Professional Summary

Business Intelligence professional with 14+ years of experience delivering data-driven solutions that improve operational efficiency, financial performance, and business outcomes. Expert in Power BI (DAX, Power Query, M), data modeling, SQL, and cloud analytics. Proven ability to lead automation efforts, streamline reporting, and support strategic decision-making across diverse industries.

Technical Skills

- **Business Intelligence & Visualization:** Power BI (DAX, M, Power Query), Tableau, SSRS
- **Data Engineering & ETL:** SQL, T-SQL, SSIS, Azure Data Factory, Snowflake, Python (Pandas, NumPy)
- **Cloud Platforms:** Microsoft Azure (Synapse, Data Lake), AWS (Redshift, RDS)
- **Healthcare Analytics:** Revenue Cycle Management (RCM), Patient Outcomes, KPI Dashboards
- **Process Automation:** Power Automate, SQL Stored Procedures, Cloud-Based BI Pipelines

Professional Experience-

Senior Business Intelligence & Power BI Consultant

Nordic Consulting Partners (Remote) | June 2020 – Present

- Designed and implemented 50+ interactive Power BI dashboards for healthcare executives, optimizing revenue cycle, patient readmission trends, and operational KPIs.

- Reduced manual reporting time by 60 percent by automating data extraction, cleansing, and visualization through Power BI, SQL, and Azure Synapse.
- Developed financial forecasting models for hospital revenue, improving cash flow predictability and reducing bad debt by 20 percent.
- Integrated real-time healthcare data pipelines using Power Query and Power Automate, ensuring timely insights for executive decision-making.
- Led a team of 10 analysts, mentoring them on Power BI best practices, data governance, and performance optimization.
- Partnered with stakeholders across finance, operations, and clinical departments to align BI solutions with business goals, resulting in \$4 million in cost savings.

Business Intelligence Consultant | Power BI Developer

Huron Consulting Group (Remote) | March 2016 – May 2020

- Developed custom Power BI solutions for healthcare organizations, enabling data-driven decision-making in patient care, claims management, and provider performance.
- Automated monthly financial reconciliation reports in Power BI, reducing accounting errors by 35 percent and streamlining compliance audits.
- Optimized 100+ complex SQL queries for performance tuning, cutting report load times by 45 percent and enhancing data processing efficiency.
- Designed predictive analytics models for hospital resource allocation, reducing overtime labor costs by \$1.5 million annually.
- Integrated Power BI with Azure Synapse, AWS Redshift, and Snowflake, creating scalable cloud-based BI architectures.

Business Intelligence & Data Engineer

The HCI Group (Remote) | January 2012 – February 2016

- Implemented enterprise-wide Power BI dashboards, standardizing reporting for patient volumes, hospital capacity, and provider performance.
- Automated ETL workflows using SSIS and Power BI, reducing data preparation time by 50 percent.

- Led data migration projects to transition healthcare organizations from on-premise to cloud-based BI solutions (Azure, AWS).
- Designed interactive self-service Power BI models, enabling non-technical users to generate custom reports with minimal IT dependency.
- Created real-time KPI monitoring systems, allowing healthcare executives to track critical operational metrics with live updates.

Certifications

- Microsoft Certified: Power BI Data Analyst Associate, 2020
- AWS Certified Data Analytics – Specialty, 2023
- Lean Six Sigma Black Belt, 2021
- Project Management Professional (PMP), 2022
- Certified Scrum Master (CSM), 2021

Education

Bachelor of Science in Computer Science

University of Lagos, Nigeria, 2011

Leadership & Awards

- Mentored 25+ junior analysts on Power BI best practices, with 90 percent receiving promotions within two years.
- Recognized with the HIMSS Innovation Award in 2020 for developing a healthcare cost optimization dashboard that saved \$3 million annually.

Key Focus Areas in Healthcare Business Intelligence

- Power BI Data Modeling and Visualization – Building intuitive, interactive dashboards for hospitals and payers.
- Financial and Revenue Cycle Analytics – Optimizing billing, claims, and reimbursement with BI solutions.
- Predictive Healthcare Analytics – Using machine learning and Power BI AI features to anticipate patient outcomes.
- Cloud-Based BI Solutions – Implementing Azure Synapse, Snowflake, and AWS Redshift for scalable analytics.

- Healthcare KPI Dashboards – Tracking patient outcomes, resource allocation, and value-based care metrics.
