

Matthew Carson
MatthewSCarson@gmail.com
<https://www.linkedin.com/in/matthew-carson-8578a841/>

Senior Software Engineer with 12+ years of experience specializing in API development, microservices architecture, and e-commerce platforms, with a proven track record of optimizing system performance and mentoring junior developers.

TECHNICAL SKILLS

- Languages: Java, C#, Javascript, Python, CSS, HTML, PHP
- Operating Systems: Windows, Linux / UNIX, MacOS
- Tools: IntelliJ IDEA, GitHub, SVN, Oracle VM VirtualBox, Jira, Azure, Postman, Swagger
- Database Systems: MySQL, MongoDB, SQL, PostgreSQL, SQLite
- Other: APIs development, Kubernetes, AWS, React, Regex, JQuery, Django, Spring, Guice; strong written communication skills

PROFESSIONAL EXPERIENCE

Goodfynd

September 2024—April 2025

Lead Software Engineer

- Using: **C#**, **MongoDB**, BSON, ASP.NET, LINQ, Swagger, **microservices**, Azure
- Business: E-Commerce, mobile point-of-sale, digital event management, food service
- Designed and implemented backend APIs and related microservices, especially for search.
- Created and expanded on MongoDB indexes, aggregations, and triggers.
- Startup; all work remote.

Violet

March 2022—June 2024

Senior Software Engineer

- Using: **Java**, Spring, Springboot, **microservices**, Kafka, some PHP; Kubernetes, Maven, Docker, Junit, Elasticsearch, AWS
- Business: E-Commerce / SaaS
- Implemented integrations for ecommerce platforms, working with platform APIs and webhooks.
- Platforms include Shopify, Amazon, Magento, WooCommerce, BigCommerce, Lightspeed, Ecwid, Yaas, Swell, Square, Salesforce Commerce Cloud (SFCC) / Demandware, Squarespace, Stripe, BigCartel, and Prestashop.
- Focuses include the checkout process, orders, products, and refunds.
- Reduced latency of endpoints used for the checkout process by over 90%
- Used AI-based code generation to dynamically create new integrations.
- Designed and expanded unit testing.
- Startup; all work remote.

Indeed

February 2021— February 2022

SWE2 / Senior Software Engineer

- Using: **Python**, **Django**, Java, **Kubernetes**, SQL, AWS
- Improved Ishbook, a Jupyter-based tool that allows teams at Indeed to create and run Python scripts for reporting and analytics.
- Improved APIs and internal tools for access to other services, including SQL and Google Sheets.
- Designed and implemented monitoring software to provide feedback on the status of ad buys and monitor Kubernetes pods.
- Optimized distributed Ishbook backend, cutting latency in half and doubling efficiency.
- Developed and updated unit tests.
- Mentored three junior engineers.
- Transitioned Ishbook to AWS using Lambda.
- All work remote.

Etsy

March 2020—December 2020

Contractor

- Using: **Javascript**, **PHP**, SQL
- Business: E-Commerce
- Improved A-B testing infrastructure and related internal tools to maintain scalability.
- Modified internal test-reporting system to accept ad-hoc reports, and to allow for test options to be expanded and customized without requiring further code changes.
- Improved Etsy's analytics as they relate to financial and advertising needs.

Datastrong, LLC**March 2019—November 2019**

Senior Software Engineer, Contractor

- Using: **Java**, Spring, PostgreSQL
- Business: Analytics & Cloud Solutions; microservice-based
- Developed and created modules to parse older reporting code, and convert them into a modern SQL database.
- Developed and created software to output this converted data in PDF format, using rules dynamically extracted from the code.
- Tested and maintained SQL data storage for extracted data and rules.
- Maintained web-based front-ends used for accessing data analytics and database conversion.
- All work remote.

IXL Learning**July 2013—January 2019**

Senior Software Engineer

- Using: **Java** (Guice, Struts), Javascript (jQuery, React), Python, GCP / Google Cloud / Google APIs; CSS3, Javascript, HTML5
- Business: Online educational web application, SaaS, EdTech
- Wrote problem-generation software to automatically generate test problems for students that match specific constraints.
- Maintained and updated internal online data-viewing and editing software to manage test data.
- Developed and maintained audio systems using text-to-speech (via Amazon Polly) and recorded audio problems.
- Optimized distributed text-to-speech audio system, reducing latency and improving efficiency.
- Led teams updating audio systems and developing internal tools; architected relevant designs.
- Maintained audio frontend, supporting a responsive webapp on both desktop and mobile (android / iOS).
- Mentored six junior engineers.
- Agile environment, with code reviews and unit testing; all work remote / telecommute to headquarters in California.

OpenSky**2012–2013**

Data Engineer

- Using: Python, **MongoDB**, **MySQL**, Bash scripting, GitHub, PHP, AWS, Oracle VM VirtualBox, Linux (CentOS)
- Business: E-Commerce
- Wrote and maintained Python and bash scripts to ETL data between MongoDB / NoSQL and MySQL databases.
- Updated existing scripts for differential data transfer in order to improve scalability.

AirCityPost**2012–2012**

Software Developer

- Using: **C#**, VB, .net 3.5, XML, Python, PHP, PostgreSQL
- Business: International shipping / fulfillment for online retailers (All work via telecommuting.)
- Designed and implemented label design and printing software using C#; produced user interfaces for order-handling software.
- Programmed multi-threaded order retrieval and processing software to automatically handle international customs requirements.
- Wrote order-processing for both CSV and XML orders.

John Hudesman, SRL program at New York City College of Technology**2007 – 2012**

Research Assistant / Technical Lead

- Technologies: **C#**, Microsoft SQL server, T-SQL, ASP.NET 4.0, WinForms, PHP
- Business: Educational research; educational software
- Sole designer and developer for test-taking software on tablet PCs in C#, recording all work as brushstrokes, saving multiple-choice answers to a central SQL database over the network, and producing automated feedback PDFs.

EDUCATION & TRAINING**CITY UNIVERSITY OF NEW YORK GRADUATE CENTER**

PHD Candidate in Computer Science (ABD; Coursework complete)

Relevant Coursework: Analysis of Algorithms, Advanced Computer Networks (DNS, STMP), UNIX Application Development, Modeling and Simulation, Network Security, Distributed Network Algorithms, Web Info Retrieval / Data Mining, Data Science, Graph Theory Network Applications, Language Processing, Database Management, AI / Artificial Intelligence

Academic Achievements: Science Fellowship, 2006-2008; Tuition Fellowship, 2006-2011

SYRACUSE UNIVERSITY

MS in Computer and Information Science

2006

Relevant Focuses and Coursework: Software Engineering, Software Design and Development, Networking, Optimization

CLARK UNIVERSITY

BA in Computer Science

2005
