SUMMARY

Though I've had jobs in other industries this year, I specialize in PHP, Python/Django, and JavaScript with a proven track record of delivering high-quality, user-centric solutions. My passion for technology drives me to explore innovative approaches, leading to significant improvements in user engagement and project outcomes, which I've practiced intensively over 4 years.

EDUCATION

Master in Information Systems Management 01/2019 - 12/2023
Brigham Young University Provo, UT
GPA 3.63 / 4.0

EXPERIENCE

Software Developer 01/2021 - 01/2024
BYU Office of Research Computing Provo, UT

- Redesigned website to fit BYU's website theme and accessibility guidelines, increasing new user engagement by 50%
- Built new access control list system, VPN manager, and Mattermost bot messaging to facilitate the transition to remote work during the pandemic, reducing support response times by 30%
- Used Docker to run Debian Linux, Apache, MySQL, PHP and Redis images in controlled development environment

Full-Stack Developer 01/2020 - 12/2020
Triathlon Battery Solutions, Inc. Provo, UT

- Coded dynamic and responsive battery and charger selector using Vue.js, PHP, and Django Admin which provides battery order information for hundreds of warehouses across the country
- Programmed auto-generated PDF to export selected items and automate emailed price quotes upon request
- Administered and normalized database with 5,000 Triathlon batteries and chargers using R and Excel

Web Developer over Conferences 04/2019 - 04/2020
BYU Campus Accommodations Provo, UT

- Added improved logging in VB.net for BYU Conference housing systems including youth and sports conferences that reduced errors in conference housing placement by 40%
- Assisted 1025 tenants with questions by phone and in person about on-campus housing and meal plans each day
- Created Tableau and reports providing insights on improved conference placement
