

MARK CHRISTOPHER ALLEN

Senior Software Engineer

+1 (917) 426-6813 mallen92314@gmail.com <https://www.linkedin.com/in/mark-christopher-allen/> Crawfordville, FL

EXPERIENCE

Senior Software Engineer

Intuit 12/2023 - 12/2024 San Francisco, United States

Tech-stack: .Net, React.js

- Developed TurboTax admin panel backend system settlement funding management part using .Net and React.js.
- Worked with backend engineering team for upgrading existing backend system based on .Net from v1.3 to v1.4
- Upgraded backend performance with parallel computation implementation using .Net task parallel library.
- Developed test automation, pipeline setup and defined software development guidelines

Lead Software Engineer

White Agile 10/2021 - 10/2023 Tallahassee, United States (Remote)

Tech-stack: .Net, React.js, React Native, AWS

- Developed progressive web application for FoodTruck Spaces using React.js, .Net and AWS.
- Created responsive web & mobile application for Visibly to perform thorough eye test.
- Provide guidance and mentorship on programming practices and techniques to individuals.
- Performed code reviews, test automation, pipeline setup and fixed bugs.

Technical Team Lead

Innowise Group 01/2018 - 01/2022 Saint Petersburg, United States (Remote)

Tech-stack: .Net, React.js, React Native, Firebase

- Led project to create student community platform for web and mobile using React.js, React Native and Firebase.
- Created progressive web application for furniture retailer.
- Created advanced web & mobile application for health monitoring and fitness coaching.
- Defined software development guidelines, made architectural decisions.

Software Engineer

Microsoft 10/2015 - 10/2017 Tampa, United States

Tech-stack: .Net Core, React.js, Azure

- Implemented scalable distributed Microservice in .Net Core and leveraged Azure Traffic Manager for load balancing across geographies.
- Worked on a very large set of data to handle more than 1M daily records by utilizing asynchronous programming & robust queue data structure.
- Developed platform APIs for supporting extensions in Edge browser. Mainly worked on storage sync and persistent messaging APIs, the most used APIs by extension developers.
- Worked on an internal Web application for analyzing and summarizing user search behavior and results using .Net Core and React.js.
- Created a Companion App, an app to provide insights about smartphones when connected via USB to Windows desktop.

Software Engineering Intern

Amazon 06/2015 - 10/2015 New York, United States

Tech-stack: Java Spring, Oracle

- Designed and built back end web service and front end web page intended for use by fulfillment center operators to manage their associate's labor capabilities.
- Built back end service using Amazon internal frameworks backed by Oracle SQL database.
- Built front end web page using Spring MVC, Twitter bootstrap and Amazon internal frameworks.
- Presented design to engineering team and operations teams to get feedback.
- Worked on creating web widget to display keywords on video game landing pages.

SUMMARY

Mark is an experienced Software Engineer with a demonstrated history of working in the computer software industry, focusing on full-stack development and software infrastructure. With a Master's degree in Computer Science from SUNY Empire State College, he has a solid understanding about software design patterns and architectural principles. He is highly skilled in many programming languages and has hands-on experience in not only implementing different Software Engineering Life Cycles but also maintaining production and development servers. Furthermore, he is a strong team player and comfortable working with diverse people, training teams and leading them in a very friendly fashion. He loves to take part in volunteering activities and this motivates him to feel even more positive about the world and human life. Currently, he is looking to grow as a developer and own a product that solves a real-world challenge and affects the lives of millions of users.

SKILLS

C#	.NET	React.js	Next.js
JavaScript	TypeScript	Node.js	
Angular.js	ReactNative	HTML	CSS
C++	SASS	Microsoft Azure	Serverless
MySQL	PostgreSQL	Oracle	
Amazon AWS	Google Cloud Platform		
Design Patterns	Object-Oriented Programming		
CI/CD	Docker	Kubernetes	Terraform
Unit Testing	E2E Testing	Agile	JIRA
Git	Linux		

EDUCATION

Master's Degree, Computer Science

SUNY Empire State College

2014 - 2015

Bachelor's Degree, Computer Engineering

SUNY Empire State College

2011 - 2014

KEY ACHIEVEMENTS

-  Created a new ecosystem to clone 3rd party provider API
The new system helped the company to save \$6000+ monthly.
-  Created a new React.js starter-kit
The new React.js starter-kit helped the team to boost the development.
