

Meghamsh Reddy Aleti

+1 (469) 545-0695 | aletimeghamsh203@gmail.com

LinkedIn: <https://www.linkedin.com/in/meghamsh-aleti-b719a4131/>

PROFESSIONAL SUMMARY:

- Certified ServiceNow expert with 8+ years of experience designing, implementing, and managing complex ServiceNow solutions, including IT Service Management (ITSM), IT Operations Management (ITOM), Customer Service Management (CSM), HRSD, Service Catalog, CMDB, Knowledge Management, and custom application development.
- Highly skilled ServiceNow Architect & Developer with extensive experience in designing, developing, and implementing enterprise-wide ServiceNow solutions.
- Expertise spans ITSM, ITOM, HRSD, CSM, and networking, with a strong focus on platform architecture, automation, and integrations.
- Adept at defining system roadmaps, optimizing ServiceNow instances for scalability and performance, and developing custom applications to align with business needs.
- Proficient in JavaScript, GlideScript, REST/SOAP APIs, and IntegrationHub, integrating ServiceNow with third-party platforms such as Workday, SAP, Salesforce, Cisco, and Juniper.
- Strong background in Service Mapping, CMDB governance, Discovery, ITOM event management, and SecOps.
- Experienced in employee self-service automation, designing Virtual Agents, Flow Designer workflows, and HRSD solutions to enhance service efficiency.
- Demonstrated success in leading platform upgrades, multi-instance architecture designs, automation initiatives, and ITIL-based process improvements.
- Proven ability to drive digital transformation, optimize networking infrastructure, and enhance IT operations while ensuring compliance with GDPR, SOC2, and HIPAA.
- A results-driven professional with a track record of increasing efficiency, reducing manual interventions, and delivering robust ServiceNow solutions that improve business performance, streamline workflows, and enhance end-user experiences.

CERTIFICATIONS:

- Introduction to R, Intermediate R from Data Camp, 2023
- ServiceNow Certified Systems Administrator (CSA), 2024
- ServiceNow Certified Application Developer (CAD), 2024
- Certified Implementation Specialist – IT Service Management (CIS – ITSM), 2024

EDUCATION:

- Master of Science in Business Analytics, University of North Texas, Texas.
- Bachelor of Technology in Electronics and Communication Engineering, GITAM, India

TECHNICAL SKILLS:

- Process Documentation & Workflow Mapping
- Business Analysis & Root Cause Analysis
- Problem-Solving & Troubleshooting

- Application Configuration & Optimization.
- **Proficient:** JavaScript, Python, R, SQL, Statistics, Summit AI ITSM, Service Now (Catalog configuration, Incident Management, Cherwell Service Management, Problem Management, Change Management, Knowledge Management, CMDB, Project Portfolio Suite, Now Assist, Onboarding, and Employee Center Pro), ITSM, ITIL, ITAM, HRSD, CSM, Glide Script, ServiceNow API'S
- **Software Tools:** Outlook, Microsoft Office Suite, MS Word, Excel, PowerPoint, Visio, Project, Adobe Acrobat, MS Visio.
- **Data Modeling:** Lucid Chart, Pega.
- **Data Reporting Tools:** Tableau, Power BI, Microsoft Power BI Advance Excel, Macros (Excel VBA).

PROFESSIONAL EXPERIENCE:

Dish Networks, TX
ServiceNow Developer

Jan 2024 - Present

Responsibilities:

