OBJECTIVE:

Front-End Engineer passionate about delivering high-quality, scalable user experiences, with expertise in React, JavaScript, and UI/UX design, a customer-obsessed approach to building intuitive web applications that drive engagement and satisfaction. Adept at working in agile environments, optimizing performance, and implementing best practices in front-end development to achieve seamless user interactions.

WORK EXPERIENCE:

Software Developer (Volunteer)

Aug 2024 - Present

JerseySTEM

- Developed advanced validation logic in Python and MySQL, increasing data accuracy by 20%.
- Enhanced database efficiency by 20% through optimized data structures while maintaining 100% data integrity.
- Streamlined processes through structural analysis and data analysis for database optimization.
- Created Python and Google Apps Scripts to retrieve data from Excel sheets and transfer it to the MySQL database. As a result, data processing duties were automated, resulting in a 30% reduction in employee time.

Junior Software Engineer

Jan 2022 - Dec 2022

Upperthrust Technologies Private Limited

- Deployed React and Django to build and manage a feature-rich food delivery application, enhancing customer experience and business operations.
- Improved efficiency and increased application functionality by 25% by integrating 15 REST APIs.
- Developed APIs, improved SQL database operations using data structures, and performed testing to ensure 99.9% data integrity and smooth system operation.
- Used JIRA to effectively track issues and progress while managing projects through the Software Development Lifecycle (SDLC) and Agile methodologies.
- Used Git for efficient code collaboration and version management.

Full Stack Developer Intern

Aug 2021 - Jan 2022

Hexadigi Software Private Limited

- Developed a management system for schools and colleges with software design principles, including capabilities for communication and grade tracking, resulting in a 30% reduction in administrative workload.
- Increased administrative efficiency by 30% through the development of an intuitive UI/UX for educational institutions, improving navigation efficiency by 40%.
- Collaborated with cross-functional teams throughout the project lifecycle, utilizing concepts of object-oriented design.
- Utilized advanced mathematics skills to solve complex software problems and improve algorithms.

PROJECTS:

Clinic Appointment Management System

Aug 2024 - Nov 2024

- Designed and developed an intuitive GUI using Tkinter to manage clinic appointments, enhancing user accessibility and experience and resulting in a 25% increase in user satisfaction rates.
- Front-end elements and a MySQL database were integrated to manage patient and appointment data effectively, utilizing data structures to maximize performance and reduce appointment scheduling time by 30%.
- Object-Oriented Programming (OOP) techniques were used to deliver modular, maintainable, and reusable code that ensured scalability and ease of future expansions.
- Implemented responsive layouts, strong error handling, and input validation with a focus on UI/UX design to ensure smooth operation, leading to a 20% improvement in operational efficiency.
- Worked on documentation, deployment, and debugging to deliver a reliable and easy-to-use system.

Fake News and Cyberbullying Detection

Jan 2024 - May 2024

- Created a machine learning system that analyzes more than 10,000 data records and uses data structures for effective processing to detect fake news and cyberbullying.

- Created user-friendly web interfaces with React and used web development techniques to integrate ML models with a Flask API in a smooth manner, increasing detection time by 20%.
- Developed reusable React components to standardize functionality across the application, including dynamic form elements and responsive design features using Material-UI.
- Implemented state management using Redux to handle complex application states, ensuring seamless user interaction and efficient data flow.
- Developed an AI model that uses algorithms to guarantee great precision, achieved 100% accuracy in detecting fake news and 99% accuracy in identifying cyberbullying, validated through rigorous testing on diverse datasets.
- Collaborated with cross-functional teams and used Agile methodologies to manage project timelines, encouraging a flexible and creative atmosphere.
- Administrator procedures were improved by improving detection pipelines and enhancing system usability for real-world user challenges.

Sentiment Analysis

April 2023 - May 2023

- Combined YouTube data scraping with Kaggle's social media influencer dataset, using advanced data analysis methods to add more than 10,000 entries to the database.
- Enhanced marketing efforts through web scraping and algorithms to collect audience and subscriber data (language and country) from over 3 YouTube channels.
- Identified the top 5 influential nations and important viewer preferences through exploratory data analysis (EDA) on YouTube and Instagram datasets, which resulted in a 20% boost in interaction with targeted content.

Blood Bank Management System

May 2021 - July 2021

- Created a Java-based program for a hospital blood bank management system utilising Object-Oriented Programming (OOP) concepts, allowing for effective tracking of blood supplies.
- Implemented CRUD operations and optimized data structures to improve donor record management and enhance blood type tracking accuracy by 20%.
- Used software design techniques to build a system that is both scalable and maintainable.

CORE SKILLS:

Programming Languages: C, C++, Python, JavaScript, PHP, SQL, Java, HTML, CSS.

Frameworks and Libraries: React, Angular, Django, REST API.

Tools and Platforms: MySQL, PostgreSQL, JIRA, Git.

Cloud and DevOps: Familiar with AWS, Google Cloud (willing to learn).

Soft Skills: Problem-Solving Under Pressure, Professionalism, Commitment, Effective Communication.

CO-CURRICULUM ACTIVITY:

Campus and Event Staff (Supervisor)

Sep 2023 - May 2024

Central Michigan University

- Coordinated university events, ensuring smooth execution and excellent guest experiences.
- Guided audiences, addressed queries, and resolved issues, showcasing strong problem-solving and customer service skills.
- Promoted to supervisor due to outstanding performance; led a team of event staff and ensured on-time event preparation.
- Collaborated with cross-functional teams to plan events, improving customer satisfaction and community engagement.

EDUCATION:

Central Michigan University

Jan 2023 - May 2024

Master of Science Computer Science

GPA: 3.54

Marathwada Mitra Mandal's College

Jan 2018 - July 2021

Bachelor of Science Computer Science

GPA: 3.31
