - Driven to solve complex challenges with cutting-edge technologies, delivering robust enterprise applications with optimal performance and reliability.
 - Expertise in integrating ForgeRock Identity and Access Management (**IAM**) solutions to enhance application security and authentication workflows.
 - Hands-on experience with **Key cloak OAuth2** for implementing secure and scalable authentication and authorization in **microservices**-based applications.
 - Proficient in configuring **Single Sign-On (SSO)**, identity federation, and adaptive authentication using **ForgeRock** and Key cloak.
 - Skilled in managing user provisioning, access policies, and token-based authentication for enterprise applications.
-

TECHNICAL SKILLS

Programming Languages: Java 17, JavaScript

Identity and Access Management: ForgeRock Stack [Access Manager (AM), Identity Manager, Directory services, Identity Gateway and Identity Cloud]

Frameworks: Spring Boot, Spring Data, Spring Security, Hibernate

Cloud Platforms: AWS (Lambda, ECS, EKS, S3, DynamoDB, API Gateway, Step Functions)

Data Streaming: Apache Kafka, AWS Kinesis, Apache Flink

Big Data: Apache Spark, Hadoop, EMR, Athena, Glue

CI/CD Tools: Jenkins, Docker, Kubernetes, Argo CD, Terraform, Helm

Database Technologies: MongoDB, DynamoDB, PostgreSQL, Oracle

Monitoring Tools: Datadog, Kibana, CloudWatch, Splunk, AppDynamics

API Development: REST APIs, Open Feign, Swagger, OAuth2, JWT

PROFESSIONAL EXPERIENCE

Senior Java Consultant-Technical

Programmers Group Inc, Dallas-TX

August 2023 – Present

Java 17, Spring Boot, Spring JPA, Apache Kafka, Apache Flink, Microservices, Spring Security, AWS ECS, ECR, EKS, SNS, SQS, S3, Docker, Jenkins, Git pipelines, EC2, AWS Lambda, EventBridge, AWS Aurora, Redis Cache, K8's ConfigMap, Secrets, Helm Charts, Terraform, Argo CD, Dockers, Grafana

- Engineered microservices using Java 17, incorporating advanced algorithms to optimize data retrieval and processing.
- Architected event-driven systems with Apache Kafka and AWS Step Functions for seamless asynchronous workflows.
- Built fault-tolerant systems by implementing retry mechanisms and circuit breaker patterns.
- Implement event-driven architecture by integrating Apache Kafka for reliable and asynchronous data exchange between microservices.
- Enhanced troubleshooting by developing tools to analyze and resolve production issues.
- Use Spring JPA for efficient data persistence and management within microservices, handling relational databases effectively.
- Develop and deploy AWS Lambda functions for processing tasks in a serverless environment, leveraging Node.js for asynchronous operations where applicable.
- Design and implement complex workflows using AWS Step Functions, coordinating the flow between various microservices and Lambda functions.
- Utilize AWS EventBridge to set up event rules and triggers for seamless integration between services, managing events from AWS services and custom applications.
- Integrate SonarQube into the CI/CD pipeline to enforce code quality, security standards, and technical debt management across all microservices and functions.
- Facilitate communication between different teams, including backend, and DevOps, ensuring a cohesive approach to developing and deploying microservices-based architecture.
- Employed Mockito to write comprehensive Junit test cases for REST microservices, ensuring robust and reliable functionality.

Java Consultant-Technical

Accenture, Bangalore-IN

January 2019 – July 2022

Java/J2EE, Spring Data, Spring Boot, Spring JDBC, MongoDB, Apache Kafka, Micro Services, Jenkins, Kubernetes, AWS, Amazon S3, SQS, SNS

- Re-designed legacy systems with a modular microservices architecture.
- Leveraged advanced data structures to enhance API performance.
- Integrated Redis caching for frequently accessed data, reducing database load by 30%.
- Improved security with OAuth2, JWT, and AWS Secrets Manager, safeguarding sensitive data.
- Implemented coding standards and best practices to optimize performance and mitigate potential security vulnerabilities in newly developed APIs.
- Crafting clean, efficient, and maintainable API code encompassing robust business logic, comprehensive error handling, and thorough data validation.
- Adhering to REST principles by employing appropriate HTTP methods (GET, POST, PUT, DELETE) and status codes to define and regulate the API's behavior.
- Designed and developed REST API microservices using Java, Spring Boot, Spring Netflix Cloud, and integrated Circuit Breaker Pattern for robustness.
- Designed and developed Microservices ORM utilizing JPA for seamless data access and management within the microservices architecture.
- Employed Mockito to write comprehensive Junit test cases for REST microservices, ensuring robust and reliable functionality.
- Implemented best practices encompassing Clean Code standards, GIT strategies, extensive code reviews, and resilient coding practices for enhanced development.

Java Consultant-Technical

Mindtree, Bangalore-IN

August 2017 – January 2019

Java/J2EE, Spring Data, Spring Boot, Spring Batch, Spring JDBC, Postgres sql, MongoDB, AWS Cloud, Apache Kafka, Micro Services, Jenkins, Kubernetes, AWS EKS, Apache Avro

- Designed RESTful APIs and integrated Spring Boot with Open Feign for seamless microservices communication.
- Implemented Kubernetes orchestration to manage containerized applications across environments.
- Enhanced CI/CD pipelines with Jenkins and Argo CD.
- Resolved complex production issues using profiling tools, increasing API reliability.
- Developed low-latency solutions for real-time processing, improving customer experience.
- Drive migration from legacy systems to Java/J2EE and Spring-based microservices architecture.
- Oversee the transition from monolithic databases to PostgreSQL and MongoDB for enhanced scalability.
- Execute Docker and Kubernetes deployments in AWS for efficient microservices scalability.
- Implement Apache Kafka for robust inter-service communication and integration.
- Utilize Spring Batch, Spring JDBC, and Spring Data for optimized data processing.

EDUCATION

Master of Science, University of North Texas | Business Analytics | 2023

Bachelor of Engineering, R.M.K Engineering College | Electrical and Electronics Engineering | 2017

CERTIFICATIONS

CompTIA security+ ce certification