- Designed and architected enterprise-wide ServiceNow solutions for ITSM, ITOM, HRSD, CSM, and networking, ensuring seamless integration, scalability, and performance across multiple instances and domains.
- Developed the ServiceNow platform roadmap, defining system architecture to align with business objectives, ITIL processes, cloud strategies, and networking requirements by creating project plans, user stories, test plan, automated testing and tracking progress.
- Defined ServiceNow system design principles, ensuring custom application development, integration, and data models adhere to best practices, security standards, networking protocols, and performance requirements.
- Designed multi-instance and multi-domain architectures, ensuring global data segregation, scalability, disaster recovery, and network infrastructure resiliency.
- Oversaw platform upgrades, application configuration, and customization management, ensuring minimal disruption and optimal performance, while addressing networking dependencies and connectivity needs.
- Developed custom applications within ServiceNow using App Engine, UI Policies, Catalog UI Policies, Script Includes, Business Rules, Client Scripts, and Flow Designer, driving automation and integration for ITSM, HRSD, CSM, ITOM, and networking processes.
- Led the customization of core ServiceNow modules, including Incident, Problem, Change, Request, HR cases, Customer Service, and network management workflows, aligning the platform with business and networking needs.
- Developed custom scripts, REST APIs, and web services for third-party integrations such as HRIS (Workday, SAP), IT systems, CRM (Salesforce), and networking tools (e.g., Cisco, Juniper), improving interoperability and service delivery.
- Built and maintained dynamic forms and UI components, enhancing user experience for IT, HR, Customer Service, and networking functions through self-service portals.
- Created automation workflows for self-service, approval processes, notifications, and network service provisioning, leveraging Flow Designer and Orchestration for operational efficiency.
- Designed and implemented ITSM solutions, automating incident, problem, change, and service request management workflows, integrating Service Mapping, ITOM, and networking services for accurate service impact analysis.
- Developed and optimized JavaScript-based Client Scripts, Business Rules, and Script Includes to automate ITSM workflows and enhance platform performance.

- Utilized GlideScript to create dynamic and automated workflows, reducing manual interventions and improving process efficiency.
- Designed and implemented REST and SOAP API integrations, enabling seamless data exchange between ServiceNow and third-party systems.
- Led the architectural design of ITOM processes, including Discovery, Service Mapping, Event Management, and Orchestration, ensuring real-time infrastructure monitoring, automated remediation of IT incidents, and integration with network monitoring systems.
- Developed and configured custom Discovery probes and Service Mapping patterns for network services, ensuring automatic detection and mapping of cloud, hybrid, and on-premise network infrastructure.
- Designed event management dashboards, integrating ITOM, Service Mapping, and network monitoring tools for proactive issue resolution and service health monitoring.
- Implemented automated remediation workflows in ITOM and networking environments, improving operational efficiency by reducing manual intervention in network-related issues.
- Built dynamic views and reports to analyze CMDB health, service performance, network infrastructure status, and change impacts, improving decision-making speed by 30%.
- Designed and architected HRSD solutions to improve employee experience, integrating HR case management, employee lifecycle events, virtual agents for service automation, and network support workflows.
- Led the development of the Employee Service Center (ESC), consolidating IT, HR, Facilities services, and network-related issues into a single self-service portal, improving employee satisfaction by 25%.
- Developed customized HR case management workflows for onboarding, service requests, and employee interactions, automating processes using Flow Designer and Virtual Agents.
- Architected and integrated CSM workflows, providing end-to-end case management solutions for customers, ensuring a seamless interaction between ITSM, ITOM, CSM, and network service modules.
- Integrated CSM with ITSM, ITOM, and network management tools, providing end-to-end visibility of customer issues with impact analysis for better prioritization and faster resolution.
- Designed and implemented Service Mapping solutions for network services, ensuring comprehensive mapping of IT and business services, dependencies, and impact analysis across the entire infrastructure.
- Developed and maintained custom Service Mapping patterns for third-party applications, network devices (routers, switches, firewalls), databases, and cloud infrastructure, ensuring complete service visibility for business operations.
- Created automated CMDB audits with Discovery and Service Mapping, minimizing configuration drift and ensuring data accuracy in compliance with internal and external standards.
- Built advanced Service Mapping dashboards to visualize the relationships between business services, network services, and underlying infrastructure, improving incident management and change impact analysis.
- Developed custom patterns to support dynamic, multi-cloud environments for discovery and mapping of both cloud, on-premise network services, and hybrid network infrastructures.
- Architected and developed automation workflows for network service provisioning, incident resolution, and change management, leveraging ServiceNow Orchestration and Flow Designer for end-to-end automation.
- Built complex integrations using REST APIs, SOAP, and IntegrationHub, connecting ServiceNow to third-party systems, network management tools (e.g., SolarWinds, Cisco Prime), and business solutions such as SAP, Salesforce, and HRIS.
- Designed and implemented custom workflows for service request automation, network issue routing, and change management approvals, driving business process optimization.
- Developed Virtual Agent workflows to enable AI-driven employee self-service for network troubleshooting, reducing case backlog and increasing first-contact resolution by 30%.

- Designed RBAC models for user authentication, ensuring compliance with security policies, integrating ServiceNow with identity management solutions (LDAP, SSO), and managing access to network-related assets.
- Developed secure integration mechanisms, leveraging OAuth, JSON Web Tokens (JWT), and encryption protocols for safe data exchange with external applications, including network security tools.
- Implemented CMDB and Change Management governance frameworks for network systems, ensuring compliance with GDPR, SOC2, HIPAA, and other regulatory standards.
- Integrated ServiceNow with Security Incident Response (SecOps), automating vulnerability management, incident response based on Event Management, ITOM insights, and network security tools.
- Implemented and customized ServiceNow Software Asset Management (SAM) and Hardware Asset Management (HAM) modules to optimize asset lifecycle processes, including designing SAM reconciliation rules for software license inventory and compliance.
- Executed bulk data loading into CMDB using transform maps and transform scripts.
- Designed feedback forms for all the tickets which are raised in the ServiceNow tool to collect the user feedback.
- Implemented Spokes for HR Workday Integrations, Smartsheet, and Adobe for SAM PRO modules. • Extensively worked on CMDB, Configuration Items (CIs), CI relations, and MID Server while redesigning workflows in ServiceNow Workflow Editor.

BCBS, TX
ServiceNow Developer

May 2022 – Dec 2023

Responsibilities:

- Implemented a variety of ServiceNow modules, including ITOM, ITSM, CSM, Incident Management, Request Management, Service Catalog, Custom Applications, Service Portal, Project Portfolio Management, and Knowledge Management.
- Conducted requirement gathering sessions with HR and customer support teams to align ServiceNow configurations with specific business needs for ITSM, ITOM, HRSD and CSM.
- Analyzed current forms and tools to evaluate ServiceNow requirements, configuring the platform to meet organizational objectives.
- Designed and optimized workflows in ITSM for streamlining organizations IT Services, CSM for case management and HRSD for employee lifecycle events, utilizing advanced scripting tools and platform functionalities.
- Established automated case assignment and routing rules to ensure efficient issue escalation to the appropriate teams.
- Developed and customized Service Portals for IT services (ITSM), external customers (CSM) and employees (HRSD) to enhance service accessibility and user experience.
- Led the design, development, and management of application code, user interfaces, and third-party integrations across all phases of CMDB development (definition, development, and deployment) in ITSM.
- Directed the migration and integration of various data sources into an enterprise CMDB solution in ITSM, ensuring seamless data flow and accuracy.
- Defined and implemented SLAs for ITIL processes to ensure alignment with organizational requirements and performance standards.
- Developed JavaScript-driven form logic in Service Catalog items, enhancing user experience and request automation.

- Created GlideRecord queries using GlideScript to optimize server-side processing and improve database interactions.
- Developed and maintained custom Scripted REST APIs to facilitate secure data synchronization between ServiceNow and external platforms.
- Automated routine tasks within ServiceNow's ITSM, CSM and HRSD using scripting tools and advanced platform capabilities, improving operational efficiency.
- Designed and managed application table extensions with custom scripts to meet specific business needs.
- Implemented and configured UI Actions, UI Policies, Access Control Lists (ACLs), and Email Notifications to facilitate incident management and resolution in ITSM.
- Designed and optimized workflows based on client specifications, enhancing existing workflows for improved functionality.
- Utilized Knowledge Management to provide employees with access to HR policies, FAQs, and guides, reducing HR case volumes and enhancing self-service capabilities.
- Developed dynamic buttons and context menus for forms and lists through UI Actions to streamline user interaction in ITSM.
- Automated routine tasks for HR requests and customer case assignments using ServiceNow's Flow Designer, minimizing manual intervention and enhancing productivity.
- Built complex workflows incorporating approval processes and web service integrations with external applications to optimize business processes.
- Managed and maintained configuration items, refining forms and form sections to improve usability and operational efficiency.
- Implemented a comprehensive HR onboarding solution using business rules, workflows, and script includes in HRSD.
- Integrated third-party tools, such as Service Desk Systems (ITSM), CRM platforms (CSM) and payroll systems (HRSD), into ServiceNow to enable seamless data synchronization and improve service delivery.
- Configured Service Catalog items with advanced forms and branching logic to streamline service delivery processes and enhance user experience.
- Optimized CMDB discovery by configuring IP addresses to identify previously undiscovered configuration items, ensuring comprehensive data coverage.
- Integrated ServiceNow with third-party platforms to securely manage credentials, enhancing data security and preventing potential breaches.
- Developed detailed implementation plans for ServiceNow releases, conducting team walkthroughs to ensure successful execution and alignment with business goals.
- Created business rules to prevent the storage of incomplete configuration items in the CMDB module of ITSM after scheduled discovery runs, maintaining data integrity.
- Enhanced change management processes by customizing tools for stakeholders, ensuring ease of use and streamlined operations.
- Configured email notifications for inbound and outbound communications and developed custom mail scripts as needed to meet business requirements.
- Collaborated with process owners to design and implement customized workflows tailored to specific business needs.
- Developed and implemented UI Actions for catalog items, utilizing UI scripts to enhance user interaction and functionality.
- Created and optimized workflows for Service Catalog items to ensure efficient and effective operations.
- Developed tailored dashboards to monitor IT Performance (ITSM), customer satisfaction (CSM) and HR efficiency metrics (HRSD), providing actionable insights to stakeholders for informed decision-making.
- Created quality management plans, test scenarios, and user acceptance test scripts based on system requirements to ensure robust solution delivery.

- Resolved incidents, problems, and enhancement requests in a timely manner, maintaining clear communication with clients to ensure satisfaction and successful delivery of solutions.

Tech Mahindra Ltd, Pune, India
ServiceNow Administrator

Dec 2019 - Dec 2021

Responsibilities:

- Participated in review and project meetings to analyze business requirements and functional specifications, successfully implementing Service Catalog, Incident, Change, and Service Level Management modules in the ServiceNow-ITSM platform, focusing on upgrades and integration tasks.
- Applied ITSM best practices to monitor, prioritize, and resolve critical incidents, minimizing downtime and ensuring seamless business operations.
- Collaborated with cross-functional teams to optimize IT asset management and service delivery workflows, resulting in a 30% reduction in service outages and a reduction in incident response times from 48 hours to 12 hours, significantly enhancing operational efficiency.
- Designed, developed, and implemented customized solutions within ServiceNow-ITSM to streamline workflows and automate processes, leading to a 25% increase in cross-team productivity and a 35% improvement in system performance metrics.
- Utilized ServiceNow ITSM to track change requests, approvals, and post-implementation reviews, ensuring transparency and accountability across change management processes.
- Led comprehensive change management processes, including stakeholder approvals, rigorous testing, and deployment validation, which resulted in enhanced platform scalability, reliability, and a 35% increase in user satisfaction scores.
- Developed detailed technical documentation and facilitated user training sessions to support system enhancements, ensuring alignment with business objectives, industry standards, and seamless stakeholder adoption.
- Integrated ServiceNow-ITSM with various enterprise systems, customizing the platform to meet organizational needs and streamline workflows.
- Developed and maintained an accurate Configuration Management Database (CMDB) within ITSM to track IT assets and their relationships, ensuring efficient troubleshooting and smooth integrations.
- Ensured continuous synchronization between the CMDB and asset discovery tools, improving visibility across IT infrastructure and enhancing operational efficiency.
- Automated manual operations by developing and deploying custom JavaScript scripts within ServiceNow-ITSM, resulting in significant time and cost savings.
- Delivered technical implementations for ServiceNow-ITSM modules such as Change Management, Incident Management, Problem Management, Service Catalog, and Configuration Management.
- Managed ServiceNow-ITSM change management processes, standardizing and automating business workflows for Go-Lives while consolidating global IT operations into a unified system of record.
- Automated repetitive tasks and service requests using ServiceNow's Flow Designer and scripting tools, saving approximately 20 hours of manual effort per week.
- Leveraged ServiceNow-ITSM to create a centralized knowledge repository, enabling end-users and IT teams to access self-help resources and reducing the volume of repetitive tickets.
- Integrated ITSM with third-party tools and enterprise systems via REST and SOAP APIs, facilitating seamless data exchange and enhancing real-time insights for decision-making.
- Conducted root cause analysis for recurring incidents, implementing long-term resolutions that resulted in a reduction in incident recurrence rates.
- Utilized ITSM dashboards to monitor trends and identify bottlenecks in problem resolution processes, driving continuous process improvement.

- Proactively identified and addressed platform inefficiencies, reducing recurring incidents by 15% and enhancing service reliability within ITSM.
- Streamlined release planning and deployment using ServiceNow ITSM, ensuring alignment with organizational timelines and minimizing service disruptions.
- Coordinated with development teams to automate code deployments, leveraging ITSM for rollback strategies and version control management.
- Integrated IT asset management with ITSM processes to track the lifecycle, depreciation, and utilization of hardware and software assets, optimizing costs and ensuring compliance.
- Supported ITIL-based processes by managing incidents, problems, and changes through ServiceNow ITSM, fostering continuous process improvement and adherence to best practices.

Epam Systems, Hyderabad, India
Software Engineer / ServiceNow Admin

Mar 2017 - Nov 2019

Responsibilities:

- Designed and implemented workflows for Incident Management, Change Management, Service Requests, and SLA configurations to align with organizational needs and enhance service delivery.
- Supported the import and management of configuration and asset data to ensure accurate and up-to-date records across systems.
- Developed and customized UI Policies, Client Scripts, Business Rules, Catalog Client Scripts, validations, forms, and Access Control Lists (ACLs) to enhance platform functionality and improve the user experience.
- Configured and customized various ServiceNow modules, including Change Requests, Employee Self-Service (ESS), Service Desk, Service Catalog, Problem Management, and Service Level Management (SLM), to meet business requirements.
- Developed Service Portals for Employee Self-Service (ESS), improving accessibility and the user experience.
- Utilized the User Data Loader for data insertion, updates, and bulk imports/exports, ensuring seamless data management and Excel integration.
- Created and deployed REST APIs, including custom endpoints, to enable external applications and clients to efficiently access ServiceNow resources and functionality.
- Automated cross-platform business processes by integrating ServiceNow workflows with external systems via REST APIs, reducing manual effort, minimizing errors, and enhancing operational efficiency.
- Documented scripted solutions to promote knowledge sharing, maintainability, and scalability within the team.
- Actively participated in all phases of the Software Testing Life Cycle (STLC), ensuring thorough testing and quality assurance across implementations.
- Developed ServiceNow portal UI pages using CSS, improving the user interface and overall functionality of the platform.
- Monitored ITIL processes and system performance using ServiceNow's System Performance and System Diagnostic dashboards, ensuring continuous system optimization.
- Wrote and executed test cases for Incident Management and Service Catalogs using the Automated Test Framework (ATF) to ensure accurate functionality.
- Optimized ServiceNow Business Rules with advanced scripting techniques to enforce complex business logic, validate user inputs, and trigger automated actions, improving data accuracy and process efficiency.
- Worked with ServiceNow Cloud Management to optimize cloud operations and accelerate enterprise cloud strategies by leveraging the Now Platform.
- Applied client-side scripting techniques, such as UI Policies and Client Scripts, to enhance user experience and enforce data validation standards, resulting in improved usability and data quality.

- Planned and coordinated the execution of implementations, including technical and business validations, after each major maintenance or release cycle in ServiceNow, ensuring alignment with business objectives.
